PART I Opening the Black Box of Innovation Networks 1

1 Introduction 3
1.1 The Network Perspective 7
1.2 The Changing Meaning of Networks and Innovation 9
1.3 What is an Innovation Network? 10
1.4 The Structure-agency Debate and Network Management 13

2 Two Sides of Innovation: Search and Selection 17
2.1 Growing Role of Interactions in Innovation Studies: 1950 Onwards 19
2.2 The Myth of the Lonely Inventor: Knowledge Flow between People 22
2.3 Innovation is Clustered 26
2.4 Innovation is Path-dependent 27
2.5 Recombination is Central in Innovation 29
2.6 Innovation is Uncertain 29
2.7 Search and Networks 31
2.8 Selection and Networks 32

3 Network as a Nested System 36
3.1 Hierarchical Nesting of Networks 37
3.2 The Network Horizon: How Far to Look 39
3.3 The Upper Network Horizon: Inter-organisational Level 42
3.4 The Lower Network Horizon: Intra-organisational Level 47

Table of Contents
More Information

4 Social Network Analysis for Innovation Networks 55
4.1 Network Data Sources in Innovation Studies 56
4.2 Basic Notation 59
4.3 Focus on the Node 60
4.4 Detecting Cohesive Subgroups 71
4.5 Knowledge Mapping 72
4.6 Focus on Global Networks 80
4.7 Some Important Topics 86

5 Managing Innovation Networks 93
5.1 What is Network Management? 94
5.2 Innovation Types and Networks 104
5.3 R&D Intensity and Networks 108
5.4 Sources of Innovation and Networks 109
5.5 Innovation Timing and Networks 113
5.6 Revisiting the Network Horizon 115
5.7 Complexity and Novelty Trade-off: Institutional, Technological and Firm-specific Factors 117

PART II Search Processes 125

6 Alliances, Networks and Learning 127
6.1 Organisational Learning 128
6.2 Learning at the Dyadic Level 130
6.3 Learning and Alliance Portfolios 137
6.4 Learning in Networks 147
6.5 Revisiting the Network Horizon 153

7 Creativity and Networks 156
7.1 The Individual and Social Sides of Creativity 157
7.2 Recombination, Diversity and Complexity 158
7.3 Brokerage and Ideation 161
7.4 Strong Ties, Cohesion and Creativity 167
7.5 Global Network Structures and Creativity 173

8 Users, Product Systems and Networks 178
8.1 Modularity 179
8.2 Interactions with Users 187

Table of Contents
More Information

PART III Selection Processes 191

9 Decision-making, Signals and New Ventures 193
9.1 Organisational Routines and Selection Biases 194
9.2 Noticing Information and Making Sense of It 196
9.3 Networks and Cognitive Biases 198
9.4 Networks as Signals 203
9.5 Entrepreneurship and Networks 205
9.6 Buy-in Ties and Intrapreneurs 208

10 Networks and Organisational Change 211
10.1 Why Change? 212
10.2 Change Management and Networks 214
10.3 Anticipating Post-change Networks 218
10.4 Understanding Pre-change Networks 221
10.5 Cohesion and Structural Equivalence 222
10.6 Change Agents and Centrality 225
10.7 Advice Networks and Friendship Networks 227

11 Networks and Diffusion 230
11.1 Diffusion Studies: From Past to Present 231
11.2 Threshold Models of Diffusion 232
11.3 Influentials 239
11.4 Centrality 242
11.5 Brokerage and Node Removal 246
11.6 Cohesiveness 249
11.7 Structural Equivalence 250
11.8 Snowball Targeting 251
11.9 Exploring Contingencies 252

PART IV Behind Networks 257

12 Tie Formation and Dissolution 259
12.1 Dyadic Attributes 261
12.2 Organisation and Technology-specific Factors 265
12.3 Inter-personal Networks 268
12.4 Network Antecedents of Tie Dynamics 272

Table of Contents
More Information

13 Network Evolution 279
13.1 Real-world Networks: Bridging, Asymmetric, Clustered, Sparse 280
13.2 Antecedents of Clustering and Centrality 283
13.3 Antecedents of Brokerage 284
13.4 Sources of Network Change 288
13.5 Sparseness 291
