

## Index

- $\Gamma$ -function, 155
- $N$ -term approximation, 261
- Addition Theorem for spherical harmonics, 178
- approximate approximations, 9, 166
- approximation order, 9
- B-splines, 21
  - basis, 39
  - normalised, 40
  - tensor product, 107
  - trigonometric, 78
- Bernstein operator, 19
- Bernstein–Durrmeyer operator, 20
- Bernstein–Kantorovich operator, 20
- de Boor–Fix functionals, 42
- de Boor–Fix quasi-interpolant, 43
- boundary conditions, 253
- boundary element method, 258
- box splines, 119
  - Fourier transform, 121
- commutator, 122
- compression, 260
- conditionally positive definite functions, 3
- convolution, 143
  - semi-discrete, 144
- convolution kernels, 181
- Dagum functions, 19
- de la Vallée Poussin operator, 24
- digamma function,  $\Psi$ , 229
- Dirac space, 11
- discrete inner product, 204
- discrete PDE spline, 257
- divided differences, 26
  - trigonometric, 80
- Euler–Mascheroni constant,  $\gamma$ , 155
- Fourier coefficients, 159
- Fourier transform, 10
  - generalised, 16
- Fredholm equation, 25
- Funk–Hecke formula, 178
- Galerkin method, 256
- gamma function, 155
- Gaussian basis function, 184
- Gaussian kernels, 27
- generalised multiquadric functions, 32
- Green’s functions, 252
- Greville points, 57
- Hahn–Banach theorem, 53
- Hardy–Littlewood maximal function, 162
- Hermite polynomials, 218
- hierarchical spline space, 115
- integral quasi-interpolants, 63
- Jacobi polynomials, 179
- Kansa’s method, 255
- Laplace–Beltrami operator, 177
- Legendre polynomials, 178
- linear Fredholm equation, 248
- Lipschitz boundary, 256
- local projectors
  - B-splines, 66
  - box splines, 135
  - tensor product splines, 109
- Macdonald function, 35
- Markov inequality, 54
- Marsden’s identity, 46
  - multivariate, 127
  - trigonometric, 84
- mesh distance, 185
- modulus of continuity, 185

- Muckenhoupt weights, 162
- multiquadrics, 2
  - trigonometric, 91
- native space, 255
- non-stationary approximation, 29
- Poisson kernels, 27
- Poisson summation formula, 10
- polynomial space, 27
  - trigonometric, 76
- Powell, M. J. D., 27
- prewavelet decompositions, 189
- prewavelets, 188
- quadrature rules, 179
- quasi-interpolant, 6
  - differential multivariate splines, 128
  - discrete B-spline, 56
  - discrete multivariate splines, 133
  - integral B-spline, 63
  - Schoenberg type, 10
  - trigonometric, 22
- quasi-Lagrange functions, 4
- quasi-uniformly distributed, 145
- Schoenberg, 11
- Schoenberg space, 39
- Schoenberg–Marsden operator, 57
- Schwartz space, 11
- Shepard’s method, 184
- shifted thin-plate splines, 156
- Sobolev spaces, 144
  - on the sphere, 178
  - weighted, 162
- spherical harmonics, 177
- spline space, 77
  - trigonometric, 77
  - univariate, 39
- stationary approximation, 29
- Strang–Fix conditions, 13
- Taylor expansion, 81
  - trigonometric, 81
- thin-plate splines, 3
- truncated power function, 40
- wavelets, 189
- Weierstrass operator, 215
- Zwart–Powell (ZP) element, 125
