

Contents

	<i>Preface</i>	<i>page xi</i>
1	Introduction	1
2	Generalities on Quasi-Interpolation	6
	2.1 Approximation Properties	9
	2.2 Main Examples of Quasi-Interpolants	13
	2.3 Some Applications Connected with Different Forms of Quasi-Interpolants	24
3	Univariate RBF Quasi-Interpolants	26
	3.1 Univariate Quasi-Interpolants	27
	3.2 Examples of Convergence Results	29
	3.3 Further Examples	33
	3.4 Notes	37
4	Spline Quasi-Interpolants	38
	4.1 Spaces of Piecewise Polynomials	38
	4.2 General Form of Spline Quasi-Interpolants	41
	4.3 Marsden's Identity and de Boor–Fix Differential Quasi-Interpolants	43
	4.4 Approximation Order and Error Estimates	50
	4.5 Discrete Quasi-Interpolants	56
	4.6 Integral Quasi-Interpolants	63
	4.7 Local Spline Projectors	66
	4.8 Near-Minimally Normed Quasi-Interpolants	67
	4.9 Schoenberg's Quasi-Interpolation and Discrete Spline Quasi-Interpolants	73
	4.10 Notes	74

5	Quasi-Interpolants for Periodic Functions	76
5.1	Trigonometric Spline Quasi-interpolants	77
5.2	Multiquadric Trigonometric Spline Quasi-Interpolants	90
5.3	De la Vallée Poussin Quasi-Interpolants	93
5.4	Notes	104
6	Multivariate Spline Quasi-Interpolants	106
6.1	Quasi-Interpolants from Tensor Product Splines	107
6.2	Spline Spaces Constructed from Shifts of One Spline	118
6.3	Notes	141
7	Multivariate Quasi-Interpolants: Construction in n Dimensions	143
7.1	Introduction and Further Notation	143
7.2	Polynomial Reproduction	146
7.3	Examples	154
7.4	Convergence Theorems	161
7.5	Quasi-Interpolation via Approximate Approximation	165
7.6	Notes	169
8	Quasi-Interpolation on the Sphere	171
8.1	Spherical Quasi-Interpolation using Tensor Products	172
8.2	Quasi-Interpolation on the Sphere Using Approximate Fourier Coefficients	176
8.3	Quasi-Interpolants using Shepard's Method for the Sphere	184
8.4	Notes	186
9	Other Quasi-Interpolants and Wavelets	188
9.1	Prewavelets with Radial Basis Functions and Quasi-Lagrange Bases	188
9.2	Least-Squares Approximations as Quasi-Interpolants	203
9.3	Weierstrass Operators	215
9.4	Notes	225
10	Special Cases and Applications	226
10.1	Even- and Odd-Dimensional Spaces and Equally Spaced Centres	226
10.2	A Look at the Inverse Multiquadric Radial Function in One Dimension	240
10.3	Applications: Fredholm Integral Equations	248
10.4	Applications: Numerical Solution of Partial Differential Equations	252

	<i>Contents</i>	ix
10.5	Compression in the Space of Continuous Functions	259
10.6	Notes	265
	<i>References</i>	266
	<i>Index</i>	274
