

## INDEX

- Absolute organ scarcity, 146  
 Actual harm, 120  
 Affective affinity, 91  
 Affective communal and rationally motivated associative relationships in society, 21  
 Aggregate datasets, 117  
 Agonistic solidarity, 39–41  
 Algorithmic prediction, 130  
 Altruism, 5, 147, 79n10, 147n8, 150, 151, 153, 165, 169  
 ‘Altruistic’ live organ donation to a stranger, 151–152  
 Anglo Saxon countries, 24  
 Articulation of meaning, 45  
 Autism Spectrum Diagnosis, 128  
 Autonomy, 51, 94, 118–119, 188  
   as guiding principles in health database governance, 118–119  
   solidarity and, 57–58  
 Axiomatic practices, 79
- Background conditions  
   importance of, 170–173  
   for solidarity, 79n12  
 Bayertz, Kurt, 35, 73, 74n2  
 ‘Being alive’, notion of, 65  
 Big data, power of, 99–102  
 ‘Big data’ approaches, in medicine, 128  
 Biobank-based research, 114–115  
 Biobanking, governance of, 9–10  
 Bioethical writing  
   solidarity as an emerging concept in, 6–9  
 Biomedical ethics, 9
- Biomedical practice and policy,  
   solidarity in, 168  
   importance of background conditions, 170–173  
   Practical Utility, 169–170  
   unlocking and shaping debates, 168–169  
   ways forward in practice and policy, 173–174  
 Britain’s *de facto* national ethics council, 5  
 Brunkhorst, Hauke, 22, 38  
 Buyx, Alena, 43n1, 50n9, 61n18, 143, 144, 154
- Callahan, Daniel, 28–29, 82  
 Call logs, 104  
 Capabilities approach, 170  
 Catholic notion of solidarity, 3  
 Charity, 5, 46, 177  
   vs. solidarity, 67  
 Christian thought, 3  
 Chung, Ryoa, 91  
 Circle, 174  
 ‘Clubs’ of organ donors, 156–158  
 Commonality, 54, 60  
 Communal solidarity, 29  
 Communitarianism, 24–29, 83  
 Communitarians, 28, 84  
 Community, importance of, 178–179  
 Community vs. Society, 21  
 Comte, Auguste, 3  
 Concrete situation, sharing, 56  
 Consent, 114–115  
   and solidarity-based database governance?, 114–115

- Consent to being governed, 109–110  
 Constitutive solidarity, 29, 85–86  
 Consumer scoring, 97, 98, 100  
 Context, importance of, 47  
 Contractual, legal or administrative norms, 56  
 Contractual solidarity, 35, 36, 162  
   opt-in and opt-out consent systems, 162–163  
   solidarity and forms of consent, 163–165  
 Cordell, Sean, 108  
 Cost explosion, reasons for, 135  
 Costs, 52–53, 106  
 Costs of participating in databases, 107  
 Criminal law, 136  
 Crypto-normative usage of solidarity, 74–75  
*Curetogether*, 128
- Dasein*, 30  
 Databank governance, solidarity-based, 106  
   costs of participating in databases, 107  
   practical tools for, 108–109  
 Database governance, solidarity-based, 103  
   partnership, veracity and transparency in, 110–113  
   requirements, types and examples of databases that are suitable for, 106  
 Database model, solidarity-based  
   distinguishing features of, 109  
   partnership, veracity and transparency in solidarity-based approach, 110–113  
   voluntariness and consent to being governed, 109–110  
 Databases suitable for solidarity-based governance, 102  
   data contribution for health-related research, 102–103  
   for-profit/public interests, database and, 103–105  
   participants, 105–106  
   social value creation, database and, 104–105
- Data sharing, 133–135  
 Dawson, Angus, 64, 82, 85  
 Dean, Jodi, 32, 92  
   mobilisation of solidarity of, 93  
 Debates, solidarity and, 175  
 ‘Debunk’ practices, 170  
 Decision support systems, 130  
 Decisive motivation for a practice, 62, 70  
 Deontic group solidarity, 81–86  
 Deontic normativity, 76  
 Deontic shells, 80  
 Derpmann, Simon, 81, 84  
 Descriptive solidarity, 73–74  
 Descriptive uses of solidarity, 74–75  
 Dickenson, Donna, 129  
 Difference, role of, 30  
 Direct personal gain, 70  
 Direct reciprocity, 61  
 Dispositional motivation, 91  
 Distinctions and clarifications, 57  
   conditions of possibility for solidarity, 58–59  
   solidarity and autonomy, 57–58  
   solidarity and reciprocity, 61–62  
   solidarity vs. friendship and love, 60  
   vulnerability, 59–60  
 Domino donations, 151  
 Donation club systems, 161  
 Donor chains, 151  
 Donor clubs and priority to donors, 156  
   Israeli Organ Transplantation Act 2008, 158–161  
   LifeSharers, 156–158  
 Dr Watson software, 130  
 Durkheim, Emile, 3, 20–22
- ‘Eastern bloc’, 24  
 Eckenwiler, Lisa, 91–92  
 Enlightenment project, 27  
 Erroneous information, penalties for, 98  
 Ethical and regulatory challenges, 97  
 Ethics of care, 30, 51  
 European Science Foundation (ESF 2013), 126, 135  
 European solidarity model, 40  
 Explicit knowledge, 48

- Families, solidarity within, 153  
 Feminist and postmodern scholarship  
   precursors of, and influences from,  
   30–33  
 ‘Fixing the system’, focus on, 120–122  
 For-profit/public interests, database  
   and, 103–105  
 ‘Forward Look on Personalised  
 Medicine for the European  
 Citizen’, 123  
 Fourier, Charles, 2  
 Friendship and love  
   solidarity vs., 60
- Gadamer, Hans-Georg, 32  
 General human solidarity, 90, 91  
 ‘General situation’, 55–56  
 Genetic data, 132  
 Genomic biomarkers, 126  
 Geolocation data, 104*n*3  
 ‘Gift-giving’ practice, 13  
 Gilligan, Carol, 31  
 ‘Giving behaviours’, 47  
 Global solidarity, 1, 37, 89–93  
 God-given orientation, 3  
 Goodland, solidarity in, 46  
 Gould, Carol, 90, 91  
 Governance, solidarity-based, 102–106  
 Group-based solidarity, 156  
   ‘clubs’ of organ donors, 156–158  
   Israeli Organ Transplantation Act  
   2008, 158–161  
 Group solidarity, 33–34, 55–56, 81*n*13,  
   82, 83, 84, 86, 87, 92, 178, 180  
 Gunson, Darryl, 39
- Habermas, Jürgen, 28, 89  
 Harm mitigation, 120–122  
 Harm mitigation fund, 13, 121  
 Healthcare system, solidarity-based, 80,  
   129, 137, 143, 148, 149–150  
 Health databases, governing, 97  
   big data, power of, 99–102  
   consent, 114–115  
   database governance, solidarity-  
   based, 106  
   costs of participating in databases,  
   107  
   practical tools for, 108–109  
   databases suitable for solidarity-  
   based governance, 102  
   data contribution for health-  
   related research, 102–103  
   for-profit/public interests,  
   database and, 103–104  
   participants, 105–106  
   social value creation, database  
   and, 104–105  
   distinguishing features of solidarity-  
   based database model, 109  
   partnership, veracity and  
   transparency in solidarity-  
   based approach, 110–113  
   voluntariness and consent to  
   being governed, 109–110  
   harm mitigation and a focus on  
   ‘fixing the system’, 120–122  
   practical implications, 118  
   returning of findings, access to data  
   and, 116–117  
   solidarity and autonomy as guiding  
   principles, 118–119  
 ‘Health points’, model of, 174  
 Health-related research, 102–103  
 Health risk scoring, 98, 102  
 Healthy lifestyles, 135  
   incentives to promote, 139–142  
 Hechter, Michael, 33–34  
 Heyd, David, 59*n*15, 76
