

## Table of Contents

Preface .....	ix
The Organizing Committee.....	xi
Conference Photograph .....	xii
Participants .....	xiii

### Rotation of the bodies

The libration and interior structure of large icy satellites and Mercury .....	1
<i>T. Van Hoolst</i>	
Spin-orbit resonances and rotation of coorbital bodies in quasi-circular orbits ..	9
<i>P. Robutel, A. C. M. Correia &amp; A. Leleu</i>	
A supplementary note on constructing the general Earth's rotation theory .....	13
<i>V. A. Brumberg &amp; T. V. Ivanova</i>	
New clues on the interior of Titan from its rotation state .....	17
<i>B. Noyelles &amp; F. Nimmo</i>	
Complements to the longitudinal librations of an elastic 3-layer Titan on a non-Keplerian orbit .....	21
<i>A. Richard &amp; N. Rambaux</i>	
The long-period forced librations of Titan .....	25
<i>M. Yseboodt &amp; T. Van Hoolst</i>	
Scaling laws to understand tidal dissipation in fluid planetary layers and stars..	29
<i>P. Auclair-Desrotour, S. Mathis &amp; C. Le Poncin-Lafitte</i>	
Revisiting the capture of Mercury into its 3:2 spin-orbit resonance.....	33
<i>B. Noyelles, J. Frouard, V. V. Makarov &amp; M. Efroimsky</i>	

### N-Body problems and algorithms

Variational Chaos Indicators: Application to the Restricted Three-Body Problem	35
<i>A. M. Koksin &amp; V. A. Shefer</i>	
The parametric instability of resonance motion in restricted three body problem	39
<i>A. E. Rosaev</i>	
Three-body problem, the measure of oscillating types. A short review .....	43
<i>C. Marchal</i>	
The special case of the three body problem, when gravitational potential is given as the Kislik potential.....	45
<i>A. Shuvalova &amp; T. Salnikova</i>	

### Dynamics of exoplanets

On the orbital structure of the HD 82943 multi-planet system .....	49
<i>R. V. Buluev &amp; C. Beaugé</i>	

Dynamics and Habitability in Binary Star Systems . . . . .	53
<i>S. Eggly, N. Georgakarakos &amp; E. Pilat-Lohinger</i>	
Tidal evolution in multiple planet systems: application to Kepler-62 and Kepler-186 . . . . .	58
<i>E. Bolmont, S. N. Raymond, J. Leconte, A. Correia &amp; E. Quintana</i>	
Spin-orbit angle in compact planetary systems perturbed by an inclined companion. Application to the 55 Cancri system . . . . .	62
<i>G. Boué &amp; D. C. Fabrycky</i>	
Pebble Delivery for Inside-Out Planet Formation . . . . .	66
<i>X. H. Jonathan, C. Tan &amp; S. Chatterjee</i>	
Modeling resonant trojan motions in planetary systems . . . . .	70
<i>C. Efthymiopoulos &amp; R. I. Páez</i>	
On the relativistic Lagrange-Laplace secular dynamics for extrasolar systems . . . . .	74
<i>M. Sansottera, L. Grassi &amp; A. Giorgilli</i>	
Orbital fitting of Fomalhaut b and subsequent interaction with the dust belt . . . . .	78
<i>H. Beust, V. Faramaz &amp; J.-C. Augereau</i>	
1/1 resonant periodic orbits in three dimensional planetary systems . . . . .	82
<i>K. I. Antoniadou, G. Voyatzis &amp; H. Varvoglis</i>	
PlanetPack software tool for exoplanets detection: coming new features . . . . .	84
<i>R. V. Buluev</i>	
Impact flux of asteroids and water transport to the habitable zone in binary star systems . . . . .	86
<i>D. Bancelin, E. Pilat-Lohinger, S. Eggly &amp; R. Dvorak</i>	
Eccentricity estimates in hierarchical triple systems . . . . .	88
<i>N. Georgakarakos &amp; S. Eggly</i>	
Understanding the assembly of <i>Kepler's</i> tightly-packed planetary systems . . . . .	90
<i>T. O. Hands, R. D. Alexander &amp; W. Dehnen</i>	
Empirically Derived Dynamical Models for the 55 Cancri and GJ 876 Planetary Systems . . . . .	93
<i>B. E. Nelson, E. B. Ford, J. T. Wright &amp; D. A. Fischer</i>	
Modeling Trojan dynamics: diffusion mechanisms through resonances . . . . .	96
<i>R. I. Páez &amp; C. Efthymiopoulos</i>	
Diagrams of stability of circumbinary planetary systems . . . . .	98
<i>E. Popova</i>	
Transit observations with the three San Pedro Mártir telescopes . . . . .	101
<i>D. Ricci, M. Reyes-Ruiz, R. Michel, C. Ayala-Loera, G. Ramón- Fox, L. F. Machado, S. Navarro, S. Brown Sevilla &amp; S. Curiel</i>	
Dynamic study of possible host stars for extrasolar planetary systems . . . . .	104
<i>N. A. Shakht, L. G. Romanenko, D. L. Gorshanov &amp; O. O. Vasilkova</i>	
Symmetric Four-mass Schubart-like Systems . . . . .	106
<i>W. L. Sweatman</i>	

*Contents*

vii

**Small bodies, asteroids and space debris**

Small asteroid system evolution .....	108
S. A. Jacobson	
Ranking in-orbit fragmentations and space objects.....	118
A. Rossi, G. B. Valsecchi & E. Maria Alessi	
Dynamical evolution of near-Sun objects.....	126
V. V. Emel'yanenko & M. A. Shelyakov	
Automated Classification of Asteroids into Families at Work.....	130
Z. Knežević, A. Milani, A. Cellino, B. Novaković, F. Spoto & P. Paolicchi	
Hill Stability in the Full 3-Body Problem .....	134
D. J. Scheeres	
Fragmentation of colliding planetesimals with water content.....	138
T. I. Maindl, R. Dvorak, C. Schäfer & R. Speith	
Trajectory and physical properties of near-Earth asteroid 2009 BD .....	142
D. Farnocchia, M. Mommert, J. L. Hora, S. R. Chesley, D. Vokrouhlický, D. E. Trilling, M. Mueller, A. W. Harris, H. A. Smith & G. G. Fazio	
Orbit computation of the TELECOM-2D satellite with a Genetic Algorithm ...	146
F. Deleflie, D. Coulot, A. Vienne, R. Decosta, P. Richard & M. Amjad Lasri	
New methods for space debris collision assessment .....	150
D. Casanova, C. Tardioli & A. Lemaître	
Comparison of different methods to compute a preliminary orbit of Space Debris using radar observations .....	154
H. Ma & G. F. Gronchi	
Orbit identification for large sets of data: preliminary results .....	156
S. Marò & G. F. Gronchi	
Averaged changes in the orbital elements of meteoroids due to Yarkovsky-Radzievskij force.....	160
G. O. Ryabova	
Explosive evolution of small bodies in planetary atmospheres.....	162
S. Ibادов & F. S. Ibادов	
Close encounters of Near Earth Objects with large asteroids.....	164
A. Ivantsov, S. Eggel, D. Hestroffer, W. Thuillot & P. Gurfil	
Determination of an Intermediate Perturbed Orbit using Multiple Observations	166
V. A. Shefer	
Dynamical evolution of objects on highly elliptical orbits near high-order resonance zones .....	168
E. D. Kuznetsov & S. O. Kudryavtsev	
On relative equilibria of mutually gravitating massive point and triangular rigid body .....	170
V. I. Nikonov	
The family of Quasi-satellite periodic orbits in the circular co-planar RTBP....	172
A. Pousse, P. Robutel & A. Vienne	

Excluding interlopers from asteroid families .....	174
<i>V. Radović &amp; B. Novaković</i>	
The effect of secular resonances on the long-term orbital evolution of uncontrolled near-Earth objects .....	176
<i>T. V. Bordovitsyna, I. V. Tomilova &amp; G. O. Ryabova</i>	
Long-term evolution of asteroids in the 2:1 Mean Motion Resonance .....	178
<i>D. K. Skoulidou, K. Tsiganis &amp; H. Varvoglis</i>	
Dynamical properties of Watsonia asteroid family .....	180
<i>G. Tsirvoulis, B. Novaković, Z. Knežević &amp; A. Cellino</i>	
<b>Solar system and natural satellites</b>	
Complex satellite systems: a general model of formation from rings .....	182
<i>A. Crida &amp; S. Charnoz</i>	
Spin-orbit coupling and chaotic rotation for eccentric coorbital bodies .....	190
<i>A. Leleu, P. Robutel &amp; A. C. M. Correia</i>	
On the Lagrange libration points of the perturbed Earth-Moon System .....	192
<i>T. V. Salnikova &amp; S. Ya. Stepanov</i>	
<b>Formation of planetary systems</b>	
The Grand Tack model: a critical review .....	194
<i>S. N. Raymond &amp; A. Morbidelli</i>	
Planetesimal fragmentation and giant planet formation: the role of planet migration .....	204
<i>O. M. Guilera, D. Swoboda, Y. Alibert, G. C. de Elía, P. J. Santamaría &amp; A. Brunini</i>	
Rapid planetesimal formation in the inner protoplanetary disk .....	208
<i>J. Drążkowska, F. Windmark &amp; S. Okuzumi</i>	
Effects of planetary mass accretion on the planets migration: the disk structures .....	212
<i>R. Álvarez &amp; E. Nagel</i>	
Reversing Type I Migration in Gap Shadows .....	214
<i>H. Jang-Condell</i>	
Planet Formation in Close Binaries .....	216
<i>H. Jang-Condell</i>	
Terrestrial planet formation in low-mass disks: dependence with initial conditions .....	218
<i>M. P. Ronco, G. C. de Elía &amp; O. M. Guilera</i>	
Influence of the inclination damping on the formation of planetary systems .....	220
<i>S. Sotiriadis, A.-S. Libert &amp; K. Tsiganis</i>	
Rapid clump formation in discs of young stellar objects class O-I .....	223
<i>O. P. Stoyanovskaya &amp; V. N. Snytnikov</i>	
Can we expect the massive discs around young stellar objects class O-I to be a birthplace of planetesimal? .....	225
<i>V. N. Snytnikov, O. P. Stoyanovskaya &amp; O. A. Stadnichenko</i>	
Author index .....	227
