Subject Index

- Abbreviated Torrance Test for Adults (ATTA), 358–359
- academic self-concept, 308–309
- ACC (anterior cingulate cortex), 65
- adaptive cognitive flexibility, 286–287
- ADHD (Attention Deficit Hyperactivity Disorder), 357–359
- adolescence, reasoning and creativity in, 291–293
- adulthood, reasoning and creativity in, 293–296
- Advanced Placement (AP), 92–93
- Affect in Play Scale (APS), 56–59
- affective processes, 53–55
- agreeableness personality trait, 335
- AHs (associative hierarchies)
 defined, 189–190
 modification of, 190–192
- Alternate Uses Task, 199–200, 248–249, 368–369
- analyzing logic of article (template for), 104–105
- anterior cingulate cortex (ACC), 65
- anxiety, 333–334
- AP (Advanced Placement), 92–93
- APS (Affect in Play Scale), 56–59
- Argentine tango, 266–267
- arithmetic subtest, 358
- arsonist model (inspired creativity programs), 347
- artistic talent and creativity
 artistic identity, 131–132
 children's development of, 117–120
 views of, 116–117
 young art students, 120–122
 creativity in arts and sciences, 341–342
 early indices of, 122–123
 education intervention and artistic processing and products, 129–131
 example of developing artist, 133–139
 overview, 114–116
 Picasso, 123–128
- arts and sciences, 341–342. *See also* sciences
- ASD (Autism Spectrum Disorder), 24
- assimilation effects (academic self-concept), 308–309
- associate suppression, 193–198
- associative hierarchies (AHs)
 defined, 189–190
 modification of, 190–192
- associative memory networks, in creative cognition, 188–190
- associative processes, 54–55
- ATTA (Abbreviated Torrance Test for Adults), 358–359
- attention
 attentional resources, 357–359
 broad and narrow, 247–250
- Attention Deficit Hyperactivity Disorder (ADHD), 357–359
- Autism Spectrum Disorder (ASD), 24
- axis and focus lenses
 background, 263–264
 creativity and expertise matrix
 in dance, 266–273
 educational implications, 278–279
 individual variation, 275–276
 overview, 265–266
 in sub-domains of law, 273
 temporal dynamics, 276–278
 horizontal and vertical creativity, 264–265
 overview, 261–263
- BACON program, 227
- Barron-Welsh Art Scale, 340
- Basking-In-Reflected-Glory Effect (BIRGE), 308–309
- beyonders, 93
- BFLPE (Big-Fish-Little-Pond Effect), 308–309
- “Big-C Creativity”, 213
- Big Five personality traits, 339–341
 agreeableness, 335
 conscientiousness, 335–336
 extraversion, 334–335
 neuroticism, 333–334
 openness, 335

- Big-Fish-Little-Pond Effect (BFLPE), 308–309
 bipolar disorder, 338
 BIRGE (Basking-In-Reflected-Glory Effect), 308–309
 blind combinatorial process, 235n1
 brain. *See also* neuroscience of creativity and reasoning

 - knowledge and, 174–176
- productive beliefs (mathematical problem solving), 158
- productive disposition (mathematical problem solving), 156–157
- product-oriented measures, 368–369
- Products dimension (SI model), 343
- program planning (gifted education), 108–110
- Propulsion Theory of Creative Contributions, 212
- psychological creativity (P-creativity), 212
- psychoticism, 336–339
- Purdue Three-Stage Model of creative development, 92–93
- quality (creative output), 237–240
- quantity (creative output), 237–240
- Ramanujan, 2
- random combinatorial model, 239–240
- RAT (Remote Associates Test), 199–200, 358, 359, 368–369
- rCBF (regional cerebral blood flow), 200, 363
- reaction time (RT) tasks, 248–249
- reasoning. *See also* axis and focus lenses;
- deductive reasoning
 - in adolescence, 291–293
 - in adulthood, 293–296
 - in childhood, 283–291
 - creative genius and, 232–240
 - creative problem solving
 - overview, 147–149
 - problem solving, defined, 150
 - problems, defined, 148–150 - deductive reasoning using decontextualized materials, 365–367
 - elements of, 102–104

Subject Index

393

- mathematical problem solving
 - defined, 150–152
 - role of conceptual knowledge in, 153–154
 - role of factual knowledge in, 152–153
 - role of metacognitive knowledge in, 156–158
 - role of procedural knowledge in, 156
 - role of strategic knowledge in, 155
- overview, 282–283
- post-formal
 - dialectical thinking, 294–296
 - emergence of, 293–294
 - reasoning about insides, 19–20
 - reasoning styles using contextualized materials, 364–365
 - theories of mechanisms accounting for differences between creativity and, 357–359
- Reggio Emilia approach to early education, 46
- regional cerebral blood flow (rCBF), 200, 363
- regions of interest (ROIs), 252–254
- Remote Associates Test (RAT), 199–200, 358, 359, 368–369
- Renzulli's Three Ring Conception of Giftedness, 92–93
- repetitive transcranial magnetic stimulation (rTMS), 203–205
- representational redescription theory, 305–306
- research and development, 347–348
 - intelligence researchers, 329
 - neuroscience, 360–361, 362–364
 - personality researchers, 329
 - pretend play, 55–59
- retrieval-induced forgetting (RIF), 193–198
- retroactive interference, 195
- Revel, J. F., 212
- RFT (rod and frame task), 365
- RIF (retrieval-induced forgetting), 193–198
- right hemispheric (RH) processes, 362–363
- rod and frame task (RFT), 365
- ROIs (regions of interest), 252–254
- Rossini, Gioachino, 212
- routine problems, 150
- RT (reaction time) tasks, 248–249
- rTMS (repetitive transcranial magnetic stimulation), 203–205
- saliency network, 254, 255
- SAT scores, 92–93
- schematic knowledge, 166–167, 174–176
 - defined, 147–148
 - role in mathematical problem solving, 153–154
- schizotypal disorder, 336–339
- schooling and creativity
 - creativity resources for educators, 87
 - definitional issues, 77–78
 - formal schooling, 72–74
 - marginalization of creativity, 74–75
 - overview, 72
 - relationship between learning and creativity, 78–81
 - subject matter, student understanding, and novelty, 81–84
 - teacher centered classroom, 75–77
 - teacher preparation programs, 85–87
- sciences. *See also* neuroscience of creativity and reasoning
 - creativity in arts and sciences, 341–342
 - science and engineering education, 40–42
- scientific creativity, 226–228
- scientists, technology specialists, engineers, and mathematicians (STEM), 94–95
- searchlight intelligence, 275–276
- Searle, John, 79
- selective combination ability, 293
- selective comparison ability, 293
- selective encoding, 293
- self knowledge, 105–107
- self-assessed (self-estimated) intelligence, 330–331
- self-assessment of creativity, 356–357
- self-beliefs. *See* creative self-beliefs
- self-efficacy beliefs (mathematical problem solving), 157–158
- self-estimated (self-assessed) intelligence, 330–331
- self-rated creativity, 304
- Semantic Inhibition of Return Task, 358
- Short Scale of Creative Self (SSCS), 306–307
- SI (Structure-of-Intellect) model, 343
- situation model (mathematical problem solving), 150–151
- small-town law, 268
- social closeness, 334–335
- social persuasion (self-efficacy), 309
- social potency, 334–335
- spontaneous-cognitive pathway, 60–61, 286–287
- spontaneous-emotional pathway, 60–61
- SSCS (Short Scale of Creative Self), 306–307
- STEM (scientists, technology specialists, engineers, and mathematicians), 94–95
- strategic knowledge
 - defined, 147–148
 - role in mathematical problem solving, 155
- strategies
 - cross-process
 - knowledge and, 176–177
 - processes and, 172–174
 - process-specific strategy and, 177–179
 - defined, 168–169
 - process-specific
 - cross-process strategies and, 177–179
 - knowledge and, 174–176

- stress, creative cognition and, 198–200
 Stroop task, 249
 Structure-of-Intellect (SI) model, 343
 student understanding, 81–84
 student-centered learning, 75–77
 subject matter, creativity and, 81–84
 symbol search subtests, 358
- tango, 266–267
 teacher preparation programs, 85–87
 teacher-centered classroom, 75–77
 temporal dynamics, creativity and expertise matrix, 276–278
 10-year rule, 227, 229–230
 theory construction, 17–20
 innate potential, 19
 overview, 17–18
 reasoning about insides, 19–20
 Theory of Mind (ToM) ability, 62
 thinking styles, 359
 “think/no-think” task, 200–202
 Three Ring Conception of Giftedness, 92–93
 TIE (Typical Intellectual Engagement), 330–331
 ToM (Theory of Mind) ability, 62
 Torrance Test of Creative Thinking (TTCT),
 249, 284–285, 292–293, 344, 355–356, 358,
 368–369
 trait anxiety, 333–334
 Trust and Estate law, 271
The Two Cultures lecture (Snow), 341
 Typical Intellectual Engagement (TIE), 330–331
- unproductive beliefs (mathematical problem solving), 157
 Unusual Uses Task, 358
 Unusual/Alternate Usage Task, 355–356
 U-shaped hypothesis (artistic development),
 116–117
- validation phase (deductive reasoning), 360
 variability, 174, 177
- ventrolateral prefrontal cortex, 65
 ventromedial prefrontal cortex, 60
 vertical creativity
 dance, 266–273
 overview, 264–265
 small-town law, 268
 Trust and Estate law, 271
 vicarious experiences (self-efficacy),
 307–308
- Wednesday Group, Norwegian School of Sport Sciences, 278–279
 well-defined problems, 149
 Westerners
 deductive reasoning using decontextualized materials, 365–367
 influence of culture on creativity and reasoning, 369–371
 reasoning styles using contextualized materials, 364–365
 views on creativity, 368–369
 Wisconsin Card Sorting Test, 246–247
 worked-out examples (mathematical problem solving), 155
 working memory, 357
- young children
 generalizing from specifics, 20–24
 category-based induction, 21–22
 generic language, 22–24
 overview, 20–21
 non-conventional language use, 10–15
 metaphoric language, 13–15
 overextensions, 11–12
 overview, 10–11
 pretense, 15–17
 theory construction, 17–20
 innate potential, 19
 overview, 17–18
 reasoning about insides, 19–20
Young Children Reinvent Arithmetic (Kamii), 44
