

## Index

- acceptor impurity, 241
- action, 339
  - classical, 356
- active element, 288
- ampere, defined, 99
- band bending, 252
- band index, 210
- binary numbers, 314
- Bloch number, 153
- Bloch oscillation, 189, 280
- Bloch's theorem, 171, 209
- body-centered cubic crystal, 213, 427
- Bohr radius, 81
- Boltzmann factor, 386, 390
- Born rule, 331
- Born–von Karman boundary condition, 169, 207
- box boundary condition, 379
- Bragg planes, 211
- Bravais lattice, 205
  - with a basis, 205, 428
- Brillouin zone, 211
  - first, 162
- canonical quantization rule, 377
- chemical potential, 393
- CMOS technology, 265
- collector, 261
- complementarity, 376
- complete set, 12, 377
- conductance, 92
- conduction electrons, 42
- continuity equation, 7
- coulomb, unit of charge, 99
- covalent bonding, 143
- current density
  - probability, 8
- de Broglie wave length, 376
- density of states, 48
- depletion layer, 250
- Dirac delta function, 336, 350
- Dirac sequence, 349
- donor impurity, 229
- doping, 229
- effective mass tensor, 432
- eigenvalue
  - equation, 377
- electric potential, 100
- electron charge, 99
- emitter, 261
- energy, 10
- envelope function, 273
- exclusion principle, 44, 66, 385
- extrinsic semiconductor, 236, 247
- face-centered cubic crystal, 213, 427, 428
- farad, defined, 105
- Fermi energy, 46
- Fermi function, 56, 62
- Fermi momentum, 45
- Fermi sphere, 45
- Fermi surface, 46
- Fermi temperature, 55
- flip-flop, 328
- free particle propagator, 6
- functional, 356
- gauge fields, 359
- gauge invariance, 359
- Gauss's law, 78, 104
- generation current, 255, 256
- group velocity, 84, 413
- Hall coefficient, 96
- Hall voltage, 97
- Hamilton's function, 345, 357
- Hamilton's principle, 357
- Hamiltonian, 1, 2, 345
- hermitian operator, 3
- heterostructure, 267, 269, 431
- impurity levels, 234
- inductance, 118
- inductor, 116
- inhomogeneous semiconductor, 249
- intrinsic carrier density, 224

- intrinsic semiconductor, 223  
 inversion layer, 282
- Joule heating, 93  
 joule, defined, 102
- kinetic momentum, 359  
 Kronecker function, 11  
 Kronig–Penney model, 149
- Lagrange’s function, 356  
 Lagrangian, 340  
 Landauer formula, 286  
 Laplacian, 1  
 Larmor frequency, 95  
 law of mass action, 224, 246  
 level splitting, 141  
 Lorentz force, 358
- magnetoresistance, 95  
 mesoscopic sample, 284  
 mini-bands, 280  
 minority carriers, 256  
 minority currents, 255  
 mobility tensor, 95  
 modulation doping, 281  
 molecular beam epitaxy, 267  
 momentum, 372  
 momentum eigenstate, 377  
 momentum operator, 377  
 monovalent bonding, 143  
 multiplexer, 329  
 multiplication rule, 334, 338
- n-type semiconductor, 236  
 negative differential resistance, 288  
 newton, defined, 102
- occupation number representation, 61  
 ohm, defined, 102  
 operator, 1
- p–n junction, 249  
 p-type semiconductor, 245  
 partition function, 386, 390  
 path integral, 339  
 perfect conductor, 98  
 periodic boundary condition, 380  
 photoconductivity, 228  
 plane wave, 376  
 point contact, 301  
 primitive vectors, 205  
 principle of least action, 357
- probability amplitude, 1, 332  
   conditional, 332  
 propagator, 336
- quantization rule  
   canonical, 345  
 quantum of action, 342  
 quantum well, 277  
 quantum wire, 297
- ray, 9
- reciprocal lattice, 206  
 recombination, 254  
 recombination current, 256, 257  
 rectifier, 258  
 repeated zone scheme, 209  
 resistance, 92, 102  
 resistivity, 92  
 resistivity tensor, 95  
 resistor, 92, 102
- Schrödinger equation, 1, 2, 14, 345  
   time-independent, 10  
 semiconductor, 227  
 simple cubic lattice, 427  
 Sommerfeld expansion, 394  
 Sommerfeld model, 42  
 Sommerfeld’s free electron model, 42  
 stationary state, 9  
 step function, 350  
 superposition principle, 334, 342
- Thomas–Fermi screening length, 81  
 time evolution operator, 347  
 time reversal invariance, 367  
 time-of-flight experiment, 372  
 transfer matrix, 28, 30  
 transmission coefficient, 23  
 tunneling probability, 32
- unit cell, 149, 206  
   Wigner–Seitz, 211  
 unit of electric charge, 52
- vacuum dielectric constant, 108  
 valence electrons, 145  
 volt, defined, 102  
 voltage, 92, 101
- wave function, 1, 332  
 wave packet, 84, 378  
 wave packet spreading, 7  
 Wronskian, 361
