<i>Preface to the second edition</i>	<i>page xi</i>
<i>Introduction</i>	xiii
<i>Terminology, conventions, and notation</i>	xxiii
<b>PART I Constructions, examples, and structure theory</b>	<b>1</b>
<b>1 Overview of pseudo-reductivity</b>	<b>3</b>
1.1 Comparison with the reductive case	3
1.2 Elementary properties of pseudo-reductive groups	11
1.3 Preparations for the standard construction	16
1.4 The standard construction and examples	26
1.5 Main result	34
1.6 Weil restriction and fields of definition	36
<b>2 Root groups and root systems</b>	<b>44</b>
2.1 Limits associated to 1-parameter subgroups	45
2.2 Pseudo-parabolic subgroups	61
2.3 Root groups in pseudo-reductive groups	73
2.4 Representability of automorphism functors	84
<b>3 Basic structure theory</b>	<b>92</b>
3.1 Perfect normal subgroups of pseudo-reductive groups	92
3.2 Root datum for pseudo-reductive groups	100
3.3 Unipotent groups associated to semigroups of weights	106
3.4 Bruhat decomposition and Levi subgroups	122
3.5 Classification of pseudo-parabolic subgroups	138

<b>PART II Standard presentations and their applications</b>	<b>157</b>
<b>4 Variation of <math>(G', k'/k, T', C)</math></b>	<b>159</b>
4.1 Absolutely simple and simply connected fibers	159
4.2 Uniqueness of $(G', k'/k)$	164
<b>5 Ubiquity of the standard construction</b>	<b>173</b>
5.1 Main theorem and central extensions	173
5.2 Properties of standardness and standard presentations	181
5.3 A standardness criterion	191
<b>6 Classification results</b>	<b>202</b>
6.1 The $A_1$ case away from characteristic 2	203
6.2 Types $A_2$ and $G_2$ away from characteristic 3	209
6.3 General cases away from characteristics 2 and 3	214
<b>PART III General classification and applications</b>	<b>227</b>
<b>7 The exotic constructions</b>	<b>229</b>
7.1 Calculations in characteristics 2 and 3	229
7.2 Basic exotic pseudo-reductive groups	239
7.3 Algebraic and arithmetic aspects of basic exotic pseudo-reductive groups	251
<b>8 Preparations for classification in characteristics 2 and 3</b>	<b>265</b>
8.1 Further properties of basic exotic pseudo-reductive groups	265
8.2 Exceptional and exotic pseudo-reductive groups	270
<b>9 Absolutely pseudo-simple groups in characteristic 2</b>	<b>289</b>
9.1 Subgroups of $R_{K/k}(\mathrm{SL}_2)$ and $R_{K/k}(\mathrm{PGL}_2)$	290
9.2 Pseudo-split pseudo-simple groups of type $A_1$	306
9.3 Root groups and module schemes	310
9.4 Central quotients	320
9.5 Computations with a multipliable root	334
9.6 Birational group law preparations	339
9.7 Construction of birational group laws	356
9.8 Properties of the groups $G_{V^{(2)}, V', n}$	371
9.9 Classification over fields $k$ with $[k : k^2] = 2$	412

*Contents*

ix

<b>10</b>	<b>General case</b>	<b>422</b>
10.1	Factors with non-reduced root system and the generalized standard construction	422
10.2	Classification via generalized standard groups	431
<b>11</b>	<b>Applications</b>	<b>438</b>
11.1	Maximal tori in pseudo-reductive groups	438
11.2	Pseudo-semisimplicity	443
11.3	Unirationality	448
11.4	Structure of root groups and pseudo-parabolic subgroups	452
<b>PART IV</b>	<b>Appendices</b>	<b>463</b>
<b>A</b>	<b>Background in linear algebraic groups</b>	<b>465</b>
A.1	Review of definitions	466
A.2	Some results from the general theory	474
A.3	Frobenius morphisms and non-affine groups	482
A.4	Split reductive groups: Existence, Isomorphism, and Isogeny Theorems	488
A.5	Weil restriction generalities	503
A.6	Groups without Levi subgroups	523
A.7	Lie algebras and Weil restriction	528
A.8	Lie algebras and groups of multiplicative type	540
<b>B</b>	<b>Tits' work on unipotent groups in nonzero characteristic</b>	<b>561</b>
B.1	Subgroups of vector groups	561
B.2	Wound unipotent groups	567
B.3	The <i>cckp</i> -kernel	571
B.4	Torus actions on unipotent groups	575
<b>C</b>	<b>Rational conjugacy and relative root systems</b>	<b>581</b>
C.1	Pseudo-completeness	581
C.2	Conjugacy results in the smooth affine case	592
C.3	Split unipotent subgroups of pseudo-reductive groups	640
C.4	Beyond the smooth affine case	649
	<i>References</i>	656
	<i>Index</i>	659
