

Index

- 1-form, 16
- characteristic roots, 107
- addition, 3
- adjoint mapping, 50, 122
- adjoint matrix, 103
- adjugate matrix, 103
- adjunct matrix, 103
- algebraic multiplicity, 216
- algebraic number, 13
- angular frequencies, 255
- annihilating polynomials, 221
- annihilator, 19
- anti-Hermitian mappings, 195
- anti-Hermitian matrices, 7
- anti-lower triangular matrix, 99
- anti-self-adjoint, 126
- anti-self-adjoint mappings, 195
- anti-self-dual, 126
- anti-symmetric, 4
- anti-symmetric forms, 230
- anti-upper triangular matrix, 99
- basis, 13
- basis change matrix, 15
- basis orthogonalization, 117
- basis transition matrix, 15, 45
- Bessel inequality, 140
- bilinear form, 147, 180
- bilinear forms, 147
- boxed diagonal matrix, 57
- boxed lower triangular form, 99
- boxed upper triangular form, 98
- boxed upper triangular matrix, 56
- bracket, 248
- Cayley–Hamilton theorem, 110
- characteristic of a field, 2
- characteristic polynomial, 107
- characteristic polynomial of linear mapping, 109
- Cholesky decomposition theorem, 168
- Cholesky relation, 168
- co-prime, 207
- codimension, 27
- cofactor, 89
- cofactor expansion, 89
- cokernel, 39
- column rank of a matrix, 52
- commutator, 256
- complement, 22
- complete set of orthogonal vectors, 139
- component, 4
- composition of mappings, 37
- congruent matrices, 148
- contravariant vectors, 18
- convergent sequence, 28
- convex, 164
- coordinate vector, 14
- coordinates, 14
- covariant vectors, 18
- Cramer’s formulas, 80, 104
- Cramer’s rule, 80, 104
- cyclic vector, 62, 217
- cyclic vector space, 217
- Darboux basis, 235
- degree, 86
- degree of a nilpotent mapping, 62
- dense, 72
- determinant, 79
- determinant of a linear mapping, 105

- diagonal matrix, 6
 diagonalizable, 222
 diagonally dominant condition, 101
 dimension, 13
 direct product of vector spaces, 22
 direct sum, 21
 direct sum of mappings, 58
 dominant, 237
 dot product, 5
 doubly Markov matrices, 247
 dual basis, 17
 dual mapping, 122
 dual space, 16

 eigenmodes, 255
 eigenspace, 57
 eigenvalue, 57
 eigenvector, 57
 Einstein formula, 255
 entry, 4
 equivalence of norms, 30
 equivalence relation, 48
 equivalent polynomials, 207
 Euclidean scalar product, 124, 127

 Fermat's Little Theorem, 267
 field, 1
 field of characteristic 0, 2
 field of characteristic p , 2
 finite dimensional, 13
 finite dimensionality, 13
 finitely generated, 13
 form, 16
 Fourier coefficients, 139
 Fourier expansion, 139
 Fredholm alternative, 53, 137, 178
 Frobenius inequality, 44
 functional, 16
 Fundamental Theorem of Algebra, 85

 generalized eigenvectors, 216
 generalized Schwarz inequality, 194
 generated, 8
 generic property, 72
 geometric multiplicity, 57
 Gram matrix, 136
 Gram–Schmidt procedure, 117
 great common divisor, 207
 Gronwall inequality, 263

 Hamiltonian, 254
 hedgehog map, 88
 Heisenberg equation, 263
 Heisenberg picture, 262
 Heisenberg uncertainty principle, 258
 Hermitian congruent, 181
 Hermitian conjugate, 7, 134
 Hermitian matrices, 7
 Hermitian matrix, 134
 Hermitian scalar product, 127
 Hermitian sesquilinear form, 182
 Hermitian skewsymmetric forms, 236
 Hermitian symmetric matrices, 7
 Hilbert–Schmidt norm of a matrix, 137
 homogeneous, 148
 hyponormal mappings, 199

 ideal, 205
 idempotent linear mappings, 60
 identity matrix, 6
 image, 38
 indefinite, 161
 index, 83
 index of negativity, 119
 index of nilpotence, 62
 index of nullity, 119
 index of positivity, 119
 infinite dimensional, 13
 injective, 38
 invariant subspace, 55
 inverse mapping, 42
 invertible linear mapping, 41
 invertible matrix, 7
 irreducible linear mapping, 56
 irreducible polynomial, 207
 isometric, 142
 isometry, 142
 isomorphic, 42
 isomorphism, 42
 isotropic subspace, 235

 Jordan block, 220
 Jordan canonical form, 220
 Jordan decomposition theorem, 220
 Jordan matrix, 220

 kernel, 38

 least squares approximation, 176
 left inverse, 7, 42
 Legendre polynomials, 141
 Levy–Desplanques theorem, 101
 limit, 28
 linear complement, 22
 linear function, 16
 linear span, 8

- linear transformation, 55
- linearly dependent, 8, 9
- linearly independent, 10
- linearly spanned, 8
- locally nilpotent mappings, 62
- lower triangular matrix, 6
- mapping addition, 35
- Markov matrices, 243
- matrix, 4
- matrix exponential, 76
- matrix multiplication, 5
- matrix-valued initial value problem, 76
- maximum uncertainty, 261
- maximum uncertainty state, 261
- Measurement postulate, 252
- metric matrix, 136
- minimal polynomial, 67, 221
- Minkowski metric, 120
- Minkowski scalar product, 120
- Minkowski theorem, 101
- minor, 89
- mutually complementary, 22
- negative definite, 161
- negative semi-definite, 161
- nilpotent mappings, 62
- non-definite, 161
- non-degenerate, 120
- non-negative, 161
- non-negative matrices, 237
- non-negative vectors, 237
- non-positive, 161
- nonsingular matrix, 7
- norm, 28
- norm that is stronger, 29
- normal equation, 176
- normal mappings, 172, 194, 195
- normal matrices, 197
- normed space, 28
- null vector, 115
- null-space, 38
- nullity, 39
- nullity-rank equation, 40
- observable postulate, 252
- observables, 252
- one-parameter group, 74
- one-to-one, 38
- onto, 38
- open, 73
- orthogonal, 115
- orthogonal mapping, 123, 132
- orthogonal matrices, 7
- orthogonal matrix, 134
- orthonormal basis, 119, 130
- Parseval identity, 140
- Pauli matrices, 257
- period, 62
- permissible column operations, 95
- permissible row operations, 92
- perpendicular, 115
- Perron–Frobenius theorem, 237
- photoelectric effect, 255
- Planck constant, 254
- polar decomposition, 198
- polarization identities, 149
- polarization identity, 132
- positive definite Hermitian mapping, 188
- positive definite Hermitian matrix, 188
- positive definite quadratic form, 188
- positive definite quadratic forms, 158
- positive definite scalar product over a complex vector space, 128
- positive definite scalar product over a real vector space, 128
- positive definite self-adjoint mapping, 188
- positive definite self-adjoint mappings, 158
- positive definite symmetric matrices, 158
- positive diagonally dominant condition, 101
- positive matrices, 237
- positive semi-definite, 161
- positive vectors, 237
- preimages, 38
- prime polynomial, 207
- principal minors, 166
- product of matrices, 5
- projection, 60
- proper subspace, 8
- Pythagoras theorem, 129
- QR factorization, 134
- quadratic form, 148, 181
- quotient space, 26
- random variable, 252
- range, 38
- rank, 39
- rank equation, 40
- rank of a matrix, 52
- reducibility, 56
- reducible linear mapping, 56
- reflective, 19
- reflectivity, 19
- regular Markov matrices, 243

- regular stochastic matrices, 243
- relatively prime, 207
- Riesz isomorphism, 122
- Riesz representation theorem, 121
- right inverse, 7, 42
- row rank of a matrix, 52
- scalar multiple of a functional, 16
- scalar multiplication, 3
- scalar product, 115
- scalar-mapping multiplication, 35
- scalars, 1, 3
