## Climate Change and Justice

Achieving climate justice is increasingly recognised as one of the key problems associated with climate change. The numerous and complex issues which climate change involves underline the need for a normative framework that allows us both to assess the dangers that we face and to create a just distribution of the costs of action. This collection of original essays by leading scholars sheds new light on the key problems of climate justice, offering innovative treatments of a range of issues including international environmental institutions, geoengineering, carbon budgets and impact on future generations. It will be a valuable resource for researchers and upper-level students of ethics, environmental studies and political philosophy.

JEREMY MOSS is Professor of Political Philosophy at the University of New South Wales, Sydney. His publications include *Reassessing Egalitarianism* (2014).

## Acknowledgements

---

This book began as an idea for a collection on climate change with my colleagues Simon Keller, Iwao Hirose and Garrett Cullity. I would like to thank them all for the effort they have, at various times, put into getting the book organised, especially the workshops where some of the papers were discussed. Garrett in particular has been very generous with his time and support for the collection. The book has had the crucial support of a number of grants from the Australian Research Council (ARC) – they enabled me to have time off for research and travel to other universities – in particular an ARC Future Fellowship and a Discovery grant, on Climate Justice. I thank the Council for its generous support. I would also like to thank Alicia Coram for crucial proof reading and formatting assistance.
