- Abels, K., 68, 129, 145
 Abney, S., 35, 44, 52, 117, 124
 accessibility condition (AC), 80–83
 accusative case
 defined, 180
 ditransitive argument structures, 207–208
 obligatory v-projection, 204–207
 in p-projections, 208–210
 relational derivation, 201–204
 transitivity, 210–212
 active versus passive argument, 90–91
 adjectival modification
 observations of, 121–122
 postnominal, 122–123
 prenominal, 123–127
 adverbial modification
 epistemic adverbs, 109–110
 evaluative adverbs, 114–115
 frequentative adverbs, 107–109
 infinitive complements, 111–114
 lexical projections, 117–121
 manner adverbs
 empirical properties of, 96–97
 linearization of, 97–102
 pragmatic adverbs, 115–116
 problem of, 93–95
 prospective aspectual adverbs, 105–107
 subject-oriented adverbs, 102–105
 Agree operation, 187–190
 Andrews, A., 108
 Arabic language, 145
 argument selection
 in basic language structure, 277
 defined, 43
 Atayal language, 154–156
 athematic selection
 defined, 19–20
 structural accusative case
 ditransitive argument structures, 207–208
 obligatory v-projection, 204–207
 in p-projections, 208–210
 relational derivation, 201–204
 transitivity, 210–212
 structural nominative case
 finite and non-finite clauses,
 192–197
 ϕ verb features, 190–191
 long-distance agreement with expletive,
 187–190
 subject-verb agreement, 184–187,
 197–200
 auxiliary inversion operators, 213–221
 Bai language, 141
 Bailyn, J., 66
 Baker, M., 45, 181
 bare infinitive clauses, 232–233
 Basse, G., 250
