- Borel sets, 3
- Borel–Cantelli lemma, 7
- bounded convergence theorem, 337
- bounded input bounded output (bibo) stability, 250
- branching process, 139, 311
- Brownian motion, 110
- Cauchy
 - criteria for convergence, 51, 328
 - criteria for m.s. convergence in correlation form, 54
 - sequence, 52, 328
- central limit theorem, 58
- characteristic function
 - of a random variable, 20
 - of a random vector, 75
- Chebychev inequality, 20
- circular symmetry, 269
 - joint, 270
- completeness
 - of a probability space, 207
 - of the real numbers, 328
- conditional
 - expectation, 27, 80
 - mean, *see* conditional expectation, 27
 - pdf, 27
 - probability, 5
- conjugate prior, 147
- continuity
 - of a function, 330
 - of a function at a point, 330
 - of a random process, 208
 - of a random process at a point, 208
 - of probability, 3
 - piecewise m.s., 211
- convergence of sequences
 - almost sure, 40
 - deterministic, 326
 - in distribution, 46
 - in probability, 42
 - mean square, 42, 230
- convex function, 58
- convolution, 250
- correlation
 - coefficient, 27
 - cross correlation matrix, 73
 - function, 103
 - matrix, 74
- count times, 112
- countably infinite, 326
- counting process, 112
- covariance
 - cross covariance matrix, 74
 - function, 103, 271
 - matrix, 74
 - pseudo-covariance function, 271
 - pseudo-covariance matrix, 270
- Cramér’s theorem, 61
- cumulative distribution function (CDF), 8, 25, 104
- derivative
 - right-hand, 331
- differentiable, 331
 - at a point, 331
 - continuous and piecewise continuously, 332
 - continuously, 332
 - m.s. at a point, 212
 - m.s. continuous and piecewise continuously, 216
 - m.s. continuously, 212
 - m.s. sense, 212
- Dirichlet density, 147
- discrete-time random process, 103
- dominated convergence theorem, 338
- Doob decomposition, 312
- Doob martingale, 311
- drift vector, 186, 193

- energy spectral density, 253
- Erdős–Rényi random graph, 315
- Erlang B formula, 185
- Erlang C formula, 184
- expectation, 16
 - of a random vector, 73
- expectation-maximization (EM) algorithm, 148
- exponential distribution, 22

- failure rate function, 24
- Fatou’s lemma, 337
- filtration of σ -algebras, 310
- forward-backward algorithm, 156
- Foster–Lyapunov stability criterion, 186
- Fourier transform, 252
 - inversion formula, 252
 - Parseval’s identity, 252
- fundamental theorem of calculus, 334

- gambler’s ruin problem, 107
- gamma distribution, 23
- Gaussian
 - distribution, 22
 - joint pdf, 85
 - random vector, 85
- geometric distribution, 21

- implicit function theorem, 333
- impulse response function, 248
- independence
 - events, 5
 - pairwise, 5
- independent increment process, 108
- inequalities
 - Azuma–Hoeffding inequality, 313
 - Bennett’s inequality, 71, 109
 - Bernstein’s inequality, 71, 109
 - Chebyshev inequality, 20
 - Chernoff bound, 60
 - concentration, 316
 - Doob’s L^2 inequality, 109
 - Doob’s maximal inequality, 109
 - Foster–Lyapunov moment bound, 187
 - Jensen’s inequality, 59
 - Markov inequality, 20
 - McDiarmid’s inequality, 314
