- $\ell^2$ -independent 57
- $\mathcal{N}(A)$  39
- $\mathcal{R}(A)$  39
- affine transformation 140
- Berezin transform 79
- Bergman space 58
- best least squares approximant 42
- cocycle 141
- cocycle law 141
- complexification of an RKHS 65
- composition operator 71
- conditionally negative definite 129
- contractive containment of Hilbert spaces 67
- convex function 127
- De Branges spaces 67
- Dirichlet space 63
- evaluation functional 4
- feature map 117
- fully interpolating 41
- function of positive type 137
- Grammian 33
- Green's function 8
- Hardy space of the disk 58
- infinitely divisible kernel 134
- interpolation 37
- kernel function 24
- kernel method 116
- kernel trick 114
- kernelization 114
- least square error 42
- linear separation 118
- maximal margin hyperplane 120, 123
- Mercer's theorem 155
- multiplier of RKHS 77
- negative type 141
- nullspace of  $A$  38
- positive definite function on a group 137
- positive matrix 23
- prediction problem 117
- product of the kernels 75
- pull-back 71
- pull-back map 71
- range norm 147
- range of  $A$  39
- reconstruction problem 27
- representer theorem 117
- reproducing kernel 4
- reproducing kernel Hilbert space 3
