Preface *page* ix

1 Basic Equations 1

1.1 Introduction 1
1.2 Thermodynamics 1
1.3 Conservation Equations 3
1.4 Characteristic Equations 5
1.5 Acoustic Waves 9
1.6 Acoustic Radiation from a Spherical Expanding Piston 11
1.7 Waves of Finite Amplitude 14
1.8 The Piston Problem 16
1.9 Shock Waves 20
1.10 Detonation and Deflagration Waves 26

2 Weak Shock Theory 31

2.1 Introduction 31
2.2 Properties of Weak Shocks 32
2.3 Chandrasekhar's Solution 35
2.4 Oswatitsch's Solution 37
2.5 Friedrichs' Theory 41
2.6 Decay of a Piston Driven Shock 45
2.7 Whitham's Theory 48

3 Shock Propagation in a Non-uniform Cross-sectional Area Tube 56

3.1 Introduction 56
3.2 Chester's Theory 56
3.3 Chisnell's Theory 60
3.4 Whitham's Theory 64

4 Blast Wave Theory 67

4.1 Introduction 67
4.2 Basic Equations 68

Cambridge University Press
978-1-107-10630-7 — The Gas Dynamics of Explosions
John H. S. Lee
Table of Contents
More Information

4.3 The Energy Integral 70
4.4 Integrals of the Similarity Equations 75
4.5 Closed Form Solution for Blasts 78
4.6 Properties of the Constant Energy Solution 81
4.7 Variable Energy Blasts 83

5 Homentropic Explosions 87

5.1 Introduction 87
5.2 The Shock Tube Problem 88
5.3 Propagation of Chapman–Jouguet Detonations 91
5.4 Piston Driven Explosion 94

6 The Snow-Plow Approximation 102

6.1 Introduction 102
6.2 Basic Equations 102
6.3 Constant Energy Blast Waves 107
6.4 Explosion of a Finite Spherical Charge 113
6.5 Piston Driven Explosions 116

7 The Brinkley–Kirkwood Theory 121

7.1 Introduction 121
7.2 Basic Equations 122
7.3 The Energy Integral 124
7.4 The Fourth Equation 127
7.5 The Shock Decay Equation 128
7.6 The Asymptotic Weak Shock Regime 132
7.7 Explosion of a Pressurized Sphere 134

8 Non-similar Solutions for Finite Strength Blast Waves 136

8.1 Introduction 136
8.2 Basic Formulation 136
8.3 Perturbation Solution 139
8.4 Quasi-similar Solution 144
8.5 Integral Method 155

9 Implosions 164

9.1 Introduction 164
9.2 Implosions 164
9.3 Solution in the State Plane 167
9.4 Shock Propagation in a Non-uniform Density Medium 169
9.5 The Sharp Blow Problem 173

More Information

9.6 Exact Solution for $\gamma = 1.4$ 175
9.7 Determination of A 177
9.8 Converging Blast Waves 180

Bibliography 195
Index 199
