

INDEX

- adding machine, 289, 341
- affine map, 5
- affine transformation, 18, 19
- Alexander, Daniel, 228
- algebraic number, 301
- almost everywhere property, 101
- almost periodicity, 346
- alphabet, 342
- analytic function, 231, 387
- angle doubling map, 119, 139, 142, 329, 374
- angle tripling map, 142
- aperiodic sequence, 343
- asymptotically stable fixed point, 20, 21, 45, 90, 212, 232
- attracting fixed point, 17, 18, 21, 39, 90, 232
- attractor, 112

- Baire Category Theorem, 316, 348, 385
- Baire space, 385
- Baker's transformation, 223
- Banach Fixed Point theorem, 177
- Banach, Stefan, 177
- basin of attraction, 38, 235
- basin of attraction of ∞ , 239
- Bernoulli shift, 127, 328
- bifurcation, 41
- bifurcation diagram, 56, 151
- bifurcation theory, 38
- bijective substitution, 299
- billiard sequence, 366
- binary expansion of a real number, 102, 184
- Binet's formula, 309
- Birkhoff Multiple Recurrence Theorem, 382
- Birkhoff Transitivity Theorem, 121, 324, 380
- Birkhoff's Recurrence Theorem, 328
- Bisection Method, 99
- block code, 354
- Bolzano–Weierstrass Theorem, 384
- box counting dimension, 170
- Brouwer's Fixed Point Theorem, 183

- Cantor, George, 105
- Cantor set, 105, 108, 167, 169, 182, 193, 293, 338
- Cantor's middle thirds set, 105
- Cantor's ternary function, 111
- cardinality, 103
- cardinality of a set, 107
- Cauchy sequence, 174, 176, 385
- Cauchy's estimate, 388
- Cauchy's Theorem, 246
- Cayley, 33, 166
- Chacon substitution, 301, 333, 350
- chaotic map, 122, 246, 329
- characteristic equation of a matrix, 210
- Chebyshev polynomials, 137, 142
- class C^1 -function, 22, 95
- clopen set, 341
- closed ball, 82
- Closed Bounded Interval Theorem, 317, 383
- closed form solution, 4, 6, 214
- closed set, 82
- closure of a set, 83
- commutative substitution, 299
- compact metric space, 312, 337
- compact set, 107

- compactness, 311, 316, 336
- complement of a set, 82
- complete metric space, 175
- completeness of \mathbb{R} , 383
- complex arctangent function, 266
- complex dynamics, 228
- complex exponential function, 263
- complex logarithm, 264
- complex numbers, 228, 387
- complex sine and cosine, 264
- complexity function, 342, 355, 376
- computer graphics for the Mandelbrot set, 255
- conjugacy, 134, 154, 322
- conjugacy, properties, 136
- conjugacy an equivalence relation, 136
- conjugacy between T_2 and L_4 , 163
- conjugate maps, 134
- connected set, 94, 338
- continued fractions, 362
- continuity on \mathbb{C} , 230
- continuous function, 3, 316
- continuous function, properties, 94
- continuous map on metric spaces, 88
- contraction mapping, 176
- Contraction Mapping Theorem, 177, 318
- Coppel's Theorem, 195, 198
- correlation function of a sequence, 284
- countable set, 100, 101, 351
- cube free sequence, 344
- cube roots of unity, 259
- cutting sequence, 364
- cycle, 45
- 2-cycle, 43, 49, 54, 191
- 2^n -cycle, 205
- 2^n -cycles of the tent family, 161
- 3-cycle, 192
- 3-cycles of the logistic map, 56, 61
- 3-cycles of the tent map, 47
- cylinder set, 341

- De Moivre's Theorem, 229
- dense set, 84
- denumerable set, 101
- Devaney, R., 163, 234

- diagonal argument, 102
- diagonalization of a matrix, 211
- diffeomorphism, 94, 218
- difference equation, 3
- direct product substitution, 298
- disconnected set, 338
- discrete dynamical system, 2
- discrete metric, 80
- disjoint dynamical systems, 335
- doubling map, 118, 142
- dragon curve, 293
- Du, Bau-Sen, 195
- dyadic rationals, 187
- dynamical system, 3, 9, 336, 344
- dynamical systems arising from substitutions, 344

- eigenfunction of a continuous map, 325
- eigenspace, 210
- eigenvalue of a continuous map, 325
- eigenvalue of a linear map, 210
- eigenvector, 211
- empty word, 342
- escape criterion, 242
- even function, 51
- eventual fixed point, 12
- eventually periodic point, 45
- exactness, 328
- extended complex plane, 235
- extended real line, 93

- factor, 332
- factor map, 135, 322
- factor of a sequence, 342
- Fatou set, 240
- Fatou's theorem, 252
- Fatou, P., 166, 228
- Feigenbaum's number, 56
- Fibonacci sequence, 6, 9, 17, 271
- Fibonacci substitution, 275, 340, 350, 357, 374
- filled-in Julia set, 240, 242
- fixed point, 11, 14–16, 22, 35, 210
- fixed point at infinity, 235
- fixed point of a substitution, 277, 339
- fixed point theorem, 14, 182

- fixed points of linear fractional transformations, 238
- floor function, 360
- flow, dynamical system with continuously varying time, 2
- fractal, 106, 166, 218, 249
- fractal dimension, 169, 239
- fractal dust, 246
- fractal geometry, 166
- full shift, 345
- fundamental dichotomy, 251
- fundamental domain, 154
- Furstenberg, H., 334, 379

- globally attracting fixed point, 19, 24, 29, 41
- graph joinings, 334
- graphical iteration, 18
- Green–Tao Theorem, 379
- group rotation, 341

- Hénon, Maurice, 216
- Hénon attractor, 218
- Hénon map, 216
- Hénon map, properties, 219
- Halley’s method, 267
- Hausdorff metric, 179
- Heighway dragon, 293
- Heine–Borel Theorem, 103, 311
- homeomorphism, 92, 132, 134, 154, 341, 382
- Hutchinson’s Theorem, 178
- hyperbolic n -cycle, 48
- hyperbolic fixed point, 21, 212
- hyperbolic toral automorphisms, 224

- identity map, 126
- immediate basin of attraction, 38, 91
- incidence matrix, 309
- incidence matrix of a substitution, 300, 350, 352
- infimum, 383
- Intermediate Value Theorem, 14, 99, 317, 383
- invariant subset, 39, 44, 91
- involution, 137

- irrational rotation, 126, 321, 322, 355, 359, 369
- isolated fixed point, 36
- isolated point, 385
- isometry, 93, 126, 325
- iterated function system, 181

- Jacobian matrix, 217
- joinings, 334
- Jordan form of a matrix, 215
- Julia, Gaston, 151, 166, 234
- Julia set, 234, 239, 244, 250
- Julia set, properties, 248
- Julia set of a polynomial, 240

- Kakutani, S., 288
- Koch curve, 290
- Koch Snowflake, 167
- Kronecker product, 173

- Lagrange, Joseph, 33
- languages, 342
- languages and words, 342
- left special factor, 376
- Li–Yorke Theorem, 70, 116
- limit point, 82
- ω -limit set, 326
- linear conjugacy, 142
- linear conjugacy, properties, 145
- linear fractional transformation, 148, 237
- linear map, 4
- linear model, 4
- linear transformation, 209
- linearly conjugate maps, 143
- Liouville’s Theorem, 388
- logistic map, 6–8, 17, 22, 34, 40, 43, 44, 52, 54, 59, 62, 139, 150, 151, 155, 199

- Möbius transformation, 237
