

The background of the page features a dynamic, glowing blue light effect resembling a neural network or a complex data flow. Overlaid on this is a large, semi-transparent white circle. Inside this circle, the word "Index" is written in a bold, black, sans-serif font.

Index

additive law of probability, 58
adjusted R^2 , 561, 563
alternative hypothesis, 350
analysis of variance
 F statistic, 415
 partition of the total sum of squares, multiple regression, 535
 for simple linear regression, 526
 table for simple linear regression, 529
approximate pivotal quantity, 312
approximating maximum likelihood estimators, 289
asymptotic normality of the MLE, 646
autocorrelation, 50
autocorrelation plots, 50
autoregressive integrated moving average (ARIMA) models, 635

bar charts, 32, 33
Bayes' Theorem, 74, 575
Bayesian credible interval, 582
Bayesian methods in statistics, 574

Bayesian paradoxes, 585, 586
Benjamini–Hochberg method, 787
Bernoulli random variable, 85
Bernoulli trials, 132
beta distribution, 202
bias, 235, 237
binomial distribution, 132, 133
bivariate normal distribution, 186
blocking, 439, 443
Bonferroni's inequality, 780, 789
Boole's inequality, 780, 782
bootstrap, 656, 662
 confidence intervals, 667
box plots, 40, 42

categorical data, 9
 analysis, 459
causation and correlation, 21
centered moving average, 621
Central Limit Theorem, 255
chi-square distribution, 196
clinical trial, 231
cluster sampling, 236, 338
combination, 69
comparative box plots, 42
complement of an event, 56
complementary events, 60
conditional distributions, 111, 113,
 121

conditional expectation, 122
conditional probability, 62
conditioning on a random variable, 123
confidence interval, 303, 307, 312
 on the intercept, simple linear regression, 547
for differences of proportions, 317
for differences in means, 319
for mean response, simple linear regression, 522
for paired data, 324
on the slope, simple linear regression, 512
from survey data, 330
confounding, 231
conjugate priors, 588
consistent estimator, 278
constant time series process, 628
contingency table, 459
 testing homogeneity, 471
 testing independence, 465
continuity correction, 479
continuous data, 8
continuous random variable, 93
contrasts, 794
convenience sampling, 234
convergence in distribution, 257
