<i>Preface to this edition by</i> PAOLO MANCOSU	<i>page</i> vii
<i>Editors' preface</i>	ix
<i>Acknowledgments</i>	xii
Author's introduction	1
Chapter 1	6
1 A problem and a conjecture	6
2 A proof	7
3 Criticism of the proof by counterexamples which are local but not global	10
4 Criticism of the conjecture by global counterexamples	14
a. Rejection of the conjecture. The method of surrender	14
b. Rejection of the counterexample. The method of monster-barring	15
c. Improving the conjecture by exception-barring methods. Piecemeal exclusions. Strategic withdrawal or playing for safety	26
d. The method of monster-adjustment	32
e. Improving the conjecture by the method of lemma-incorporation. Proof-generated theorem versus naive conjecture	35
5 Criticism of the proof-analysis by counterexamples which are global but not local. The problem of rigour	45
a. Monster-barring in defence of the theorem	45
b. Hidden lemmas	46
c. The method of proof and refutations	50
d. Proof versus proof-analysis. The relativisation of the concepts of theorem and rigour in proof-analysis	53
6 Return to criticism of the proof by counterexamples which are local but not global. The problem of content	60
a. Increasing content by deeper proofs	60
b. Drive towards final proofs and corresponding sufficient and necessary conditions	67
c. Different proofs yield different theorems	69

7 The problem of content revisited	70
a. The naiveté of the naive conjecture	70
b. Induction as the basis of the method of proofs and refutations	72
c. Deductive guessing versus naive guessing	74
d. Increasing content by deductive guessing	81
e. Logical versus heuristic counterexamples	87
8 Concept-formation	89
a. Refutation by concept-stretching. A reappraisal of monster-barring – and of the concepts of error and refutation	89
b. Proof-generated versus naive concepts. Theoretical versus naive classification	93
c. Logical and heuristic refutations revisited	98
d. Theoretical versus naive concept-stretching. Continuous versus critical growth	99
e. The limits of the increase in content. Theoretical versus naive refutations	101
9 How criticism may turn mathematical truth into logical truth	105
a. Unlimited concept-stretching destroys meaning and truth	105
b. Mitigated concept-stretching may turn mathematical truth into logical truth	108
Chapter 2	112
Editors' introduction	112
1 Translation of the conjecture into the 'perfectly known' terms of vector algebra. The problem of translation	112
2 Another proof of the conjecture	123
3 Some doubts about the finality of the proof. Translation procedure and the essentialist versus the nominalist approach to definitions	126
<i>Appendix 1 Another case-study in the method of proofs and refutations</i>	135
1 Cauchy's defence of the 'principle of continuity'	135
2 Seidel's proof and the proof-generated concept of uniform convergence	139
3 Abel's exception-barring method	141
4 Obstacles in the way of the discovery of the method of proof-analysis	144
<i>Appendix 2 The deductivist versus the heuristic approach</i>	151
1 The deductivist approach	151
2 The heuristic approach. Proof-generated concepts	153
a. Uniform convergence	153
b. Bounded variation	155
c. The Carathéodory definition of measurable set	162
<i>Bibliography</i>	164
<i>Index of names</i>	175
<i>Index of subjects</i>	178
