| <i>Acknowledgments</i> | <i>page</i> ix |
| <i>Introduction</i> | xi |
| Chapter 1 The Orbit Theorem and Lie determined systems | 1 |
| 1.1 Vector fields and differential forms | 2 |
| 1.2 Flows and diffeomorphisms | 6 |
| 1.3 Families of vector fields: the Orbit theorem | 9 |
| 1.4 Distributions and Lie determined systems | 14 |
| Chapter 2 Control systems: accessibility and controllability | 19 |
| 2.1 Control systems and families of vector fields | 19 |
| 2.2 The Lie saturate | 25 |
| Chapter 3 Lie groups and homogeneous spaces | 29 |
| 3.1 The Lie algebra and the exponential map | 31 |
| 3.2 Lie subgroups | 34 |
| 3.3 Families of left-invariant vector fields and accessibility | 39 |
| 3.4 Homogeneous spaces | 41 |
| Chapter 4 Symplectic manifolds: Hamiltonian vector fields | 44 |
| 4.1 Symplectic vector spaces | 44 |
| 4.2 The cotangent bundle of a vector space | 47 |
| 4.3 Symplectic manifolds | 49 |
| Chapter 5 Poisson manifolds, Lie algebras, and coadjoint orbits | 55 |
| 5.1 Poisson manifolds and Poisson vector fields | 55 |
| 5.2 The cotangent bundle of a Lie group: coadjoint orbits | 57 |
| Chapter 6 Hamiltonians and optimality: the Maximum Principle | 64 |
| 6.1 Extremal trajectories | 65 |
| 6.2 Optimal control and the calculus of variations | 68 |

| | | |
|---|--|-----|
| 6.3 | The Maximum Principle | 71 |
| 6.4 | The Maximum Principle in the presence of symmetries | 81 |
| 6.5 | Abnormal extremals | 85 |
| 6.6 | The Maximum Principle and Weierstrass' excess function | 91 |
| Chapter 7 Hamiltonian view of classic geometry | | 96 |
| 7.1 | Hyperbolic geometry | 96 |
| 7.2 | Elliptic geometry | 101 |
| 7.3 | Sub-Riemannian view | 106 |
| 7.4 | Elastic curves | 113 |
| 7.5 | Complex overview and integration | 115 |
| Chapter 8 Symmetric spaces and sub-Riemannian problems | | 118 |
| 8.1 | Lie groups with an involutive automorphism | 118 |
| 8.2 | Symmetric Riemannian pairs | 120 |
| 8.3 | The sub-Riemannian problem | 131 |
| 8.4 | Sub-Riemannian and Riemannian geodesics | 135 |
| 8.5 | Jacobi curves and the curvature | 138 |
| 8.6 | Spaces of constant curvature | 142 |
| Chapter 9 Affine-quadratic problem | | 147 |
| 9.1 | Affine-quadratic Hamiltonians | 152 |
| 9.2 | Isospectral representations | 155 |
| 9.3 | Integrability | 159 |
| Chapter 10 Cotangent bundles of homogeneous spaces as coadjoint orbits | | 167 |
| 10.1 | Spheres, hyperboloids, Stiefel and Grassmannian manifolds | 168 |
| 10.2 | Canonical affine Hamiltonians on rank one orbits: Kepler and Newmann | 177 |
| 10.3 | Degenerate case and Kepler's problem | 179 |
| 10.4 | Mechanical problem of C. Newmann | 187 |
| 10.5 | The group of upper triangular matrices and Toda lattices | 192 |
| Chapter 11 Elliptic geodesic problem on the sphere | | 198 |
| 11.1 | Elliptic Hamiltonian on semi-direct rank one orbits | 199 |
| 11.2 | The Maximum Principle in ambient coordinates | 203 |
| 11.3 | Elliptic problem on the sphere and Jacobi's problem on the ellipsoid | 211 |
| 11.4 | Elliptic coordinates on the sphere | 213 |

| | |
|--|-----|
| Chapter 12 Rigid body and its generalizations | 220 |
| 12.1 The Euler top and geodesic problems on $SO_n(\mathbb{R})$ | 221 |
| 12.2 Tops in the presence of Newtonian potentials | 231 |
| Chapter 13 Isometry groups of space forms and affine systems: Kirchhoff's elastic problem | 238 |
| 13.1 Elastic curves and the pendulum | 241 |
| 13.2 Parallel and Serret–Frenet frames and elastic curves | 248 |
| 13.3 Serret–Frenet frames and the elastic problem | 251 |
| 13.4 Kirchhoff's elastic problem | 256 |
| Chapter 14 Kowalewski–Lyapunov criteria | 262 |
| 14.1 Complex quaternions and $SO_4(\mathbb{C})$ | 264 |
| 14.2 Complex Poisson structure and left-invariant Hamiltonians | 270 |
| 14.3 Affine Hamiltonians on $SO_4(\mathbb{C})$ and meromorphic solutions | 273 |
| 14.4 Kirchhoff–Lagrange equation and its solution | 287 |
| Chapter 15 Kirchhoff–Kowalewski equation | 296 |
| 15.1 Eulers' solutions and addition formulas of A. Weil | 304 |
| 15.2 The hyperelliptic curve | 310 |
| 15.3 Kowalewski gyrostat in two constant fields | 313 |
| Chapter 16 Elastic problems on symmetric spaces: the Delauney–Dubins problem | 326 |
| 16.1 The curvature problem | 326 |
| 16.2 Elastic problem revisited – Dubins–Delauney on space forms | 331 |
| 16.3 Curvature problem on symmetric spaces | 350 |
| 16.4 Elastic curves and the rolling sphere problem | 358 |
| Chapter 17 The non-linear Schroedinger's equation and Heisenberg's magnetic equation–solitons | 368 |
| 17.1 Horizontal Darboux curves | 369 |
| 17.2 Darboux curves and symplectic Fréchet manifolds | 376 |
| 17.3 Geometric invariants of curves and their Hamiltonian vector fields | 386 |
| 17.4 Affine Hamiltonians and solitons | 399 |
| <i>Concluding remarks</i> | 404 |
| <i>References</i> | 406 |
| <i>Index</i> | 413 |
