<i>Preface</i>	<i>page</i>	ix
1 Recurrence		1
1.1 Invariant measures		2
1.2 Poincaré recurrence theorem		4
1.3 Examples		10
1.4 Induction		23
1.5 Multiple recurrence theorems		29
2 Existence of invariant measures		35
2.1 Weak* topology		36
2.2 Proof of the existence theorem		45
2.3 Comments in functional analysis		49
2.4 Skew-products and natural extensions		53
2.5 Arithmetic progressions		58
3 Ergodic theorems		64
3.1 Ergodic theorem of von Neumann		65
3.2 Birkhoff ergodic theorem		70
3.3 Subadditive ergodic theorem		78
3.4 Discrete time and continuous time		87
4 Ergodicity		93
4.1 Ergodic systems		94
4.2 Examples		100
4.3 Properties of ergodic measures		116
4.4 Comments in conservative dynamics		120
5 Ergodic decomposition		142
5.1 Ergodic decomposition theorem		142
5.2 Rokhlin disintegration theorem		150

vi	<i>Contents</i>	
6	Unique ergodicity	157
6.1	Unique ergodicity	157
6.2	Minimality	159
6.3	Haar measure	162
6.4	Theorem of Weyl	173
7	Correlations	181
7.1	Mixing systems	182
7.2	Markov shifts	190
7.3	Interval exchanges	200
7.4	Decay of correlations	208
8	Equivalent systems	213
8.1	Ergodic equivalence	214
8.2	Spectral equivalence	216
8.3	Discrete spectrum	222
8.4	Lebesgue spectrum	225
8.5	Lebesgue spaces and ergodic isomorphism	233
9	Entropy	242
9.1	Definition of entropy	243
9.2	Theorem of Kolmogorov–Sinai	254
9.3	Local entropy	262
9.4	Examples	268
9.5	Entropy and equivalence	274
9.6	Entropy and ergodic decomposition	286
9.7	Jacobians and the Rokhlin formula	294
10	Variational principle	301
10.1	Topological entropy	302
10.2	Examples	313
10.3	Pressure	325
10.4	Variational principle	338
10.5	Equilibrium states	345
11	Expanding maps	352
11.1	Expanding maps on manifolds	353
11.2	Dynamics of expanding maps	362
11.3	Entropy and periodic points	374
12	Thermodynamic formalism	380
12.1	Theorem of Ruelle	381
12.2	Theorem of Livšic	399
12.3	Decay of correlations	402
12.4	Dimension of conformal repellers	417

<i>Contents</i>		vii
Appendix A	Topics in measure theory, topology and analysis	430
A.1	Measure spaces	430
A.2	Integration in measure spaces	443
A.3	Measures in metric spaces	453
A.4	Differentiable manifolds	460
A.5	$L^p(\mu)$ spaces	469
A.6	Hilbert spaces	473
A.7	Spectral theorems	477
	<i>Hints or solutions for selected exercises</i>	482
	<i>References</i>	504
	<i>Index of notation</i>	511
	<i>Index</i>	515
