  - $i$ -related vertices, 50
  - matrix of dual eigenvalues, 58
  - matrix of eigenvalues, 58
  - metric, 72
  - primitive, 50
  - $Q$ -polynomial, 75
  - symmetric, 50
- balanced vector, 26
- bilinear forms graph, 83
- block graph
  - for a  $2$ - $(n, m, 1)$  design, 91
  - for an orthogonal array, 96
- block partition, 252
- block-regular incidence structure, 25
- blocks of a design, 90
- Bose-Bush bound, 306
- Bose-Mesner algebra, 51
- boundary of a polytope, 130
- branching rule, 239
- canonical
  - cliques in Paley graph, 108
  - cliques in a point graph, 102
  - cliques in an orthogonal array graph, 97
  - cliques in a block graph, 92
  - cocliques, 191
  - intersecting vector spaces, 172
  - $t$ -intersecting sets, 2
  - $t$ -intersecting words, 193
- Cartesian product, 46
- cellular algebra, 69
- certificate, 138
- character of a representation, 220
- characteristic matrix of a partition, 28
- chromatic number, 41
- class function, 212
- classical parameters, 83
- clique, 24
- clique-coclique bound, 25, 64
- closed neighborhood of a set, 203
- co-lexicographic order, 13
- coclique, 24
  - in a neighborhood, 38
- coherent configuration, 69
- cometric, 75
- commutant, 51
- compatible matrices, 31, 62
- completely regular subset, 70
- conference graph, 106
- conjugacy class scheme, 52
- conjugate partition, 237
- constituent
  - of a character, 223
  - of a representation, 217
- convex subgraph, 158
- convolution, 211
- coordinate
  - function, 219
  - homomorphism, 201
- covering radius, 77
- cross intersecting words, 194
- cross coclique, 36
- cross independent set, 36

- cross intersecting, 17
- cyclic interval graph, 44
- $d$ -cube, 26
- degree, 77, 148
  - of a character, 220
  - of a set, 67
  - of an orbital, 255
- derangement, 133
- derangement graph, 133, 261
  - for a group, 269
- derived set, 195
- design
  - 2- $(n, m, 1)$  design, 90
  - affine plane, 94
  - parallel class, 94
  - replication number, 90
  - resolvable, 94
  - symmetric, 91
  - $t$ - $(n, k, \lambda)$  design, 93
  - Witt design, 94
- diagonal
  - map, 201
  - subgroup, 53, 213
- diametric theorem, 194
- dimension of a representation, 210
- direct product of graphs, 185
- distance
  - graph, 70
  - matrix, 70
  - partition, 70
  - partition relative to a set, 77
- distance-regular graph, 70
