

Social Interactions in Virtual Worlds

Within the rapidly growing arena of “virtual worlds,” such as Massively Multiplayer Online Games (MMOGs), individuals behave in particular ways, influence one another, and develop complex relationships. This setting can be a useful tool for modeling complex social systems, cognitive factors, and interactions between groups and within organizations. To study these worlds effectively requires a cross-disciplinary approach that integrates social science theories with big data analytics. This broad-based book offers a comprehensive and holistic perspective on the field. It brings together research findings from an international team of experts in computer science (artificial intelligence, game design, and social computing), psychology, and the social sciences to help researchers and practitioners better understand the fundamental processes underpinning social behavior in virtual worlds such as *World of Warcraft*, *Rift*, *EVE Online*, and *Travian*.

KIRAN LAKKARAJU is a senior member of the technical staff in the Sandia National Laboratories Cognitive Science and Applications group. His primary research interests lie in computational models of behavior change in society and exploring links between social and cognitive structures in problems of information dissemination and attitude change. His current work revolves around developing online social experiments through the Controlled, Large Online Social Experimentation (CLOSE) platform.

GITA SUKTHANKAR is Associate Professor and Charles N. Millican Faculty Fellow in the Department of Computer Science at the University of Central Florida (UCF), and an affiliate faculty member at UCF’s Institute for Simulation and Training. Her research focuses on multiagent systems and computational social models. She has received an Air Force Young Investigator award and a National Science Foundation CAREER award. She has served on the Defense Advanced Research Projects Agency (DARPA)’s Computer Science Study Panel and is currently a member of DARPA’s Information Science and Technology study group and of the board of directors of the International Foundation for Autonomous Agents and Multiagent Systems (IFAAMAS).

ROLF T. WIGAND is Professor, Emeritus College, Arizona State University and Maulden-Entergy Chair and Distinguished Professor Emeritus of Information Science and Business Information Systems at the University of Arkansas at Little Rock. He is the past director of the Syracuse University Graduate Program in Information Management and its Center for Digital Commerce. His research focuses on software standards development and collective action in the mortgage, automotive, and radio frequency identification industries; development of trust and leadership in virtual organizations; the analysis of social networks in disaster situations; and novel methods for analysis and tracking of collective action on social media.

Contents

<i>List of Contributors</i>	<i>page ix</i>
Introduction	1
PART I: INDIVIDUAL BEHAVIORS AND DYADIC RELATIONSHIPS	
1 VERUS: A Multidisciplinary International Behavioral Study of Virtual World Users	13
<i>John Murray, Thomas Chesney, and Robert Hoffmann</i>	
2 Understanding Aggressive and Nonaggressive Individual Behaviors in Massively Multiplayer Online Games	43
<i>Iftekhar Ahmed, Andrew Pilny, and Marshall Scott Poole</i>	
3 From Good Associates to True Friends: An Exploration of Friendship Practices in Massively Multiplayer Online Games	62
<i>Fanny Anne Ramirez</i>	
4 Couples Who Slay Together, Stay Together: Benefits, Challenges, and Relational Quality among Romantic Couples Who Game	80
<i>Sarah Evans, Elizabeth Craig, and Nicholas Taylor</i>	

PART II: GROUPS: NORMS, LEADERSHIP, AND VIRTUAL ORGANIZATIONS	
5	Virtual Team Communication Norms: Modeling the Mediating Effects of Relational Trust, Presence, and Identity on Conversational Interactivity, Openness, and Satisfaction 103 <i>John C. Sherblom, Lesley A. Withers, Lynnette G. Leonard, and Jeffrey S. Smith</i>
6	Toxic Allies and Caring Friends: Social Systems and Behavioral Norms in <i>League of Legends</i> and <i>Guild Wars 2</i> 130 <i>Maude Bonenfant, Laura Iseut Lafrance St-Martin, Félix Prégent, and Lucile Crémier</i>
7	Management (Im)Material: Negotiating Leadership in Virtual Worlds 162 <i>Nicholas Taylor, Suzanne de Castell, Jennifer Jenson, and Ryan Hurley</i>
8	Virtual Organization and Online Games 191 <i>Rolf T. Wigand</i>
9	Virtual Economic Experiments 218 <i>Thomas Chesney, Swee Hoon Chuah, Robert Hoffmann, Wendy Hui, and Jeremy Larner</i>
PART III: UNDERSTANDING CULTURE WITH GAMES	
10	A Simulated Utopia: The Social System of a Virtual Ancient Egypt 253 <i>William Sims Bainbridge</i>
11	Gaming in Multicultural Classrooms: The Potential of Collaborative Digital Games to Foster Intercultural Interaction 288 <i>Amanda Alencar and Teresa de la Hera Conde-Pumpido</i>
PART IV: TECHNIQUES FOR ANALYZING GAME DATA	
12	The Power of Social Features in Online Gaming 313 <i>Fernando Kuipers, Marcus Märtens, Ernst van der Hoeven, and Alexandru Iosup</i>
