

Index

- adapted, 9
- additive, 448
- admissible choices of signs, 447
- analytic RNP (ARNP), 127
- atom, 263
- atomic, 263
- AUMD, 255, 472
- Azuma's inequality, 500

- Banach lattices, 312, 317, 461
- best constants, 214, 216
- Bishop-Phelps, 63
- BMO, 263, 422
- Bochner measurable, 2
- boundedly complete, 437, 438
- Burkholder's inequalities, 151
- Burkholder-Davis-Gundy inequality, 20

- calibrated, 162, 169, 174
- Choquet, 67
- combinatorial cube, 505
- completely bounded, 539
- complex interpolation method, 304
- concentration of measure, 503
- conditional expectation, 1
- conditionally dyadic, 187
- conjugate function, 221
- Connes, 531
- cotype, 407

- Davis's decomposition, 175
- dentable, 47
- diamond graphs, 512
- Doob's maximal inequality, 19
- dyadic, 46, 161, 162, 169, 174, 184
- dyadic BMO, 293
- dyadic filtration, 12, 183
- dyadic number, 186

- exponential inequalities, 500
- extrapolation, 159
- extreme point, 63

- Fefferman's duality theorem, 263
- filtration, 12
- finitely representable (f.r.), 428
- Fourier type, 362

- generalized probability space, 524
- girth, 447
- Gundy's decomposition, 162, 541

- Haar functions, 14
- Hilbert transform, 218
- Hilbert transform on \mathbb{R} , 221
- θ -Hilbertian, 459
- Holmstedt formula, 358

- J -convex, 447
- J -functional, 352

- K -convex, 414
- K -functional, 332
- Kahane's inequalities, 154
- Khintchin inequalities, 153, 531, 532
- KMP, 63
- Krein-Milman, 63
- Kwapień's theorem, 407, 492

- Littlewood-Paley inequalities, 249

- Marcinkiewicz multiplier theorem, 250
- Markov type p , 519
- martingale transform, 151
- martingales, 9
- maximal inequality, 17
- monotone basic sequence, 387

- non-commutative L_p , 524
- non-commutative Burkholder, 533
- non-commutative Doob, 537
- non-commutative Khintchin, 531
- non-commutative martingale, 527
- non-commutative probability, 523
- non-commutative transform, 535

- operator spaces, 539

- p -convex Banach lattice, 461
- p -uniformly smooth, 403, 519
- Petermichl, 237
- PM-cotype, 468

- q -concave Banach lattice, 461, 471
- q -uniformly convex, 395
- q -uniformly PL-convex, 464
- quasi-reflexive, 482, 496

- Rademacher functions, 13
- Radon measure, 34
- Radon-Nikodým property, 42
- real interpolation method, 332
- regular filtration, 291
- reiteration theorem, 331, 357
- RNP, 42
- rooted tree, 15, 21, 507

- scalarly measurable, 31
- δ -separated tree, 46
- shrinking, 437, 483

- Stein's inequality, 195
- strong p -variation, 423
- submartingale, 9
- subsymmetric, 448
- super-reflexive, 508, 514
- symmetric group, 504

- tree, 15, 46, 47, 53, 426, 435, 442, 454, 507
- trees as metric spaces, 506
- twisted sum, 330
- type, 407

- ultrafilter, 472
- ultrapower, 473
- ultraproduct, 472, 473
- UMD, 159
- UMD operator, 257
- UMD₁, 175
- UMD _{p} , 159
- unconditional basic sequence, 448
- uniformly convex, 382
- uniformly non-square, 446
- uniformly PL-convex, 464
- uniformly PM-convex, 469
- uniformly smooth, 395

- vector measure, 42

- Walsh function, 13, 155, 254
- wavelets, 14
- weak* scalarly measurable, 62
