$F = ma$, xi, 4, 11, 50, 63

d'Alembert's principle, 50, 62, 67
  for free particle, 65
  for lever, 49
  for pendulum, 56
  for springulum, 55
degree of freedom, 45, 54
double pendulum, 196
elevator, 51
energy
  conservation, 11, 16
  for conservative forces, 12
  gravitational, 11
  kinetic, 15
  potential, 12
Feynman, R. P., 80
fictitious force, 92
force
  applied, 46, 50, 69
  centrifugal, 53, 65, 99, 109, 169
  conservative, 14
  of constraint, 5, 46, 89
  Coriolis, 53, 99
  electrostatic, 102
  fictitious, 66, 114
  friction, 13
  inertial, 53, 66
  Lorentz, 102
free particle, 63
Gamma Quadrant, 8
gauge function, 95, 141
generalized acceleration, 92
coordinate, 6
center of mass, 7, 85
collective, 53
parabolic, 80, 106, 130
relative, 85
spherical, 54
cyclotron frequency, 104

generalized coordinates, 53, 67
accelerating reference frame, 91
rotating platform, 96
generalized force, 28, 70
generalized momentum, 30, 84
conjugate, 84
conserved, 84, 88, 92
double pendulum, 197
free particle, 84
Lorentz force, 104
mass on a train car, 92
in matrix form, 88, 114
pendulum on a rolling cart, 88
rotating platform, 98
generalized velocity, 69
generating function, 139
harmonic oscillator, 142
type-1, 142, 149, 171
type-2, 143, 151, 157

Halley, E., 181
Hamilton, W., 133
Hamilton–Jacobi equation, 145
comet, 183
projectile, 178
separable, 147, 148
time-dependent, 151
two-dimensional harmonic oscillator, 147

Hamiltonian, 121
bead on a circular loop, 125
comet, 182
double pendulum, 198
harmonic oscillator, 135
in polar coordinates, 148
mass on a train car, 125
masses on springs, 192
projectile, 177
time dependence, 126, 173
time-dependent harmonic oscillator, 172

Hamilton’s equations, 123
in action–angle variables, 159
pendulum, 31
polar coordinates, 118
stationary coordinate system, 117
Hamilton’s principal function, 149
Hamilton’s principle, 77
harmonic oscillator
action–angle variables, 136, 160
canonical transformation, 138
Hamiltonian, 135
Lagrangian, 95

in rescaled coordinates, 135
time-dependent, 170
type-1 generating function, 142
type-2 generating function, 143
holonomic constraints, 47, 62, 75
Hoh, 54

inclined plane, 43
in-phase mode, 190
integrable, 134, 199

jerk, 17

kinetic energy, 15, 72
as function of momentum, 115
as function of velocity, 113
in matrix form, 113, 119
in polar coordinates, 64
in special relativity, 126

Lagrange, J.-L., 75
Lagrange multiplier, 58
Lagrange’s equation, 75
pendulum, 30
rotating platform, 99
springulum, 76

Lagrangian, 63, 75
ambiguity in, 94
bead on a circular loop, 124
center of mass and relative coordinates, 86
double pendulum, 197
for Lorentz force, 104
mass on a train car, 92
masses on springs, 188
masses on springs, in normal mode coordinates, 191
pendulum on a rolling cart, 87
rotating platform, 98
rotating platform, polar coordinates, 99
springulum, 76

Lanczos, C., 48
Legendre transformation, 121
Lennard-Jones potential, 164
lever, 48

mass on a rotating rigid rod, 110
mass on a train car, 91, 125
mass whirling at the end of a string, 111
mechanical advantage, 49, 59
Menard, P., xii
