

Contents

<i>Introduction</i>	<i>page ix</i>
1 From Complex Analysis to Riemann Surfaces	1
1.1 Differentiability	2
1.2 Integration	4
1.3 Cauchy's Integral Formula and Consequences	7
1.4 Inverse Functions	9
2 Introduction to Manifolds	14
2.1 General Definition of a Manifold	15
2.2 Basic Examples	17
2.3 Projective Spaces	19
2.4 Compact Surfaces	23
2.5 Manifolds as Level Sets	28
3 Riemann Surfaces	32
3.1 Examples of Riemann Surfaces	33
3.2 Compact Riemann Surfaces	37
4 Maps of Riemann Surfaces	47
4.1 Holomorphic Maps of Riemann Surfaces	47
4.2 Local Structure of Maps	50
4.3 Maps of Compact Riemann Surfaces	54
4.4 The Riemann–Hurwitz Formula	56
4.5 Examples of Maps of Compact Riemann Surfaces	59
5 Loops and Lifts	63
5.1 Homotopy	64
5.2 The Fundamental Group	67
5.3 Covering Spaces	75

vi	Contents	
6	Counting Maps	80
6.1	Hurwitz Numbers	81
6.2	Riemann's Existence Theorem	84
6.3	Hyperelliptic Covers	86
7	Counting Monodromy Representations	90
7.1	From Maps to Monodromy	91
7.2	From Monodromy to Maps	96
7.3	Monodromy Representations and Hurwitz Numbers	100
7.4	Examples and Computations	102
7.5	Degeneration Formulas	106
8	Representation Theory of S_d	111
8.1	The Group Ring and the Group Algebra	111
8.2	Representations	113
8.3	Characters	116
8.4	The Class Algebra	118
9	Hurwitz Numbers and $\mathcal{Z}(S_d)$	120
9.1	Genus 0	120
9.2	Genus and Commutators	122
9.3	Burnside Formula	124
10	The Hurwitz Potential	128
10.1	Generating Functions	128
10.2	Connected Hurwitz Numbers	133
10.3	Cut-and-Join	137
Appendix A	Hurwitz Theory in Positive Characteristic	143
A.1	Introduction	143
A.2	Algebraic Curves in Positive Characteristic	144
A.3	Smooth Algebraic Curves	145
A.4	The Genus and the Riemann–Hurwitz Formula	146
A.5	The Affine Line Is Not Simply Connected Over k	149
Appendix B	Tropical Hurwitz Numbers	151
B.1	Tropical Geometry: Where Does It Come From?	151
B.2	Axiomatic Tropical Geometry	152
B.3	Tropical Covers	153
B.4	Tropical Covers as Shadows – Movies of Monodromy Representations	156
B.5	Bending and Breaking	157

Contents vii

Appendix C	Hurwitz Spaces	161
C.1	Moduli Spaces	161
C.2	Hurwitz Spaces	163
C.3	Applications of Hurwitz Spaces	164
Appendix D	Does Physics Have Anything to Say About Hurwitz Numbers?	169
D.1	Physical Mathematics	169
D.2	Hurwitz Numbers and String Theory	171
	<i>Bibliography</i>	179
	<i>Index</i>	181
