Preface	<i>page</i> xiii
Notations and Conventions	xvii
1 Introduction	1
1.1 What Is Intersection Homology?	1
1.2 Simplicial vs. PL vs. Singular	9
1.3 A Note about Sheaves and Their Scarcity	10
1.4 GM vs. Non-GM Intersection Homology	11
1.5 Outline	13
2 Stratified Spaces	16
2.1 First Examples of Stratified Spaces	18
2.2 Filtered and Stratified Spaces	20
2.2.1 Filtered Spaces	20
2.2.2 Stratified Spaces	24
2.2.3 Depth	27
2.3 Locally Cone-like Spaces and CS Sets	28
2.4 Pseudomanifolds	34
2.5 PL Spaces and PL Pseudomanifolds	38
2.5.1 PL Spaces	39
2.5.2 Piecewise Linear and Simplicial Pseudomanifolds	42
2.6 Normal Pseudomanifolds	48
2.7 Pseudomanifolds with Boundaries	51
2.8 Other Species of Stratified Spaces	55
2.8.1 Whitney Stratified Spaces	55
2.8.2 Thom–Mather Spaces	56
2.8.3 Homotopically Stratified Spaces	58
2.9 Maps of Stratified Spaces	60
2.10 Advanced Topic: Intrinsic Filtrations	63
2.10.1 Intrinsic PL Filtrations	69

2.11	Advanced Topic: Products and Joins	74
2.11.1	Products of Intrinsic Filtrations	82
3	Intersection Homology	86
3.1	Perversities	86
3.1.1	GM Perversities	87
3.1.2	Dual Perversities	89
3.2	Simplicial Intersection Homology	90
3.2.1	First Examples	93
3.2.2	Some Remarks on the Definition	104
3.3	PL Intersection Homology	107
3.3.1	PL Homology	108
3.3.2	A Useful Alternative Characterization of PL Chains	115
3.3.3	PL Intersection Homology	120
3.3.4	The Relation between Simplicial and PL Intersection Homology	121
3.4	Singular Intersection Homology	128
4	Basic Properties of Singular and PL Intersection Homology	135
4.1	Stratified Maps, Homotopies, and Homotopy equivalences	136
4.2	The Cone Formula	143
4.3	Relative Intersection Homology	146
4.3.1	Further Commentary on Subspace Filtrations	150
4.3.2	Stratified Maps Revisited	153
4.3.3	Reduced Intersection Homology and the Relative Cone Formula	154
4.4	Mayer–Vietoris Sequences and Excision	157
4.4.1	PL Excision and Mayer–Vietoris	158
4.4.2	Singular Subdivision, Excision, and Mayer–Vietoris	163
5	Mayer–Vietoris Arguments and Further Properties of Intersection Homology	187
5.1	Mayer–Vietoris Arguments	188
5.1.1	First Applications: High Perversities and Normalization	194
5.2	Cross Products and the Künneth Theorem with a Manifold Factor	198
5.2.1	The Singular Chain Cross Product	199
5.2.2	The PL Cross Product	204
5.2.3	Properties of the Cross Product	209
5.2.4	Künneth Theorem when One Factor Is a Manifold	216
5.3	Intersection Homology with Coefficients and Universal Coefficient Theorems	220
5.3.1	Definitions of Intersection Homology with Coefficients	220
5.3.2	Universal Coefficient Theorems	226

Contents

ix

	5.4	Equivalence of PL and Singular Intersection Homology on PL CS Sets	234
	5.4.1	Barycentric Subdivisions and Maps from PL Chains to Singular Chains	235
	5.4.2	The Isomorphism of PL and Singular Intersection Homology	237
	5.5	Topological Invariance	241
	5.5.1	Which Perversities Work?	242
	5.5.2	The Statement of the Theorem and Some Corollaries	244
	5.5.3	Proof of Topological Invariance	249
	5.6	Finite Generation	257
6		Non-GM Intersection Homology	262
	6.1	Motivation for Non-GM Intersection Homology	262
	6.2	Definitions of Non-GM Intersection Homology	266
	6.2.1	First Definition of IH_*	266
	6.2.2	Second Definition of IH_*	269
	6.2.3	Third Definition of IH_*	271
	6.2.4	Non-GM Intersection Homology below the Top Perversity	273
	6.2.5	A New Cone Formula	274
	6.2.6	Relative Non-GM Intersection Homology and the Relative Cone Formula	275
	6.3	Properties of $\mathbb{P}H_*(\mathbf{X}; \mathbf{G})$	276
	6.3.1	Basic Properties	277
	6.3.2	Dimensional Homogeneity	291
	6.3.3	Local coefficients	299
	6.4	A General Künneth Theorem	302
	6.4.1	A Key Example: the Product of Cones	303
	6.4.2	The Künneth Theorem	313
	6.4.3	A Relative Künneth Theorem	319
	6.4.4	Applications of the Künneth Theorem	321
	6.4.5	Some Technical Stuff: the Proof of Lemma 6.4.2	325
	6.5	Advanced Topic: Chain Splitting	337
7		Intersection Cohomology and Products	353
	7.1	Intersection Cohomology	355
	7.2	Cup, Cap, and Cross Products	363
	7.2.1	Philosophy	363
	7.2.2	Intersection Homology Cup, Cap, and Cross Products	369
	7.3	Properties of Cup, Cap, and Cross Products.	379
	7.3.1	Naturality	381
	7.3.2	Commutativity	392
	7.3.3	Unitality and Evaluation	395
	7.3.4	Associativity	404

	7.3.5	Stability	414
	7.3.6	Criss-Crosses	432
	7.3.7	Locality	452
	7.3.8	The Cohomology Künneth Theorem	461
	7.3.9	Summary of Properties	465
	7.3.10	Products on ∂ -pseudomanifolds	473
	7.4	Intersection Cohomology with Compact Supports	480
8		Poincaré Duality	498
	8.1	Orientations and Fundamental Classes	498
	8.1.1	Orientation and Fundamental Classes of Manifolds	499
	8.1.2	Orientation of CS Sets	501
	8.1.3	Homological Properties of Orientable Pseudomanifolds	505
	8.1.4	Lack of Global Fundamental Classes for Subzero Perversities	521
	8.1.5	Invariance of Fundamental Classes	523
	8.1.6	Intersection Homology Factors the Cap Product	530
	8.1.7	Product Spaces	535
	8.2	Poincaré Duality	536
	8.2.1	The Duality Map	536
	8.2.2	The Poincaré Duality Theorem	540
	8.2.3	Duality of Torsion-Free Conditions	546
	8.2.4	Topological Invariance of Poincaré Duality	547
	8.3	Lefschetz Duality	549
	8.3.1	Orientations and Fundamental Classes	549
	8.3.2	Lefschetz Duality	558
	8.4	The Cup Product and Torsion Pairings	568
	8.4.1	Some Algebra	568
	8.4.2	The Cup Product Pairing	571
	8.4.3	The Torsion Pairing	574
	8.4.4	Topological Invariance of Pairings	587
	8.4.5	Image Pairings	590
	8.5	The Goresky–MacPherson Intersection Pairing	596
	8.5.1	The Intersection Pairing on Manifolds	596
	8.5.2	The Intersection Pairing on PL Pseudomanifolds	604
	8.5.3	An Intersection Pairing on Topological Pseudomanifolds and Some Relations of Goresky and MacPherson	609
9		Witt Spaces and IP Spaces	613
	9.1	Witt and IP Spaces	614
	9.1.1	Witt Spaces	614
	9.1.2	IP Spaces	621
	9.1.3	Products and Stratification Independence	623

<i>Contents</i>		xi
9.2	Self-Pairings	629
9.3	Witt Signatures	632
	9.3.1 Definitions and Basic Properties	632
	9.3.2 Properties of Witt Signatures	638
	9.3.3 Novikov Additivity	643
	9.3.4 Perverse Signatures	647
9.4	<i>L</i> -Classes	648
	9.4.1 Outline of the Construction of <i>L</i> -Classes (without Proofs)	650
	9.4.2 Maps to Spheres and Embedded Subspaces	660
	9.4.3 Cohomotopy	666
	9.4.4 The <i>L</i> -Classes	669
	9.4.5 <i>L</i> -Classes in Small Degrees	673
	9.4.6 Characterizing the <i>L</i> -Classes	681
9.5	A Survey of Pseudomanifold Bordism Theories	689
	9.5.1 Bordism	689
	9.5.2 Pseudomanifold Bordism	691
10	Suggestions for Further Reading	703
	10.1 Background, Foundations, and Next Texts	703
	10.1.1 Deeper Background	705
	10.2 Bordism	706
	10.3 Characteristic Classes	707
	10.4 Intersection Spaces	708
	10.5 Analytic Approaches to Intersection Cohomology	708
	10.5.1 L^2 -Cohomology	708
	10.5.2 Perverse Forms	709
	10.6 Stratified Morse Theory	710
	10.7 Perverse Sheaves and the Decomposition Theorem	710
	10.8 Hodge Theory	711
	10.9 Miscellaneous	712
	Appendix A Algebra	713
	A.1 Koszul Sign Conventions	713
	A.1.1 Why Sign?	713
	A.1.2 Homological versus Cohomological Grading	714
	A.1.3 The Chain Complex of Maps of Chain Complexes	715
	A.1.4 Chain Maps and Chain Homotopies	716
	A.1.5 Consequences	717
	A.2 Some More Facts about Chain Homotopies	720
	A.3 Shifts and Mapping Cones	723
	A.3.1 Shifts	723
	A.3.2 Algebraic Mapping Cones	723

A.4	Projective Modules and Dedekind Domains	724
A.4.1	Projective Modules	724
A.4.2	Dedekind Domains	727
A.5	Linear Algebra of Signatures	729
A.5.1	Signatures of Nonsingular Pairings	733
A.5.2	Signatures of Orthogonal Sums	735
A.5.3	Antisymmetric Pairings	736
Appendix B	An Introduction to Simplicial and PL Topology	739
B.1	Simplicial Complexes and Euclidean Polyhedra	739
B.1.1	Simplicial Complexes	740
B.1.2	Euclidean Polyhedra	742
B.2	PL Spaces and PL Maps	744
B.3	Comparing Our Two Notions of PL Spaces	750
B.4	PL Subspaces	754
B.5	Cones, Joins, and Products of PL Spaces	755
B.6	The Eilenberg–Zilber Shuffle Triangulation of Products	756
B.6.1	The Definition of the Eilenberg–Zilber Triangulation	757
B.6.2	Realization of Partially Ordered Sets	758
B.6.3	Products of Partially Ordered Sets and Their Product Triangulations	760
B.6.4	Triangulations of Products of Simplicial Complexes and PL Spaces	763
B.6.5	The Simplicial Cross Product	765
	References	769
	Glossary of Symbols	781
	Index	787
