<i>List of Contributors</i>	page vii
<i>Preface</i>	xi
<b>1 Probabilizing Fibonacci Numbers</b>	1
Persi Diaconis	
<b>2 On the Number of ON Cells in Cellular Automata</b>	13
N. J. A. Sloane	
<b>3 Search for Ultraflat Polynomials with Plus and Minus One Coefficients</b>	39
Andrew Odlyzko	
<b>4 Generalized Gončarov Polynomials</b>	56
Rudolph Lorentz, Salvatore Tringali, and Catherine H. Yan	
<b>5 The Digraph Drop Polynomial</b>	86
Fan Chung and Ron Graham	
<b>6 Unramified Graph Covers of Finite Degree</b>	104
Hau-Wen Huang and Wen-Ching Winnie Li	
<b>7 The First Function and Its Iterates</b>	125
Carl Pomerance	
<b>8 Erdős, Klarner, and the <math>3x + 1</math> Problem</b>	139
Jeffrey C. Lagarias	
<b>9 A Short Proof for an Extension of the Erdős–Ko–Rado Theorem</b>	169
Peter Frankl and Andrey Kupavskii	

<b>10</b>	<b>The Haight–Ruzsa Method for Sets with More Differences than Multiple Sums</b>	173
	Melvyn B. Nathanson	
<b>11</b>	<b>Dimension and Cut Vertices: An Application of Ramsey Theory</b>	187
	William T. Trotter, Bartosz Walczak, and Ruidong Wang	
<b>12</b>	<b>Recent Results on Partition Regularity of Infinite Matrices</b>	200
	Neil Hindman	
<b>13</b>	<b>Some Remarks on <math>\pi_{\Delta}</math></b>	214
	Christian Reiher, Vojtěch Rödl, and Mathias Schacht	
<b>14</b>	<b>Ramsey Classes with Closure Operations (Selected Combinatorial Applications)</b>	240
	Jan Hubička and Jaroslav Nešetřil	
<b>15</b>	<b>Borsuk and Ramsey Type Questions in Euclidean Space</b>	259
	Peter Frankl, János Pach, Christian Reiher, and Vojtěch Rödl	
<b>16</b>	<b>Pick’s Theorem and Sums of Lattice Points</b>	278
	Karl Levy and Melvyn B. Nathanson	
<b>17</b>	<b>Apollonian Ring Packings</b>	283
	Adrian Bolt, Steve Butler, and Espen Hovland	
<b>18</b>	<b>Juggling and Card Shuffling Meet Mathematical Fonts</b>	297
	Erik D. Demaine and Martin L. Demaine	
<b>19</b>	<b>Randomly Juggling Backwards</b>	305
	Allen Knutson	
<b>20</b>	<b>Explicit Error Bounds for Lattice Edgeworth Expansions</b>	321
	Joe P. Buhler, Anthony C. Gamst, Ron Graham, and Alfred W. Hales
