1	Introduction	<i>page 1</i>
	PART ONE CONSISTENCIES	5
2	Strong Markov Consistency of Multivariate Markov Families and Processes	7
2.1	Definition of Strong Markov Consistency and an Introduction to its Properties	7
2.1.1	Strong Markov Consistency of Multivariate Markov Families	8
2.1.2	Strong Markov Consistency of Multivariate Markov Processes	13
2.2	Sufficient Conditions for Strong Markov Consistency	15
2.2.1	Sufficient Conditions for Strong Markov Consistency of \mathbb{R}^n -Feller–Markov Evolution Families	15
2.2.2	Strong Markov Consistency of Feller–Markov Families	20
3	Consistency of Finite Multivariate Markov Chains	38
3.1	Definition and Characterization of Strong Markov Consistency	39
3.1.1	Necessary and Sufficient Conditions for Strong Markov Consistency	39
3.1.2	Operator Interpretation of Condition (M)	41
3.2	Definition and Characterization of Weak Markov Consistency	43
3.2.1	Necessary and Sufficient Conditions for Weak Markov Consistency	44
3.2.2	Operator Interpretation of Necessary Conditions for Weak Markov Consistency	45
3.3	When does Weak Markov Consistency Imply Strong Markov Consistency?	47

4	Consistency of Finite Multivariate Conditional Markov Chains	49
4.1	Strong Markov Consistency of Conditional Markov Chains	49
4.1.1	Necessary and Sufficient Conditions for Strong Markov Consistency of a Multivariate $(\mathbb{F}, \mathbb{F}^X)$ -CDMC	51
4.1.2	Algebraic Conditions for Strong Markov Consistency	54
4.2	Weak Markovian Consistency of Conditional Markov Chains	58
4.2.1	Necessary and Sufficient Conditions for Weak Markov Consistency of a Multivariate $(\mathbb{F}, \mathbb{F}^X)$ -CDMC	59
4.2.2	When Does Weak Markov Consistency Imply Strong Markov Consistency?	65
5	Consistency of Multivariate Special Semimartingales	67
5.1	Semimartingale Consistency and Semi-Strong Semimartingale Consistency	67
5.1.1	Computation of the \mathbb{F}^j -Characteristics of X^j	68
5.2	Strong Semimartingale Consistency	71
5.2.1	Examples of Strongly Semimartingale-Consistent Multivariate Special Semimartingales	72
5.2.2	Examples of Multivariate Special Semimartingales That Are Not Strongly Semimartingale Consistent	74
	PART TWO STRUCTURES	77
6	Strong Markov Family Structures	79
6.1	Strong Markov Structures for Nice Feller–Markov Families and Nice Feller–Markov Processes	79
6.2	Building Strong Markov Structures	81
6.3	Examples	84
7	Markov Chain Structures	97
7.1	Strong Markov Chain Structures for Finite Markov Chains	98
7.2	Weak Markov Chain Structures for Finite Markov Chains	99
7.3	Examples	101
8	Conditional Markov Chain Structures	108
8.1	Strong CMC Structures	108
8.2	Weak CMC Structures	112
9	Special Semimartingale Structures	117
9.1	Semimartingale Structures: Definition	117
9.2	Semimartingale Structures: Examples	118

<i>Contents</i>		vii
PART THREE FURTHER DEVELOPMENTS		121
10	Archimedean Survival Processes, Markov Consistency, ASP Structures	123
10.1	Archimedean Survival Processes and ASP Structures	123
10.1.1	Preliminaries	123
10.1.2	Archimedean Survival Processes	125
10.1.3	ASP Structures	126
10.2	Weak and Strong Markov Consistency for ASPs	126
11	Generalized Multivariate Hawkes Processes	128
11.1	Generalized \mathbb{G} -Hawkes Process	128
11.2	Generalized Multivariate Hawkes Processes	131
11.2.1	Definition of a Generalized Multivariate Hawkes Process	131
11.2.2	Existence of Generalized Multivariate Hawkes Process: The Canonical Probability Space Approach	138
11.2.3	Examples	140
11.2.4	Construction of a Generalized Multivariate Hawkes Process via Poisson Thinning	154
11.3	Markovian Aspects of a Generalized Multivariate Hawkes Process	160
11.4	Hawkes Structures	164
11.5	Hawkes Consistency of Generalized Multivariate Hawkes Processes	168
PART FOUR APPLICATIONS OF STOCHASTIC STRUCTURES		179
12	Applications of Stochastic Structures	181
12.1	Markov and Conditionally Markov Structures	181
12.1.1	Portfolio Credit Risk Valuation and the Hedging and Valuation of Step-Up Bonds	181
12.1.2	Counterparty Risk Valuation and Hedging	182
12.1.3	Premium Evaluation for Unemployment Insurance Products	182
12.1.4	Multiple Ion Channels	183
12.1.5	Dynamic Risk Management in Central Clearing Parties	184
12.2	Special Semimartingale Structures	184
12.2.1	Poisson Structure and Ruin Probabilities	184
12.3	Archimedean Survival Process (ASP) Structures	186
12.3.1	Decision Functionals	186
12.3.2	Explicit Formulae for Decision Functionals for ASPs	186
12.3.3	Application of ASP Structures in Maintenance Management	187

12.4	Hawkes Structures	188
12.4.1	Seismology	188
12.4.2	Criminology and Terrorism	191
12.4.3	Neurology, Neuroscience, and DNA Sequencing	191
12.4.4	Finance	193
APPENDICES		195
<i>Appendix A</i>	Stochastic Analysis: Selected Concepts and Results Used in this Book	197
<i>Appendix B</i>	Markov Processes and Markov Families	209
<i>Appendix C</i>	Finite Markov Chains: Auxiliary Technical Framework	218
<i>Appendix D</i>	Crash Course on Conditional Markov Chains and on Doubly Stochastic Markov Chains	222
<i>Appendix E</i>	Evolution Systems and Semigroups of Linear Operators	246
<i>Appendix F</i>	Martingale Problem: Some New Results Needed in this Book	250
<i>Appendix G</i>	Function Spaces and Pseudo-Differential Operators	255
	<i>References</i>	259
	<i>Notation Index</i>	264
	<i>Subject Index</i>	266
