

THE CAMBRIDGE ECONOMIC HISTORY OF
THE MODERN WORLD

The second volume of *The Cambridge Economic History of the Modern World* explores the development of modern economic growth from 1870 to the present. Leading experts in economic history offer a series of regional studies from around the world, as well as thematic analyses of key factors governing the differential outcomes in different parts of the global economy. Topics covered include human capital, capital and technology, geography and institutions, living standards and inequality, trade and immigration, international finance, and warfare and empire.

STEPHEN BROADBERRY is Professor of Economic History at the University of Oxford and a Fellow of the British Academy. He has been Managing Editor of the *Economic History Review* and also the *European Review of Economic History*, and President of the Economic History Society and the European Historical Economics Society.

KYOJI FUKAO is President of the Institute of Developing Economies, Japan External Trade Organization (IDE-JETRO) and Specially Appointed Professor at the Institute of Economic Research, Hitotsubashi University. He has been President of the Asian Historical Economics Society and has published widely on Japanese and global economic history.

THE CAMBRIDGE ECONOMIC HISTORY OF
THE MODERN WORLD

The Cambridge Economic History of the Modern World offers an unprecedented global account of the emergence of modern economic growth and its spread across the world since 1700. Each volume provides a series of regional studies from across the globe, as well as thematic analyses of key factors governing differential outcomes in different parts of the global economy. Written by leading experts in economic history and covering topics such as demography and human development, capital and technology, living standards and inequality, geography and institutions, trade and migration, international finance, and warfare and empire, these volumes offer the most authoritative account to date of modern economic growth.
