- BD* algebra, 106, **287**
BD operad, **287**
 $C^*(\mathfrak{g})$, 295
 $C_*(\mathfrak{g})$, 294
 E_n algebra, 14, 135, 221, 250
 as locally constant factorization algebra, 221
 E_n -monoidal category, 254
 P_0 algebra, 106, **287**
 P_0 operad, **287**
R-matrix, 256
 BVS, 310
 CVS, 310
 DVS, 310
 self-enrichment of, 337
 Δ , 275
 \mathcal{E} , 68, **314**
 \mathcal{E}_c , 68, **314**
 LCTVS, 310
 SDisj, 49
 $\beta\gamma$ system, 171
 factorization homology of, 248
 $\overline{\mathcal{E}}$, 68, **316**
 $\overline{\mathcal{E}}_c$, 68, **316**
 \mathcal{D} , **316**
 C^∞ -module, 62, 312
 distributional sections of a vector bundle, 316
 distributions, 315
 holomorphic sections of a holomorphic vector bundle, 317
 smooth sections of a vector bundle, 314
 from a topological vector space, 326
 Disj, 47
 Disj^G , *see also* prefactorization algebra, equivariant
 Mfld, 62, **311**
 PDiscs, 150
 $\widetilde{\text{Disj}}^G$, *see also* prefactorization algebra, equivariant
 Čech complex, 212, 299
 Discs $_n$, 135

 action functional, 24, 41
 as differential on observables, 97
 algebra of functions on sections of a vector bundle, 349
 associative algebra
 in quantum mechanics, 6
 Atiyah–Bott lemma, 95, 374

 Batalin–Vilkovisky formalism, 23, 106, 287
 bornological vector space, **329**
 bornology, 328
 braided monoidal category, 249
 BV formalism, *see* Batalin–Vilkovisky formalism

 canonical quantization, *see* quantization, canonical
 central extension, *see* local Lie algebra
 Chern–Simons theory, *see* field theory, Abelian Chern–Simons
 chiral algebra, 11
 chiral conformal field theory, *see* field theory, chiral conformal
 chiral homology, 11
