# The Sorites Paradox

For centuries, the Sorites Paradox has spurred philosophers to think and argue about the problem of vagueness. This volume offers a guide to the paradox. It is both an accessible survey and an exposition of the state of the art, with a chapter-by-chapter presentation of all the main solutions to the paradox and all its main areas of influence. Each chapter offers a gentle introduction to its topic, gradually building up to a final discussion of some open problems. Students will find a comprehensive guide to the fundamentals of the paradox, together with lucid explanations of the challenges it continues to raise. Researchers will find exciting new ideas and debates on the paradox.

**Sergi Oms** is Lecturer at the Department of Philosophy, University of Barcelona. He has published in a number of journals, including *Disputatio, Notre Dame Journal of Formal Logic* and *Synthese*.

**Elia Zardini** is FCT Research Fellow at the Centre of Philosophy, University of Lisbon, as well as Chief Researcher at the International Laboratory for Logic, Linguistics and Formal Philosophy, National Research University Higher School of Economics. He has published in a number of journals, including *The Journal of Philosophy* and *The Review of Symbolic Logic*, and he is co-editor of *Scepticism and Perceptual Justification* (2014).

## Classic Philosophical Arguments

Over the centuries, a number of individual arguments have formed a crucial part of philosophical enquiry. The volumes in this series examine these arguments, looking at the ramifications and applications which they have come to have, the challenges which they have encountered, and the ways in which they have stood the test of time.

**Titles in the series**

The Prisoner's Dilemma
Edited by Martin Peterson

The Original Position
Edited by Timothy Hinton

The Brain in a Vat
Edited by Sanford C. Goldberg

Pascal's Wager
Edited by Paul Bartha and Lawrence Pasternack

Ontological Arguments
Edited by Graham Oppy

Newcomb's Problem
Edited by Arif Ahmed

The Gettier Problem
Edited by Stephen Hetherington

The Naturalistic Fallacy
Edited by Neil Sinclair

The Sorites Paradox
Edited by Sergi Oms and Elia Zardini

# Acknowledgements

We took the decision to co-edit this book in 2014 on the strength of a *camaiot* in the Raval; we celebrated the completion of the book in 2018 with a *camaiot* in the Raval. These unchanging features aside, editing the book has been a long adventure, variously and generously supported by funds from the Marie Skłodowska-Curie Intra-European Research Fellowship 301493, the FCT Research Fellowship IF/01202/2013, the Russian Academic Excellence Project 5-100, the Spanish Ministry of Economy and Competition Project FFI2012-35026, the Spanish Ministry of Economy, Industry and Competitiveness Project FFI2015-70707-P and the FCT Project PTDC/FER-FIL/28442/2017.

Throughout the adventure, we received the essential help of many fellow travellers. At Cambridge University Press, thanks to Hilary Gaskin for presenting us with the challenge of creating a companion to the Sorites Paradox, as well as for her solid guidance, advice and patience throughout the process; thanks also to an anonymous referee for perceptive feedback at different stages, which has helped to improve the overall quality of the book, and to Marianne Nield and Sophie Taylor for taking care of many details. Heaps of thanks to all the other authors for enthusiastically coming on board and for delivering very fine chapters (with astonishing timeliness!): our philosophical dialogue with each of them has been for us a great intellectual experience. Heartfelt thanks to our families: Cristina, Guillem, Alícia, Laura and Miguel – there's no sharp boundary to their ability to bear with us (and they did bear with us). We suspect no revision of classical logic is needed in this case. Finally, Elia thanks Sergi, without whose work on the book his own work would have been impossible; and Sergi thanks Elia, without whose work on the book his own work would have been impossible.
