| <i>Why this book?</i> | xvii |
| 1 Introduction | 1 |
| 1.1 Why is the barn owl so interesting? | 2 |
| 1.2 Why study barn owls instead of laboratory mice? | 6 |
| 1.3 The raw data | 8 |
| 1.4 Evolution of the Tytonidae | 10 |
| 1.5 Why cosmopolitan? | 18 |
| 1.6 Why do barn owls live so close to humans? | 23 |
| 2 Conservation | 27 |
| 2.1 Why protect barn owls? | 28 |
| 2.2 Ethics | 32 |
| 2.3 Decreases in barn owl populations | 36 |
| 2.4 Pollution | 39 |
| 2.5 What can we do to protect barn owls? | 44 |
| 3 Parasites and predators | 53 |
| 3.1 Endoparasites | 54 |
| 3.2 Ectoparasites | 58 |
| 3.3 Predators and anti-predator behaviour | 62 |
| 4 Physiology in an ecological context | 65 |
| 4.1 Hearing capacity | 66 |
| 4.2 Visual capacity | 68 |
| 4.3 Daily food requirements | 71 |
| 4.4 Pellet production | 74 |
| 4.5 Capacity to withstand cold weather | 76 |
| 5 Morphology in an ecological context | 81 |
| 5.1 Body size | 82 |
| 5.2 Reversed sexual size dimorphism | 88 |
| 6 Daily life: hunting, feeding and sleeping | 91 |
| 6.1 A nocturnal hunter | 92 |
| 6.2 Roosting | 95 |
| 6.3 Home range | 100 |
| 6.4 Flight mechanics | 106 |

viii CONTENTS

| | | |
|-----------|---|------------|
| 6.5 | Hunting methods | 112 |
| 6.6 | Prey selection | 116 |
| 6.7 | Diet | 118 |
| 7 | Sexual behaviour | 127 |
| 7.1 | Courtship and copulation | 128 |
| 7.2 | Mating system | 132 |
| 7.3 | Fidelity and divorce | 138 |
| 8 | Reproduction | 143 |
| 8.1 | Nest sites | 144 |
| 8.2 | Interspecific competition over nest sites | 150 |
| 8.3 | Reproductive season | 152 |
| 8.4 | Egg formation | 155 |
| 8.5 | Clutch size | 158 |
| 8.6 | Incubation | 161 |
| 8.7 | Hatching | 163 |
| 8.8 | Brood size | 167 |
| 8.9 | Nestling growth | 173 |
| 8.10 | Second and third annual broods | 176 |
| 8.11 | Offspring desertion | 179 |
| 9 | Parental care | 183 |
| 9.1 | Parental foraging | 184 |
| 9.2 | Parental behaviour at the nest | 188 |
| 9.3 | Adult body mass | 191 |
| 9.4 | Food stores | 194 |
| 9.5 | Adoption | 197 |
| 10 | Sibling interactions | 199 |
| 10.1 | Timing of nestling activities | 200 |
| 10.2 | Sibling negotiation | 203 |
| 10.3 | Begging behaviour | 210 |
| 10.4 | Stealing food from siblings | 215 |
| 10.5 | Food sharing among siblings | 217 |
| 10.6 | Mutual preening | 219 |
| 10.7 | Social huddling | 221 |
| 11 | Demography | 223 |
| 11.1 | Natal dispersal | 224 |
| 11.2 | Breeding dispersal and migration | 228 |
| 11.3 | Survival prospects | 230 |
| 11.4 | Population dynamics | 235 |

| | |
|--|------------|
| 12 Plumage polymorphism | 239 |
| 12.1 Colour polymorphism | 240 |
| 12.2 Genetics of plumage polymorphism | 245 |
| 12.3 Sexual dimorphism in plumage traits | 252 |
| 12.4 Age-related changes in plumage traits | 254 |
| 12.5 Mate choice | 257 |
| 12.6 Sexually antagonistic selection | 260 |
| 12.7 Adaptive functions of whitish and reddish colouration | 264 |
| 12.8 Adaptive functions of small and large black spots | 268 |
| 12.9 Adaptive functions of few and many black spots | 275 |
| 12.10 Geographic variation in plumage traits | 278 |
| Conclusion | 285 |
| To the future | 286 |
| Species names | 288 |
| <i>Index</i> | 291 |
