<i>Preface</i>	xiii
Introduction	1
Part I The Computability of Physical Systems and Physical Systems as Computers	
1 Ontic Pancomputationalism GUALTIERO PICCININI AND NEAL G. ANDERSON	23
2 Zuse's Thesis, Gandy's Thesis, and Penrose's Thesis B. JACK COPELAND, ORON SHAGRIR, AND MARK SPREVAK	39
3 Church's Thesis, Turing's Limits, and Deutsch's Principle ROSSELLA LUPACCHINI	60
Part II The Implementation of Computation in Physical Systems	
4 How to Make Orthogonal Positions Parallel: Revisiting the Quantum Parallelism Thesis ARMOND DUWELL	83
5 How is There a Physics of Information? On Characterizing Physical Evolution as Information Processing OWEN J. E. MARONEY AND CHRISTOPHER G. TIMPSON	103
6 Abstraction/Representation Theory and the Natural Science of Computation DOMINIC HORSMAN, VIV KENDON, AND SUSAN STEPNEY	127
	v

vi Contents

Part III Physical Perspectives on Computer Science

- 7 Physics-like Models of Computation 153
KLAUS SUTNER
- 8 Feasible Computation: Methodological Contributions from
Computational Science 172
ROBERT H. C. MOIR
- 9 Relativistic Computation 195
HAJNAL ANDRÉKA, JUDIT X. MADARÁSZ, ISTVÁN NÉMETHI,
PÉTER NÉMETHI, AND GERGELY SZÉKELY

Part IV Computational Perspectives on Physical Theory

- 10 Intension in the Physics of Computation: Lessons from the
Debate about Landauer's Principle 219
JAMES LADYMAN
- 11 Maxwell's Demon Does not Compute 240
JOHN D. NORTON
- 12 Quantum Theory as a Principle Theory: Insights from an
Information-Theoretic Reconstruction 257
ADAM KOBERINSKI AND MARKUS P. MÜLLER
- Bibliography* 281
- Index* 303
