Index

adiabatic time dependence, 12, 156
aperiodic, 204, 272
Balescu–Lenard equation; electromagnetic, 278
Balescu–Lenard equation; relativistic, 278
Balescu–Lenard–Guernsey equation, 112
Beliaev–Budker equation, 278
bump-on-tail instability, 41, 43, 130, 201
Buneman instability, 317
Cerenkov emission, 101
closure problem, 19
coalescence, 50
collision integral, 112
collisional integral; relativistic, 276
Coulomb logarithm, 115
Debye length, 40, 68
decay, 50, 177, 178, 182, 206, 219–222, 257, 259, 263–266
dispersion relation, 39, 68, 199, 204
dispersion relation; electromagnetic, 202
dispersion relation; electrostatic, 200
dispersion relation; electrostatic dispersion relation, 141
dispersion relation; harmonic, 301, 302
dispersion relation; ion-sound, 40, 142, 201
dispersion relation; Langmuir, 39, 141
dispersion relation; longitudinal, 170
dispersion relation; modified Langmuir, 304
dispersion relation; multiple harmonic, 302
dispersion relation; nonlinear, 299, 304–306
dispersion relation; transverse, 170, 199
eigenmode, 105
electromagnetic instability, 203
electrostatic instability, 200
ensemble, 4
ensemble average, 6
fast-wave condition, 33, 35
fluctuations, 105
Fokker–Planck equation, 99
Fourier–Laplace transformation, 11
Fried–Conte, 34, 309
fully-symmetrized third-order nonlinear susceptibility, 18
fundamental emission, 279, 286
Green’s function, 329
growth rate, 41, 201
H theorem, 118
harmonic emission, 279
higher-order perturbative expansion, 318
homogeneous and stationary, 7, 8
induced decay, 52, 69, 103, 104
induced emission, 48, 68, 69, 103, 104, 177, 181, 205, 219–221, 257, 259, 263, 265
induced scattering, 54, 178, 182, 213, 220, 222, 258, 260, 264, 266
induced scattering; ion sound, 69, 104
induced scattering; off thermal ions, 69, 103
instability; electromagnetic, 203
instability; electrostatic, 200
instability; ion-acoustic, 202
instability; Weibel, 203
ion-acoustic instability, 202
ion-acoustic speed, 40, 68
ion-sound speed, 40, 68
ion-sound wave dispersion relation, 108
Kappa distribution, 122, 135, 139, 150
kinetic temperature, 33
Klimontovich equation, 77, 225
Klimontovich function, 76
Klimontovich function; free particles, 82
Klimontovich function; non-interacting particles, 82
Kramers–König, 111

351
Index

Landau damping, 41
Landau damping rate, 43
Landau equation, 114
Landau equation; relativistic, 278
Langmuir condensation, 132
Langmuir wave dispersion relation, 108
linear dielectric conductivity, 16, 18
linear dielectric constant, 18
linear dielectric susceptibility, 16, 33
linear dielectric susceptibility; tensor, 161, 183
linear wave-particle resonance, 49
magnetic field fluctuations, 271
Maxwell’s equation, 75, 155, 225
Maxwell–Boltzmann–Gaussian distribution, 106
non-eigenmode, 105
non-extensive entropy, 123
nonlinear frequency shift, 302
nonlinear frequency shift; ion-acoustic, 306
nonlinear frequency shift; Langmuir, 303
partial third-order nonlinear susceptibility, 18
particle kinetic equation, 70, 125, 128, 170,
218, 238, 239, 280
particle kinetic equation; discrete-particle
effects, 99
plasma dispersion function, 34, 203, 270, 309
plasma dispersion function; asymptotic
expansion, 310
plasma dispersion function; continued
fraction, 311
plasma dispersion function; differential
equation, 311
plasma dispersion function; series
expansion, 310
plasma emission, 278
plasma frequency, 18, 68
plasma parameter, 115, 127
plasmon, 52
Plemelj formula, 296
Poisson equation, 9
principal value, 28
quasi-thermal noise spectroscopy, 111
quasilinear, 49, 169, 238, 282
quasilinear; diffusion, 61
quasilinear; renormalized, 328, 329, 333
quasilinear; saturation, 130, 131, 149
radiation; non-thermal, 278
radiation; thermal, 272, 275
reactive, 71, 272, 313
renormalization, 323
renormalized, 72, 325, 326
renormalized; quasilinear, 328
resonance broadening, 332
Rosenbluth potentials, 119
second-harmonic emission, 287
second-order nonlinear susceptibility, 16, 35
second-order nonlinear susceptibility; tensor,
161, 186
slow-wave condition, 33, 36
solar radio bursts, 278
solar wind, 150
spectral balance equation, 22, 92, 93, 163, 233, 238
spontaneous decay, 52, 68, 69, 103, 104
spontaneous emission, 101, 103, 104, 257, 259, 260,
262, 263, 265
spontaneous scattering, 102–104, 258–262,
264, 266
Sturrock’s dilemma, 284
symmetry property, 32
thermal speed, 33
thermal speed; electron, 68
thermal speed; proton, 68
third-harmonic emission, 287
third-order nonlinear susceptibility, 17, 37
third-order nonlinear susceptibility; tensor,
161, 190
three-wave resonance, 50
turbulent quasi equilibrium, 133, 148
type II radio bursts, 279
type III radio bursts, 278
velocity diffusion, 61, 99, 240
velocity drag, 99, 240
velocity friction, 99, 240
Vlasov equation, 9, 155
wave intensity, 26, 100
wave intensity; ion-sound, 103, 133
wave intensity; Langmuir, 130, 131
wave intensity; transverse, 221
wave kinetic equation, 68, 125, 128, 280
Weibel instability, 203
