<i>Preface</i>	<i>page xi</i>
1 Mixing and Its Role in the Ocean	1
1.1 Overview	1
1.2 How is Mixing Studied?	3
1.3 The Meridional Overturning Circulation	9
1.4 Kinetic Energy and Scalar Variance Budgets	19
2 Thermodynamics and Seawater Properties	25
2.1 Overview	25
2.2 Parameterizing Seawater	26
2.3 First and Second Laws of Thermodynamics	33
2.4 Molecular Fluxes and Diffusivities	37
2.5 Equilibrium and Well-Mixed States	43
2.6 Equation of State and Its Derivatives	46
2.7 Buoyancy Flux and Potential Energy	50
2.8 Temperature–Salinity Diagrams and Spiciness	55
2.9 Neutral Surfaces, Thermobaricity, and Cabbeling	58
2.10 Water Mass Transformation	67
3 Turbulence	71
3.1 Overview	71
3.2 Dimensional and Scale Analysis	72
3.3 Energetics	74
3.4 Scalar Variances	78
3.5 Production	80
3.6 The Kolmogorov Energy Cascade	83
3.7 The Advective Scalar Cascade	91
3.8 The Horizontal Cascade in Strong Stratification	96

viii	<i>Contents</i>	
	3.9 Evolution and Decay	99
	3.10 Intermittence and Statistics	101
	3.11 Estimating Diapycnal Turbulent Fluxes	104
	3.12 Mixing Efficiency	107
	3.13 Perspectives	110
4	Double Diffusion	111
	4.1 Overview	111
	4.2 Double-Diffusive Convection	113
	4.3 Salt Fingering	118
	4.4 Salt Fingering Staircases	129
	4.5 Diffusive Layering	135
	4.6 Diffusive Staircases	142
	4.7 Thermohaline Intrusions	146
	4.8 Perspectives	155
5	Sampling Mixing and Its Environment	156
	5.1 Overview	156
	5.2 Dissipation-Scale Sensors	156
	5.3 Energy-Scale and Finestructure Sensors	168
	5.4 Profilers	177
	5.5 Towed Bodies and Self-Propelled Vehicles	184
	5.6 Moorings and Fixed Platforms	186
	5.7 Remote Sensing	188
	5.8 Tracers	192
	5.9 Perspectives	194
6	Internal Waves and the Vortical Mode	197
	6.1 Overview	197
	6.2 Observations	199
	6.3 Linear Waves in a Steady Unsheared Flow	205
	6.4 Linear Waves in Horizontal Shear	214
	6.5 Linear Waves in Vertical Shear	216
	6.6 Eulerian Spectra	218
	6.7 The Vortical Mode	225
	6.8 Perspectives	229
7	Interactions and Dissipation of Internal Waves and the Vortical Mode	230
	7.1 Overview	230
	7.2 Generation by Wind Stress	232
	7.3 Topographic Generation	234

<i>Contents</i>		ix
7.4	Generation by Geostrophic Adjustment of Balanced Flows	244
7.5	Wave–Wave Interactions	245
7.6	Testing Dissipation Scaling Based on Shear and Strain	252
7.7	Nonlinearity	266
7.8	The Saturated Range	277
7.9	Perspectives	281
8	Mixing in the Stratified Interior	283
8.1	Overview	283
8.2	Vertical Structure of Stratification	284
8.3	Finestructure	286
8.4	Global Mixing Patterns	291
8.5	Mixing Patches and Overturns from Breaking Internal Waves	298
8.6	Double Diffusion in the Pycnocline	302
8.7	The Southern Ocean	306
8.8	The Arctic	310
8.9	Ocean Ridges	313
<i>Appendix A</i> Glossary		321
A.1	English Symbols	321
A.2	Greek Symbols	323
<i>Appendix B</i> The GM79 Internal Wave Spectrum, Prepared with R.-C. Lien		325
B.1	Energy Density and Two-Dimensional Spectra	325
B.2	Wave Functions	327
B.3	Horizontal Velocity	328
B.4	Vertical Shear of Horizontal Velocity	329
B.5	Vertical Displacement	332
B.6	Vertical Velocity	333
B.7	Vertical Strain	334
B.8	Shear-to-Strain Ratio	334
<i>Bibliography</i>		336
<i>Index</i>		365
