- Laplace asymptotic method, 70, 173–175
- Laplace cusp, 71, 74, 83, 90
- Laplace distribution, 19, 45, 70, 108, 202
- levels of aggregation, 2, 3, 36, 80, 149
- Li-distribution, 70
- life cycle, 32, 84, 136, 139, 140, 144, 152
- likelihood function, 206
- likelihood ratio test, 206
- linear differential equation, 27, 161, 162, 168
- logarithmic distribution, 55
- logarithmic growth rate, 18, 34, 38, 46, 58, 60, 61, 64, 75, 76, 84, 115, 143, 200
- lognormal distribution, 9, 10, 37–39, 53, 54, 57, 59, 66, 80, 84–86, 95, 96, 131, 132, 139, 147, 152, 198
- Mansfield correction, 34
- maximum entropy test, 98, 208
- maximum likelihood method, 98
- Maxwell–Boltzmann statistics, 26
- mixture of normal distributions, 200
- moment generating function, 38, 199
- moving average models, 33
- Multiplicative Shock Model, 44
- negative binomial distribution, 82, 167
- nonlogarithmic growth rate, 34, 43, 62, 64, 76, 138
- nonparametric test, 202
- normal distribution, 198
- ORBIS, 94, 103, 104
- ordinary least square, 119
- pack, 140, 144, 146
- Pareto distribution, 47, 49, 53, 55, 57, 94, 95, 196
- Pareto tail, 46, 55, 57, 95, 98, 101
- Pareto-like distribution, 47, 50, 81
- pharmaceutical industry, 7, 16, 106
- PHID, 7, 16, 60, 93, 101, 112, 115, 118, 124
- Poisson distribution, 26
- Poisson process, 33, 178
- Polya's urn scheme, 26, 39
- polylogarithm, 68
- power law, 48–50, 57, 63, 67, 69–71, 73, 76, 77, 80, 82–84, 91, 92, 129, 138, 141, 142, 144–148, 151, 152, 158, 172, 176, 184, 188, 191
- power law distribution, 34, 37, 47, 49, 50, 52, 55, 66, 67, 69, 74, 77, 84, 85, 127, 131, 134, 144, 172, 174, 191, 195
- power law divergence, 82
- power law size-variance relationship, 44, 63, 195
- power law tail, 43, 46, 50, 70, 72–74, 79, 83, 149, 173
- preferential attachment growth, 48, 158
- probability density function, 37, 54
- probit model, 119
- products, 124
- rank, 48, 49
- Research and Development, 23
- sample censoring, 17
- scale mixture of Gaussian distributions, 200
- scale-mixture, 200
- Schumpeterian creative destruction, 1, 57, 91
- selection, 121
- selection bias, 16, 21
- self-exciting point processes, 33
- Simon growth process, 48, 76, 80
- Simon model, 36, 46–49, 51, 52, 54, 55, 57, 58, 67, 74, 80–82, 156, 171

*Subject Index*

227

- simple goodness of fit problem, 203  
size distribution, 3, 10, 12, 15, 16, 32, 34, 38, 42, 44, 46, 47, 50, 55–57, 80, 82, 84, 85, 87, 91, 93, 94, 96, 99, 131, 132, 140, 145, 147, 148, 152  
size–mean growth rate relationship, 16, 17, 20, 34, 42, 43, 45, 75, 87, 138, 144, 152  
size-growth relationship, 121  
size-variance relationship, 4, 11, 17, 21, 34, 44, 67, 76, 87, 114, 133, 144, 146, 148, 151, 152, 184, 185, 188  
Skellam distribution, 178, 179  
stable economy, 25, 36, 50, 55, 72–74, 85–87, 157, 173  
statistical distribution, 195  
Subbotin *see* exponential power distribution  
survival probability, 166  
Sutton model, 68, 78, 80, 82, 127, 153  
Sutton’s assumption, 23  
tent-shape, 4, 19, 92, 127, 152, 200  
tent-shape distribution, 44, 45, 58, 80, 84, 112, 153  
theoretical ecology, 25  
two-level aggregation model, 82, 91  
uniformly most powerful unbiased test, 98, 208  
urn, 26, 39  
volatility of growth rates, 4  
Weibull-type distribution, 207  
Yule’s distribution, 50  
Zipf’s law, 47, 49, 95, 148, 169, 196
