

## Contents

	<i>Preface</i>	page ix
1	Introduction	1
2	Empirical Regularities	9
2.1	Background	9
2.2	Size Distributions	12
2.3	The Distribution of Growth Rates	16
3	Innovation and the Growth of Business Firms: A Stochastic Framework	23
3.1	Introduction	23
3.2	Assumptions	24
3.3	Gibrat	36
3.4	Bose–Einstein	39
3.5	Simon	46
3.6	Generalized Proportional Growth (GPG)	53
3.7	Innovation and Multiple Levels of Aggregation	80
3.8	Conclusions	84
4	Testing Our Predictions	93
4.1	Size Distributions	95
4.2	The Distribution of Growth Rates	105
4.3	The Relationship between Size, Age, Diversification, and Growth	112
4.4	Conclusions	123
5	Testing Our Assumptions	124
5.1	Testing Assumptions (1–4)	124
5.2	Testing Assumptions (5) and (7)	131
5.3	Testing Assumption (6)	140
5.4	Conclusions	151

viii

*Contents*

6	Conclusions	154
7	Appendices	156
7.1	A Model of Proportional Growth	156
7.2	The Growth Rate Distribution	176
7.3	Computer Simulations of Growth	184
7.4	A Hierarchical Model and the Size-Variance Relationship	188
7.5	Statistical Appendix	195
