

## Index

---

- acceleration, 4, 6, 10, 74, 97, 111, 140  
 affine parameter, 65, 67, 81, 106
- basis, 27, 49  
   coordinate, 39, 51  
   dual, 29, 32, 37, 39, 50, 144  
   transformation, 32, 50
- Bianchi identities, 94
- cartesian basis, 42  
 cartesian coordinates, 41, 63  
 Cauchy stress tensor, 24  
 chart, 46  
 Christoffel symbols, 54, 58, 59, 77, 78, 107  
 commutator, 71, 73, 147  
 components, 27–31  
 connecting vector, 73, 80  
 connection, 62  
   metric, 64, 66  
 contraction, 22, 26, 30, 145  
   in SR, 40  
 coordinate system, 46  
 cosmological constant, 100  
 covariant derivative, 56, 62  
   in LIF, 63, 71, 94, 96  
 curvature, 67  
   and the metric, 32  
 curve, 46
- d'Alembertian, 137  
 determinant, 20  
 direct product, 24  
 dust, 85
- Einstein  
   field equations, 97–102  
   tensor, 94, 101
- Einstein–Hilbert action, 101  
 energy density, 87, 92  
 energy-momentum tensor, 87–92  
 equivalence principle, 7, 95, 96, 107  
   in SR, 110  
   strong, 95  
   weak, 4
- euclidean space, 41, 46, 52
- falling lift, 6  
 Faraday tensor, 93  
 field, 25, 50, 64  
   one-form, 26, 50  
   tensor, 32, 56  
   vector, 42, 61, 62
- flat space, 41  
 fluid, 85  
 flux vector, 86
- galilean transformation, 3, 113  
 gauge invariance, 105  
 general covariance, principle of, 2  
 geodesic, 64  
   coordinates, 60  
   deviation, 9, 72, 140  
   equation, 65, 67, 80, 106  
 gradient one-form, 26, 50, 87  
 gravitational redshift, 8  
 gravitational waves, 136–142

- index lowering, 32
- inertia tensor, 24
- inertial frame, 3, 6, 66
  - local, 3, 6, 10, 60, 80
- inner product, 19, 31
  - positive-definite, 19
  
- Kronecker delta symbol, 19, 34
  
- Levi–Civita symbol, 90
- Lie derivative, 61, 105
- linear independence, 19
- linearity, 18, 65
- local flatness theorem, 60
- Lorentz basis, 42
- Lorentz transformation, 3, 118
  
- manifold, 46
- mass density, 88
- Maxwell's equations, 93
- MCRF, 86
- metric tensor, 31–32
  - and the Christoffel symbols, 58
- Minkowski space, 40, 41
- momentum density, 88
  
- natural units, 12, 102, 118, 132
- Newton's laws, 107
- norm, 19, 40
- normal coordinates, 60
  
- one-form, 21
- orthogonal, 19
- orthogonal coordinates, 133
- orthonormal, 20
- outer product, 24, 88
  
- parallel transport, 61, 67
- path, 46
- polar coordinates, 37
  
- reference frame, 46
  - inertial, *see* 'inertial frame'
- relativity, principle of, 3
- Ricci
  - scalar, 94
  - tensor, 94, 101
- Riemann tensor, 70, 101
  
- Schild's photons, 8
- Schwarzschild radius, 132
- sign conventions, 15, 40, 70, 94
- signature (of the metric), 40, 60
- special relativity, 3, 6, 40, 85, 87, 110
- strain, 136
- stress-energy tensor, *see* 'energy-momentum tensor'
- summation convention, 28
- symmetrisation, 105, 147
  
- tangent plane, 49, 61
- tangent vector, 47–50, 62, 64
- Taylor's theorem, 60, 70
- tensor, 21, 144
  - (anti)symmetric, 22
  - components, 29
- trace, 20
- transformation matrix, 33
  - in SR, 40
- transverse gauge, 138
- transverse-traceless gauge, 138
  
- units, geometrical, *see* 'natural units'
  
- vector, 21
- vector space, 19, 21, 49
  - basis, 19
  - components, 19
  - dimension, 19
  - span, 19
- volume one-form, 90
