.....

Every effort has been made in preparing this book to provide accurate and up-to-date information which is in accord with accepted standards and practice at the time of publication. Although case histories are drawn from actual cases, every effort has been made to disguise the identities of the individuals involved. Nevertheless, the authors, editors and publishers can make no warranties that the information contained herein is totally free from error, not least because clinical standards are constantly changing through research and regulation. The authors, editors and publishers therefore disclaim all liability for direct or consequential damages resulting from the use of material contained in this book. Readers are strongly advised to pay careful attention to information provided by the manufacturer of any drugs or equipment that they plan to use.

To Dr Anisya Vasanth (20 May 1959–9 February 2003), who struggled stoically with a smile on her lips and kindness in her heart to lighten the burden of those in distress.

Krishnan Padmakumari Sivaraman Nair

To the patients who allow me to partner with them as they work to get their life back;

to my colleagues, the rehabilitation staff, clinicians, and therapists who work every day to help patients on the path to recovery; to family and friends who always support my endeavours;

and to my husband, Justin, for whom I strive to be efficient and get home every day.

Marlís González Fernández

Dedicated to our patients, whose never-ending resolve to get better is a constant source of inspiration.

Jalesh N. Panicker

Contents

List of Contributors viii

1	An Introduction to Neurological Rehabilitation 1	11	Management of Spasticity in Neurorehabilitation 119
	Diane Playford and Krishnan Padmakumari Sivaraman Nair		Valerie L. Stevenson
