

## Index

- avalanche, 163, 176
- belief propagation, 9
- Bessel function, 54, 85, 86
- Bethe lattice, 2
- boundary conditions, 2, 15, 19, 26, 101, 234, 242, 259, 265, 266
- Bragg peaks, 233
- Bravais lattice, 232–236, 243, 248
- Brownian motion, 69, 77, 78, 91, 102
- buckler, 270, 271, 286
- catastrophic potential, 40
- cavity method, 9, 144
- central limit theorem, 77, 78, 103, 116
- close packing, 231, 232, 234, 241
- coloured noise, 70, 76, 77, 83
- commutative algebra, 147, 149, 153, 177
- complexity, 199, 201–207, 210, 213, 219–221, 226, 227
- configurational entropy, 201
- correlation function, 10, 15, 17, 19, 23, 42, 43, 45, 67, 68, 71–73, 75–77, 89, 127, 176
- cost function, 252, 253, 258
- critical exponent, 12, 13, 92, 195, 196, 260, 263, 268, 269, 271–273, 275, 278–280, 287, 301
- crystallisation, 37, 45, 62, 67, 108, 141, 231, 232, 240, 241, 243, 246, 248, 251, 260, 267, 290
- de Almeida-Thouless transition, 146, 172, 173, 175, 178
- De Broglie wavelength, 39
- density of vibrational states, 285–287
- detailed balance, 24, 28, 70, 74, 98
- dilatancy, 290, 295, 298, 301, 302
- dynamical arrest, 57, 82, 85, 87, 91, 94, 99–101, 104, 126, 129, 132, 193, 199, 202, 206, 216, 227, 246, 256, 258, 290, 296, 297
- Edwards ensemble, 219, 221, 227, 247
- effective temperature, 216
- Einstein relation, 75, 82
- elasticity, 290, 295, 302
- energy barrier, 255, 258
- equilibrium state, 19, 27, 32, 44, 62, 100, 121, 141, 162, 175, 202
- extreme value statistics, 272
- first order phase transition, 62, 143, 145, 240, 241
- fluctuation-dissipation relation, 74, 75, 83
- Fokker–Planck equation, 97
- free energy barrier, 31, 175, 241, 243, 246
- fully connected model, 2, 32
- Gardner transition, 146, 185, 187, 189–191, 193–195, 224, 226, 251, 257–259, 273, 297–299, 301, 302
- Gibbs rule, 143
- glass close packing, 130, 219, 224, 246, 247, 287
- Goldstone mode, 176
- gradient descent, 253, 255, 256, 258, 259, 262, 287
- Green–Kubo relation, 75, 89, 93
- Hamiltonian dynamics, 68, 74, 93
- hydrodynamics, 67, 91
- ideal glass, 210, 216, 217, 227, 247
- interaction graph, 2
- interface, 21, 22, 32, 162
- Ising model, 1, 2, 10, 19, 26, 28, 77, 121, 141
- isostaticity, 263, 265–269, 271, 273, 280, 284, 287
- Kauzmann transition, 199, 202, 203, 207, 209, 215, 216, 219, 224, 225, 227, 247
- kinetic theory, 67
- Kirkwood instability, 57
- Landau theory, 12, 34, 62
- Langevin dynamics, 69, 74, 76, 90, 93, 97, 253, 255
- large dimensional expansion, 6, 10, 12, 23, 27, 63
- lattice, 2, 15, 34, 144, 232, 233, 235, 241, 243
- Legendre transform, 5–7, 23, 42, 43, 205, 207, 226
- linear programming, 238

- Liouville theorem, 69
- local dynamics, 24, 28
- local search algorithm, 252, 258, 260, 287
- long-range potential, 40
  
- Markov chain, 70
- master equation, 28, 30
- Maxwell construction, 22, 27
- Mayer function, 47, 49, 51, 59, 110, 111, 114, 116, 128
- metabasin, 158–161, 163, 226, 273, 297
- metastable state, 26, 27, 31, 38, 100, 241, 248, 292
- mobility, 73, 75, 82
- mode-coupling theory, 91, 94, 127
- molecular liquid, 108–110, 114, 121, 132
- Monte Carlo dynamics, 70, 74, 93, 242
  
- Newtonian dynamics, 69, 76, 102
- nucleation, 32, 162
  
- path integral, 67, 76
- periodic packing, 232, 234, 239, 242, 251
- phase coexistence, 22, 23, 27, 33, 44, 62, 141, 143, 177
- phase diagram, 128, 130, 133, 140, 177, 181, 188, 191, 199, 214, 221, 241
- Poisson process, 163, 177, 253
- polydispersity, 37, 38
  
- quasicrystal, 233
- quenched disorder, 107, 125, 132, 140
  
- radial distribution function, 42, 46, 58, 185, 213, 214, 239, 269
- random graph, 2
- rattler, 262, 263, 265, 269, 270, 286
- response function, 72
  
- rotational invariance, 42, 44, 64, 77, 84, 108, 109, 112, 113, 117, 141
- roughening transition, 21
  
- satisfiability problem, 252, 260
- satisfiability transition, 260, 262, 287
- saturated packing, 235, 237
- second-order phase transition, 10, 11, 13, 18, 93, 145, 176, 194
- simulated annealing, 255, 287
- spinodal point, 27, 130, 131, 140, 189, 192, 257, 297, 299, 303
- stable potential, 40, 51
- static structure factor, 45, 239
- Stokes–Einstein relation, 91, 93, 94
- surface tension, 22, 25, 27, 32, 241
- susceptibility, 4, 10, 18, 72, 93, 94, 145, 176, 273, 298, 300
  
- tempered potential, 39, 51, 58
- time reversal, 73, 75, 97
- time-translational invariance, 68, 73, 102
- translational invariance, 2, 9, 11, 16, 23, 24, 26, 42, 44, 50, 71, 107, 109, 110, 141, 266
- transport coefficient, 73, 75
- triple point, 143
  
- ultrametricity, 146, 159–164, 177, 297
  
- van Hove function, 71, 72
- virial expansion, 46, 50, 57, 63, 87, 107, 110, 114, 115, 137, 210, 237, 239
- virial theorem, 214
  
- Ward identity, 176
- white noise, 69, 87
  
- yielding, 290, 299, 301, 303
