Π-equivalent circuit model, 78, 151, 320

active power, 4, 9, 13, 14, 60, 82, 151, 193, 216, 227
additive disturbance, 195
algebraic equations, 5
attainable failure sequence, 106, 113, 115, 117, 120, 121
availability model, 119, 120, 123, 124
average frequency error, 154, 195, 264

bathtub curve, 111
Bayes' formula, 17
Bernoulli distribution, 19
Bernoulli process, 30
  moments, 32
Binomial distribution, 19
buck DC-DC power converter, 297
buck dc-dc power converter
  voltage regulation, 300
  voltage regulation verification, 300

Cartesian product, 36
Chapman–Kolmogorov equations, 94
Chapman-Kolmogorov equations, 98, 126–128
characteristic function, 142
Chebyshev's inequality, 75
closed set, 36
common cause failures, 12, 104
component failure sequence, 101, 102
conditional expectation, 24
conditional pdf, 23
conditional probability, 16
convex set, 38
  support function, 239
correlation, 25
covariance, 25
covariance matrix, 29, 132, 146

deterministic inputs, 58, 68, 137, 179, 220, 258, 289
differential-algebraic equation (DAE) model, 303
  linearization, 303
Dirac delta function, 67, 167
directed graph, 78, 151, 193, 227, 263, 324
  node-to-edge incidence matrix, 78, 151, 227, 264, 324
disjoint sets, 36
droop coefficient, 152, 194, 264
dynamical systems, 8
  continuous-time, 5, 13
  discrete-time, 5, 13
Dynkin's formula, 184, 187, 189

ellipsoid, 8, 14, 40, 203, 204, 238, 273
  center, 40, 203, 204, 239, 259, 275
  minimum sum of squares of the semi-axis lengths, 268
  minimum volume, 268
  Minkowski sum, 42
  shape matrix, 40, 203, 204, 239, 259, 275
  support function, 40, 204, 240, 275
  tight, 268
  volume, 42
Euler's gamma function, 42, 246, 282
event, 16
event algebra, 16
events
  independent, 17
  mutually exclusive, 17
expectation, 18, 20
exponential distribution, 21
extraneous disturbance, 156
extraneous power injection vector, 85, 228, 233

failed mode, 11, 101
failure, 2
failure coverage, 117
failure rate, 109, 116
first moment, 18, 20
frequency regulation, 11

More Information

frequency-droop control, 10
  continuous-time, 194
  discrete-time, 152, 263

Gaussian distribution, 21
Gaussian systems, 140, 142, 145, 181
Generator matrix, 99
Geometric distribution, 19
gradient, 41, 206, 316
Green's first identity, 318

Hurwitz matrix, 279
hyperplane, 209

i.i.d. random variables, 30
i.i.d. random vectors, 138, 141, 150
independence, 16
inner product, 308
input, 1
input uncertainty
  probabilistic, 7, 8, 12, 13
  set-theoretic, 7, 8, 14, 273
input vector, 6, 55, 65, 76, 273
input-to-state mapping, 6, 8, 13, 203
input-to-state-mapping, 62
integration by parts, 185, 186, 190, 191, 318
integration by substitution, 318
inverse function theorem, 69, 317
Itô's chain rule, 187
Itô's lemma, 183

Jacobi's formula, 49, 282
Jacobian matrix, 68, 70, 72, 212, 221, 316
joint pdf, 28
jointly distributed random variables, 21

Kirchhoff's laws, 3, 54, 298, 320
Kirchhoff's voltage law, 66, 215
Kronecker product, 135, 177, 196, 279, 310

Lagrange multiplier, 41, 206
law of total probability, 17, 94, 95
Leibniz's integral differentiation rule, 51
linear combination, 138, 219, 308
linear dependence, 308
linear dynamical systems, 16, 46, 130
  asymptotic stability, 48, 52
  continuous-time, 46, 166, 168, 273
  discrete-time, 46, 131, 237, 238
  equilibrium point, 48, 52
  input, 46, 49
  Lyapunov stability, 48, 52
  state, 46, 49
  state-transition matrix, 46, 49
  time-invariant, 47, 135, 177, 243, 244
  trajectory, 46, 49
linearization, 13, 14, 59, 144, 146, 212, 259, 291
loopy networks, 85, 231, 235

Markov availability model, 119
Markov chain, 8, 13, 91, 92
  continuous-time, 94
  discrete-time, 94
  homogeneous, 95
  transition matrix, 95
Markov process, 8, 93
Markov property, 93, 97
Markov reliability model, 112
matrix
  adjugate, 312
  characteristic polynomial, 313
  classical adjoint, 312
  determinant, 312
  eigenvalue, 313
  eigenvector, 313
  partition, 309
  positive (semi)definite, 314
  rank, 313
  spectrum, 313
  square, 311
  trace, 311
mean, 28
mean time to failure (MTTF), 110, 116
microgrids, 3, 13, 14, 151, 192, 263
Minkowski difference, 37
Minkowski sum, 37, 239
  support function, 37, 239
moments
  first and second, 7, 12, 131

network admittance matrix, 216
network topology, 9, 11, 193, 263
node-to-edge incidence matrix, 193
nominal mode, 11, 101
non-repairable component, 109
non-repairable system, 11, 109, 116
nonlinear dynamical systems
  continuous-time, 187, 290
  discrete-time, 144, 259

open set, 36
ordinary differential equations (ODEs), 5
outage, 2
outer-bounding ellipsoid, 278
  minimum sum of squares of the semi-axis lengths, 251, 278, 284
  minimum volume, 246, 278, 281, 282
  tight, 254, 285, 286

per-unit normalization, 61, 326
  base quantities, 326
