

Index

- σ -field, 5
 - Borel, 5, 79, 85
 - generated by a function, 19
 - product, 42, 79
- d -system, 16
- π -system, 16

- almost everywhere, 13
- almost surely, 3
- arbitrage opportunity, 109
- Axiom of Choice, 13

- Banach space, 52
- Black–Scholes model, 108
- Brownian
 - filtration, 84
 - increments, 84
 - Motion, 83
 - symmetry, 87

- Cantor set, 2
- compensator
 - for a discrete martingale, 64
 - of an Itô process, 106
 - of BM, 88
 - of scaled random walk, 82
- complete
 - measure, 15
 - normed space, 52
 - option pricing model, 115
 - subspace, 55
- convergence in probability, 72
- correlation coefficient, 54
- countably subadditive, 13
- covariance, 54
- cylinder sets, 85

- density, 45
- derivative securities, 108
- distribution
 - absolutely continuous, 28
 - chi-squared, 29
 - exponential, 29
 - finite-dimensional, 85
 - function, 17
 - gamma, 29
 - joint, 26
 - log-normal, 46
 - normal, 28
 - of a random variable, 25
 - uniform, 28
- Doob
 - L^p inequality, 68
 - decomposition, 64
 - submartingale inequality, 68
 - Upcrossing Lemma, 70
- drift, 108

- European call option, 108
- events
 - field of, 3
 - independent, 9
- expectation, 30, 44
 - conditional on σ -field, 57
 - conditional on random variable, 56

- fair price, 111
- Fatou Lemmas, 35
- filtered space, 61
- filtration
 - augmented, 79
 - discrete-time, 61
 - in continuous time, 79
 - usual conditions for, 79
- function
 - μ -integrable, 37
 - Borel-measurable, 20
 - convex, 47
 - distribution, 25
 - Lebesgue-measurable, 20
 - simple, 24, 96

- Hilbert space, 54

- independent
 - σ -fields, 26
 - events, 9
 - random variables, 26
- indistinguishable processes, 78
- inequality
 - Chebychev, 47
 - Doob's L^p , 68, 80
 - Doob's submartingale, 68, 80
 - Hölder, 50
 - Jensen, 47
 - Markov, 47
 - Minkowski, 51
 - Schwarz, 50
- information, 60
- inner product, 54

integral, 30
 of a positive measurable function, 32
 Itô for simple function, 96
 Lebesgue, 31, 40
 of a simple function, 31
 Riemann, 40
 inverse image, 19
 Itô
 formula for BM, 107
 formula for Itô process, 107
 integral, 100
 isometry, 96
 process, 104

 least-mean-square estimator, 60
 lemma
 Borel–Cantelli, 8, 9
 Fatou, 35
 Upcrossing, 70
 localising sequence, 105

 martingale
 difference, 62
 discrete-time, 61
 in continuous time, 80
 local, 105
 strategy, 63
 sub-, 61
 super-, 61
 transform, 66
 measurable
 real-valued function, 20
 function, 19
 set, 12
 space, 12
 measure, 12
 σ -finite, 12
 absolutely continuous, 74
 complete, 15
 finite, 12
 Lebesgue, 15
 Lebesgue outer, 13
 Lebesgue–Stieltjes, 18
 product, 43
 risk-neutral, 110

 null set, 3

 orthogonal
 projection, 55
 vectors, 55

 Parallelogram law, 55
 point mass, 4
 probability, 6
 conditional, 8
 discrete, 4
 probability space, 6
 process
 adapted discrete-time, 61
 stochastic, 25

Pythagoras' Theorem, 55

 quadratic variation
 of an Itô process, 106

 Radon–Nikodym derivative, 74
 random variable
 k th moment of a , 45
 variance of a , 46
 centred, 46
 characteristic function, 86
 essentially bounded, 52
 mean of a , 45
 standard deviation of a , 46
 random variables, 20
 identically distributed, 25
 random vector, 26
 random walk, 10
 rectangle, 21

 scaled random walk, 82
 p th variation of, 82
 Stirling's formula, 11
 stochastic integral, 96
 discrete, 66
 stochastic process, 25, 78
 p th variation of, 92
 Gaussian, 87
 adapted, 79
 predictable, 112
 predictable, discrete-time, 64
 version of a , 78
 stopping time, 105

 theorem
 Beppo–Levi, 40
 Caratheodory, 15
 Central Limit, 83
 Dominated Convergence (DCT), 39
 Fubini, 43
 Girsanov, 92
 Itô Representation, 115
 Kolmogorov's Consistency, 85
 Kolmogorov's Continuity, 87
 Lévy, 89
 Martingale Convergence, 71, 73, 81
 Monotone Class, 16, 42
 Monotone Convergence (MCT), 34
 Radon–Nikodym, 75
 tilting formula, 91
 tower property of conditional expectation, 58
 trading strategy, 109

 uncorrelated random variables, 54
 uniformly integrable family, 71

 version
 of a process, 78
 of a random variable, 49
 volatility, 108
