# Contents

<i>List of contributors</i>	<i>page xvii</i>
<i>Preface</i>	xix
<i>J. B. Cragg</i>	
1 Introduction	1
<i>S. C. Kendeigh &amp; J. Pinowski</i>	
Development of the project	1
Scope and approach	3
Acknowledgements	11
2 Variation and evolution in a granivorous bird: the house sparrow	15
<i>R. F. Johnston &amp; W. J. Klitz</i>	
History of the house sparrow	16
Evolutionary biology	24
Dispersal	25
Intralocality variation in size	28
Sexual dimorphism	32
Interlocality variation	34
Genetic variation in Europe and North America	39
Diverse aspects of evolutionary potential	42
Significance of character variation to commensal granivory	47
Summary	50
3 Population dynamics	53
<i>M. I. Dyer, J. Pinowski &amp; B. Pinowska</i>	
The genus <i>Passer</i>	53
The family Icteridae	86
Discussion and summary	99
4 Biomass and production rates	107
<i>J. Pinowski &amp; A. Myrcha</i>	
The genus <i>Passer</i>	107
Red-winged blackbird <i>Agelaius phoeniceus</i>	122
Common grackle <i>Quiscalus quiscula</i>	125
Summary	125
5 Avian energetics	127
<i>S. C. Kendeigh, V. R. Dol'nik &amp; V. M. Gavrilov</i>	
Basal metabolism (BM)	129
Temperature regulation (standard metabolism, SM)	134
Existence metabolism (EM)	140
Productive energy (PE)	149
Energy-conserving conditions and activities	153

Edited by Jan Pinowski and S. Charles Kendeigh

Table of Contents

[More information](#)**Contents**

Energy-demanding conditions and activities	159
Total metabolism or daily energy budget (DEB)	177
Growth of young	183
Food consumed	191
Evolution	194
Discussion and summary	197
<b>6 Assessing the potential impact of granivorous birds in ecosystems</b>	<b>205</b>
<i>J. A. Wiens &amp; M. I. Dyer</i>	
Determining the importance of granivorous birds	205
The estimation of potential impact: a simulation model approach	212
Population energetics and food consumption	221
Translating food consumption into impact estimates	242
Energetics and food consumption of granivorous bird communities	248
Overview	264
<b>7 Management of pest situations</b>	<b>267</b>
<i>M. I. Dyer &amp; P. Ward</i>	
Present attitudes	269
Current practices in bird-pest management	272
Control strategies	281
Basic research requirements	284
The role of management	296
Conclusions	300
<b>8 Adaptive correlates of granivory in birds</b>	<b>301</b>
<i>J. A. Wiens &amp; R. F. Johnston</i>	
The context of granivory: seeds as resources	303
Components of granivorous adaptive strategies	306
Strategies of pesthood: a synthesis	334
<b>9 Epilogue</b>	<b>341</b>
<i>S. C. Kendeigh, J. A. Wiens &amp; J. Pinowski</i>	
<b>Appendixes</b>	<b>345</b>
3.1 Breeding density of <i>Passer domesticus</i>	345
3.2 Breeding density of <i>Passer montanus</i>	349
3.3 Relationship between the onset of egg-laying and latitude in the house sparrow	355
3.4 Relationship between the onset of egg-laying and latitude in the tree sparrow	356
3.5 Egg loss and nestling mortality in the house sparrow for different regions of the world	358

	<i>Contents</i>
3.6 Egg loss and nestling mortality in the tree sparrow for different regions of the world	360
3.7 The average number of eggs laid and young birds raised per pair in one year by the house sparrow	361
3.8 The average number of eggs laid and young birds raised per pair in one year by the tree sparrow	362
5.1 Standard and basal metabolic rates	363
5.2 Existence metabolic rates	374
<i>References</i>	379
<i>Index</i>	425
