## Spider Monkeys

Behavior, Ecology and Evolution of the Genus *Ateles*

Spider monkeys are one of the most widespread New World primate genera, ranging from southern Mexico to Bolivia. Although they are common in zoos, spider monkeys are traditionally very difficult to study in the wild, because they are fast moving, live high in the canopy and are almost always found in small subgroups that vary in size and composition throughout the day. The past decade has seen an expansion in research being carried out on this genus and this book is an assimilation of both published, and new and previously unpublished, research. It is a comprehensive source of information for academic researchers and graduate students interested in primatology, evolutionary anthropology and behavioral ecology and covers topics such as taxonomy, diet, sexuality and reproduction, and conservation.

CHRISTINA J. CAMPBELL is an assistant professor of Anthropology at California State University, Northridge. Her research interests include behavioral ecology and reproductive endocrinology and physiology.

<i>List of contributors</i>	page vii
<i>Acknowledgements</i>	x
<b>1 Introduction</b>	1
<i>Christina J. Campbell</i>	
<b>Part I Taxonomy, phylogeny and evolution</b>	
<b>2 Morphology and evolution of the spider monkey, genus <i>Ateles</i></b>	19
<i>Alfred L. Rosenberger, Lauren Halenar, Siobhán B. Cooke and Walter C. Hartwig</i>	
<b>3 The taxonomic status of spider monkeys in the twenty-first century</b>	50
<i>Andrew C. Collins</i>	
<b>Part II Ecology</b>	
<b>4 Diets of wild spider monkeys</b>	81
<i>Anthony Di Fiore, Andres Link and J. Lawrence Dew</i>	
<b>5 Factors influencing spider monkey habitat use and ranging patterns</b>	138
<i>Robert B. Wallace</i>	
<b>6 Spider monkeys as seed dispersers</b>	155
<i>J. Lawrence Dew</i>	
<b>Part III Behavior and reproduction</b>	
<b>7 Locomotion and positional behavior of spider monkeys</b>	185
<i>Dionisios Youlatos</i>

## *Acknowledgements*

The chapters that are included in this volume represent the first ever compilation of such a diversity of papers about spider monkeys and I thank each of the authors for their contribution and their patience during the editorial process. I would also like to thank Colin Groves, Agustin Fuentes, Manuel Lizarralde and Alan Dixson for their useful reviews and comments. Dominic Lewis and Alison Evans at Cambridge have provided assistance in the publication of this volume and I thank them for their help. Lastly, but definitely not least, I would like to thank my family, Tom and Summer Wake for their patience and continued support throughout this process.
