978-1-107-40816-6 - Active Polymers: Materials Research Society Symposium

Proceedings: Volume 1190

Editors: Andreas Lendlein, V. Prasad Shastri and Ken Gall

Table of Contents

[More information](#)**Preface .....** .....xi**Materials Research Society Symposium Proceedings.....** .....xiii***SHAPE-MEMORY POLYMERS***

|  |           |
|--|-----------|
| <b>* Multiphase Polymer Networks with Shape-Memory .....</b>   | <b>3</b>  |
| Steffen Kelch, Marc Behl, Stefan Kamlage,<br>and Andreas Lendlein  |           |
| <b>Effect of Chemical Crosslinking on the Free-Strain<br/>Recovery Characteristics of Amorphous Shape-Memory<br/>Polymers .....</b>  | <b>13</b> |
| Alicia M. Ortega, Christopher M. Yakacki,<br>Sean A. Dixon, Alan R. Greenberg, and Ken Gall  |           |
| <b>A Thermoviscoelastic Approach for Modeling Shape-<br/>Memory Polymers.....</b>  | <b>19</b> |
| Thao D. Nguyen   |           |
| <b>Mechanical Properties of Polymer Blends Having Shape-<br/>Memory Capability.....</b>  | <b>25</b> |
| Marc Behl, Ute Ridder, Wolfgang Wagermaier,<br>Steffen Kelch, and Andreas Lendlein   |           |
| <b>Relationship Between Materials Properties and Shape-<br/>Memory Behavior in Epoxy-Amine Polymers.....</b>   | <b>31</b> |
| Ingrid A. Rousseau and Tao Xie   |           |
| <b>Ability to Control the Glass Transition Temperature of<br/>Amorphous Shape-Memory Polyesterurethane Networks<br/>by Varying Prepolymers in Molecular Mass as well as in<br/>Type and Content of Incorporated Comonomers .....</b> | <b>37</b> |
| Joerg Zottmann, Steffen Kelch, Armin Alteheld,<br>Marc Behl, and Andreas Lendlein  |           |
| <b>Functional Fatigue of Shape-Memory Polymers.....</b>  | <b>43</b> |
| Christina Schmidt, Klaus Neuking, and Gunther Eggeler  |           |

\*Invited Paper

**X-ray Scattering Studies to Investigate Triple-Shape Capability  
 of Polymer Networks Based on poly( $\epsilon$ -caprolactone) and  
 poly(cyclohexyl methacrylate) Segments .....49**

Wolfgang Wagermaier, Dieter Hofmann, Karl Kratz,  
 Marc Behl, and Andreas Lendlein

**Triple-Shape Capability of Thermo-Sensitive Nanocomposites  
 from Multiphase Polymer Networks and Magnetic Nanoparticles .....55**

U. Narendra Kumar, Karl Kratz, Marc Behl, and  
 Andreas Lendlein

***STIMULI-SENSITIVE HYDROGELS***

**Mechanically Reinforcing Polyacrylate/Polyacrylamide  
 Hydrogels Through the Addition of Colloidal Particles.....65**

Bryan Baker, Rebecca Murff, and Valeria Milam

**Phase Behavior and Shrinking Kinetics of Thermo-  
 Reversible Poly(N-Isopropylacrylamide-2-Hydroxyethyl  
 Methacrylate) .....71**

Christine M. Leon, Francisco J. Solis, and  
 Brent L. Vernon

***BIOMATERIALS***

**\* Design and Realization of Biomedical Devices Based on  
 Shape-Memory Polymers .....79**

Duncan J. Maitland, Ward Small IV, Pooja Singhal,  
 Wonjun Hwang, Jennifer N. Rodriguez, Fred Clubb,  
 and Thomas S. Wilson

**Shape-Memory Properties of Radiopaque Micro-  
 Composites from Amorphous Polyether Urethanes  
 Designed for Medical Application .....93**

Jing Cui, Karl Kratz, and Andreas Lendlein

**Thermomechanical Behavior of Biodegradable Shape-  
 Memory Polymer Foams .....99**

Samy A. Madbouly, Karl Kratz, Frank Klein,  
 Karola Lützow, and Andreas Lendlein

\*Invited Paper

Table of Contents

[More information](#)

|  |            |
|--|------------|
| <b>Thermomechanical Properties and Shape-Memory Capability of Drug Loaded Semi-Crystalline Polyestermethacrylate Networks.....</b>   | <b>105</b> |
| Axel T. Neffe, Bui D. Hanh, Susi Steuer,<br>Christian Wischke, and Andreas Lendlein  |            |
| <b>In vivo Degradation Behavior of PDC Multiblock Copolymers Containing Poly(<i>p</i>-dioxanone) Hard Segments and Crystallizable Poly(<math>\epsilon</math>-caprolactone) Switching Segments.....</b> | <b>113</b> |
| Bernhard Hiebl, Karl Kratz, Rosemarie Fuhrmann,<br>Friedrich Jung, Andreas Lendlein, and Ralf-Peter Franke   |            |
| <b>Surface Coatings Based on Polysilsesquioxanes: Grafting-from Approach Starting from Organic Polymers.....</b>   | <b>119</b> |
| Daniel Kessler and Patrick Theato  |            |
| <b>In vitro Study of Mouse Fibroblast Tumor Cells with TNF Coated and Alexa488 Marked Silica Nanoparticles with an Endoscopic Device for Real Time Cancer Visualization .....</b>                      | <b>125</b> |
| Marion Herz, Andreas Rank, Günter E. Tovar,<br>Thomas Hirth, Dominik Kaltenbacher, Jan Stallkamp,<br>and Achim Weber   |            |
| <b>Amorphous Polymer Networks Combining Three Functionalities — Shape-Memory, Biodegradability, and Drug Release.....</b>  | <b>131</b> |
| Christian Wischke, Axel T. Neffe, Susi Steuer,<br>and Andreas Lendlein   |            |

***STIMULI-SENSITIVE SYSTEMS,  
ACTUATORS, AND SENSORS***

|   |            |
|---|------------|
| <b>* Schizophrenic Molecules and Materials with Multiple Personalities — How Materials Science Could Revolutionize How We Do Chemical Sensing .....</b> | <b>139</b> |
| Robert Byrne, Silvia Scaramagnani, Alex Radu,<br>Fernando Benito-Lopez, and Dermot Diamond  |            |
| <b>Color Switchable Goggle Lens Based on Electrochromic Polymer Devices.....</b>  | <b>155</b> |
| Chao Ma and Chunye Xu   |            |

Table of Contents

[More information](#)

|  |            |
|--|------------|
| <b>Dome-Like PVDF Actuators: Preparation, Phase Transformation and Piezoelectric Properties.....</b>   | <b>163</b> |
| Michael Wegener, Robert Schwerdtner,<br>Martin Schueller, and Andreas Morschhauser   |            |
| <b>Experimental and Theoretical Investigation of Photosensitive ITO/PEDOT:PSS/MEH-PPV/AI Detector.....</b>   | <b>169</b> |
| Leon R. Pinto, Jovana Petrovic, Petar Matavulj,<br>David K. Chambers, Difei Qi, and<br>Sandra Zivanovic Selmic   |            |
| <b>Studies of the Blue to Red Phase Transition in Polydiacetylene Nanocomposites and Blends .....</b>  | <b>175</b> |
| Anitha Patlolla, Qi Wang, Anatoly Frenkel,<br>James L. Zunino III, Donald R. Skelton, and<br>Zafar Iqbal   |            |
| <b>Fabrication of Ionic Polymer Metal Composite Actuator with Palladium Electrodes and Evaluation of Its Bending Response .....</b>  | <b>181</b> |
| Takuma Kobayashi, Takeshi Kurabayashi, and<br>Masaki Omiya   |            |
| <b>Sensing Materials for the Detection of Chlorine Gas in Embedded Piezoresistive Microcantilever Sensors.....</b>   | <b>187</b> |
| Timothy Porter, Tim Vail, Amanda Wooley,<br>and Richard Venedam  |            |
| <b>Tests of the Affinity Assumption in Phantomlike Elastomer Networks .....</b>  | <b>193</b> |
| Misty Davies and Adrian Lew  |            |
| <b>Hybrid Polymer/Ultrathin Porous Nanocrystalline Silicon Membranes System for Flow-Through Chemical Vapor and Gas Detection .....</b>                                      | <b>199</b> |
| Maryna Kavalenka, David Fang, Christopher C. Striemer,<br>James L. McGrath, and Philippe M. Fauchet  |            |
| <b>Spiral Photonic Actuator.....</b>   | <b>205</b> |
| Jin Kwang-Yong, Park Seul-Ki, Jang Ji-Hyun,<br>Cheongyang Koh, M.J. Graham, Park Soo-Jin,<br>Nah Changwoon, Lee Myung-Hoon, S.Z.D. Cheng,<br>E.L. Thomas, and Jeong Kwang-Un |            |
