CONTENTS

Preface xv

Materials Research Society Symposium Proceedings..... xvi

*GROWTH AND PERFORMANCE OF
COMPOUND THIN FILM SOLAR CELLS*

Preparation of Cu(In_{1-x}Ga_x)Se₂ Thin Films and Solar Cells
Using a Se-Radical Beam Source..... 3
Shogo Ishizuka, Akimasa Yamada, Hajime Shibata,
Keiichiro Sakurai, Paul Fons, Koji Matsubara, and
Shigeru Niki

Temperature-Dependent Degradation Modes in CdS/CdTe
Devices 9
David S. Albin, Samuel H. Demtsu, Anna M. Duda, and
Wyatt K. Metzger

Investigation of ZnO:Al Doping Level and Deposition
Temperature Effects on CIGS Solar Cell Performance 15
Joel N. Duenow, Timothy A. Gessert, David M. Wood,
Brian Egaas, Rommel Noufi, and Timothy J. Coutts

InGaAs Solar Cells Grown on Wafer-Bonded InP/Si
Epitaxial Templates 21
James M. Zahler, Katsuaki Tanabe, Corinne Ladous,
Tom Pinnington, Frederick D. Newman, and
Harry A. Atwater

NOVEL MATERIALS AND PROCESSES

* Composition Control in the Deposition of Cu(InGa)(SeS)₂
Thin Films 29
William Shafarman, Gregory Hanket, and Shiro Nishiwaki

Fabrication and Characterization of Cd_{1-x}Mg_xTe Thin Films
and Their Application in Solar Cells..... 37
Ramesh Dhere, Kannan Ramanathan, John Scharf,
David Young, Bobby To, Anna Duda, Helio Moutinho,
and Rommel Noufi

*Invited Paper

PREFACE

This volume contains papers from Symposium Y, "Thin-Film Compound Semiconductor Photovoltaics," held April 9–13 at the 2007 MRS Spring Meeting in San Francisco, California. The symposium was one of a regular sequence of international meetings on thin-film solar cells and materials held alternately between the European MRS (E-MRS) and the MRS Spring Meetings.

At the present time, research on advanced photovoltaic cells is gaining increased momentum and popularity as materials solutions to a global energy problem stemming from reliance on fossil fuels are sought. This process starts at the nano-scale where the understanding of atom migration, defect creation, and electrical junction formation forms the base of technology, as emphasized by H-W. Schock (Hahn-Meitner-Institut, Berlin) and S. Shirakata (Ehime Univ., Japan).

It continues at the device scale, where improved efficiencies and new device engineering are implemented notably on flexible substrates as described by A.N. Tiwari (ETH) for bifacial CdTe cells on polymer substrates. Device modeling, presented by J.R. Sites (Colorado State Univ.), and *in situ* monitoring of materials properties such as ellipsometry, presented by R.W. Collins (Univ. of Toledo), are also a key component toward achieving high efficiency. This work effort culminates at the mega-to giga-watt power generating scale, with module manufacturing. D. Eaglesham (First Solar) and C. Eberspacher (Nanosolar) presented the results of their companies on CdTe and Cu(In,Ga)Se₂, respectively, emphasizing the importance of materials science even at that scale.

In several open discussion sessions, the connections between science and industrial practice were highlighted: the enthusiastic participation in all of the oral presentations, poster and discussion sessions of Symposium Y emphasized the importance of exchange and communication, beyond the science.

The organizers were particularly pleased by the success of the Young Scientist Tutorial. Its philosophy was to promote questions and discussion from young researchers and those new to the field, and to have experienced researchers present the tutorial lectures. This format was a resounding success—there were over 200 attendees, many coming from other symposia at the Spring Meeting.

On behalf of all who attended, the organizers offer their thanks to all those who made oral and poster presentations at the symposium, and to the MRS staff who handled the practical arrangements at the Meeting. Thanks also to Sergiu Vataavu and Joel Duenow who were so kind as to act as symposium assistants. We especially appreciate the efforts of those who submitted manuscripts for publication, and to those who participated in the refereeing process. We are also grateful to the MRS publication team who facilitated that process and the publication of this proceedings volume. Daniel Abou-Ras deserves particular thanks for his efforts in organizing the Young Scientist Tutorial, and we thank all the speakers for their superb contributions and course notes.

Support for the symposium is gratefully acknowledged from the following organizations: Applied Materials, Inc.; CERAC, Inc.; First Solar, Inc.; NREL; Pilkington North America, Inc.; Rocky Mountain Laboratories, Inc.; Sanyo Technology Center USA; Sigma Instruments; SoloPower; AFOSR; UK PV Net; and Wright Center for Photovoltaics Innovation and Commercialization, University of Toledo.

MATERIALS RESEARCH SOCIETY SYMPOSIUM PROCEEDINGS

- Volume 1007— Synthesis, Processing, and Properties of Organic/Inorganic Hybrid Materials, R.M. Laine, C. Sanchez, C. Barbé, U. Schubert, 2007, ISBN 978-1-55899-967-1
- Volume 1008E—The Nature of Design—Utilizing Biology's Portfolio, R.R. Naik, C.C. Perry, K. Shiba, R. Ulijn, 2007, ISBN 978-1-55899-968-8
- Volume 1009E—Advanced Materials for Neuroprosthetic Interfaces, D.R. Kipke, S.P. Lacour, B. Morrison III, D. Tyler, 2007, ISBN 978-1-55899-969-5
- Volume 1010E—Functional Materials for Chemical and Biochemical Sensors, E. Comini, P-I. Gouma, V. Guidi, X-D. Zhang, 2007, ISBN 978-1-55899-970-1
- Volume 1011E—Materials for Architecture, D.S. Ginley, K.E. Uhrich, B.J. Faircloth, J-J. Kim, 2007, ISBN 978-1-55899-971-8
- Volume 1012— Thin-Film Compound Semiconductor Photovoltaics—2007, T. Gessert, K. Durose, S. Marsillac, T. Wada, C. Heske, 2007, ISBN 978-1-55899-972-5
- Volume 1013E—Organic and Nanoparticle Hybrid Photovoltaic Devices, 2007, ISBN 978-1-55899-973-2
- Volume 1014E—Three-Dimensional Nano- and Microphotonics, P.V. Braun, S. Fan, A.J. Turberfield, S-Y. Lin, 2007, ISBN 978-1-55899-974-9
- Volume 1015E—Hybrid Functional Materials for Optical Application, A. Cartwright, T.M. Cooper, A. Koehler, K.S. Schanze, 2007, ISBN 978-1-55899-975-6
- Volume 1016E—Materials and Material Structures Enabling Terahertz Technology, E. Stutz, I. Wilke, K. Kreischer, Q. Hu, 2007, ISBN 978-1-55899-976-3
- Volume 1017E—Low-Dimensional Materials—Synthesis, Assembly, Property Scaling, and Modeling, M. Shim, M. Kuno, X-M. Lin, R. Pachter, S. Kumar, 2007, ISBN 978-1-55899-977-0
- Volume 1018E—Applications of Nanotubes and Nanowires, L. Chen, M. Hersam, 2007, ISBN 978-1-55899-978-7
- Volume 1019E—Engineered Nanoscale Materials for the Diagnosis and Treatment of Disease, V.A. Hackley, A.K. Patri, J. Stein, B.M. Moudgil, 2007, ISBN 978-1-55899-979-4
- Volume 1020— Ion-Beam-Based Nanofabrication, D. ILA, J. Baglin, N. Kishimoto, P.K. Chu, 2007, ISBN 978-1-55899-980-0
- Volume 1021E—Surface and Interfacial Nanomechanics, R.F. Cook, W. Ducker, I. Szlufarska, R.F. Antrim, 2007, ISBN 978-1-55899-981-7
- Volume 1022E—Nanoscale Heat Transport—From Fundamentals to Devices, S.R. Phillpot, S. Volz, T. Borca-Tasciuc, M. Choi, 2007, ISBN 978-1-55899-982-4
- Volume 1023E—Functional Nanoscale Ceramics for Energy Systems, E. Ivers-Tiffée, S. Barnett, 2007, ISBN 978-1-55899-983-1
