CONTENTS

Prefacexi

Materials Research Society Symposium Proceedings.....xii

**** Thinking About Diamond 1**
A. Marshall Stoneham

**** Assembling the Building Blocks for Diamond Electronics..... 11**
William Joseph Yost

**** Lift-Off Process to Get Free-Standing High-Quality
Single Crystal Diamond Films and Suspended Single
Crystal Diamond Devices 25**
Jie Yang, C.F. Wang, E.L. Hu, and James E. Butler

*** Color Centers in Diamond as Practical Single-Photon
Source to Illustrate Quantum Complementarity31**
Vincent Jacques, Steven Regnnie, Dominique Chauvat,
and Jean-François Roch

*** Electronic Structures of Heavily Boron-Doped Superconducting
Diamond Films39**
Takayoshi Yokoya, Hiroyuki Okazaki, Tetsuya Nakamura,
Tomohiro Matsushita, Takayuki Muro, Eiji Ikenaga,
Masaaki Kobata, Keisuke Kobayashi, Akihisa Takeuchi,
Akihiro Awaji, Yoshihiko Takano, Masanori Nagao,
Tomohiro Takenouchi, Hiroshi Kawarada, and Tamio Oguchi

*** Electrical Transport in Heavily B-Doped Epitaxial Diamond
and NCD47**
Milos Nesladek, Philippe Bergonzo, Jiri Mares, and
Pavel Hubik

*** n-Type Doping of Diamond55**
Satoshi Koizumi

**Electron-Beam-Induced Dissociation of Boron-Deuterium
Pairs in Diamond61**
Julien Barjon, Jacques Chevallier, François Jomard,
Céline Baron, and Alain Deneuveille

****Keynote Paper**

***Invited Paper**

Cambridge University Press

978-1-107-40880-7 - Diamond Electronics—Fundamentals to Applications: Symposium held November 27-30, 2006, Boston, Massachusetts, U.S.A.

Edited by Philippe Bergonzo, Roy Gat, Richard B. Jackman and Christoph E. Nebel

Table of Contents

[More information](#)

Attempts to p-Dope Ultrananocrystalline Diamond Films in a Hot Filament Reactor.....	67
Paul William May and Matthew Hannaway	
Energetics, Electronic Properties, and Geometries of B-Doped Diamond: A First-Principles Study.....	75
Susumu Saito, Tomohisa Maeda, and Takashi Miyake	
Surface Bio-Functionalization of Boron Doped Diamond.....	81
Mathias Bonnauron, Charles Agnes, Pascal Mailley, Jean-Charles Arnault, Jacques de Sanoit, Christine Mer, Licinio Rocha, Philippe Bergonzo, Milos Nesladek, Frank Omnes, and Omar Elmazria	
* Electrochemical Charge Transfer to Diamond.....	89
Vidhya Chakrapani, John C. Angus, Alfred B. Anderson, and Gamini U. Sumanasekera	
* Surface and Electrochemical Studies of Thin Film Diamond.....	97
John Foord and David Opperman	
Simple and Effective Way to Improve the Stability of Titanium Based Boron Doped Diamond Film Electrode.....	105
Liang Guo and Guohua Chen	
DNA Bonding to CVD Diamond Probed by Scanning Electron-, Fluorescence-, and Atomic Force-Microscopy	113
Christoph E. Nebel, Hiroshi Uetsuka, Buhuslav Rezek, Dongchan Shin, Norio Tokuda, and Takako Nakamura	
* Biological Applications of Nanocrystalline Diamond.....	121
Oliver A. Williams, Michael Daenen, and Ken Haenen	
The Mechanism for Ultrananocrystalline Diamond Growth: Experimental and Theoretical Studies.....	127
Paul William May and Yuri A. Mankelevich	
* Enhancing Semiconductors With Diamond.....	135
Jerry W. Zimmer	
Synthesis of Sub-Micron Diamond Films on Si(100) for Thermal Applications by BEN-MPCVD.....	143
Samuel Saada, Jean-Charles Arnault, Licinio Rocha, and Philippe Bergonzo	
 *Invited Paper	

Cambridge University Press
978-1-107-40880-7 - Diamond Electronics—Fundamentals to Applications: Symposium held
November 27-30, 2006, Boston, Massachusetts, U.S.A.
Edited by Philippe Bergonzo, Roy Gat, Richard B. Jackman and Christoph E. Nebel
Table of Contents
[More information](#)

The Effects of Methane Concentration on Diamond Nucleation and Growth During Bias Enhanced Nucleation on 3C-SiC(100) Surfaces 151
Jean-Charles Arnault, Samuel Saada, Luciana Intiso, and
Philippe Bergonzo

Electrical Transport and Defect Spectroscopy of Free Standing Single Crystal CVD Diamond Prepared From Methane Rich Mixtures..... 157
Andrey Bogdan, Ganna Bogdan, Ward De Ceuninck,
Ken Haenen, and Milos Nesladek

Nano Crystalline Diamond Synthesized by Hot Filament Chemical Vapor Deposition 165
Takayuki Hirai, Yoshinori Kanno, and Yoshiki Takagi

Highly Oriented Diamond Films Grown at High Growth Rate 171
Xianglin Li, Ramon Collazo, and Zlatko Sitar

Single Crystal CVD Diamond Growth and Characterizations..... 177
Nicolas Olivier Tranchant, Dominique Tromson,
Zdenek Remes, Licinio Rocha, Milos Nesladek, and
Philippe Bergonzo

Improving Diamond Device Performances for Pulsed Mode Detection..... 183
Hassen Hamrita, Dominique Tromson, Caroline Descamps,
Christine Mer, Milos Nesladek, and Philippe Bergonzo

Synthetic Diamond Devices for Radiotherapy Applications: Passive and Active Dosimetry 189
Caroline Descamps, Dominique Tromson, Christine Mer,
Milos Nesladek, and Philippe Bergonzo

High Efficiency Heat Sinks From Polycrystalline Diamond Grown by CVD Method 195
Oleg A. Voronov, Gary S. Tompa, and Veronika Veress

Diamond Surface Modifications With Diazonium Salt 201
Hiroshi Uetsuka, Dongchan Shin, Norio Tokuda,
Kazuhiko Saeki, and Christoph E. Nebel

Cambridge University Press

978-1-107-40880-7 - Diamond Electronics—Fundamentals to Applications: Symposium held November 27-30, 2006, Boston, Massachusetts, U.S.A.

Edited by Philippe Bergonzo, Roy Gat, Richard B. Jackman and Christoph E. Nebel

Table of Contents

[More information](#)

Photoelectron Emission Mechanism From Hydrogen Terminated Nano-Crystalline Diamond	209
Daisuke Takeuchi, Kazuhiko Saeki, Christoph Erwin Nebel, Satoshi Yamasaki, and Oliver Aneurin Williams	
Electron Emission Mechanism of Doped CVD Diamond Characterized Using Combined XPS/UPS/FES System	215
Hisato Yamaguchi, Ichitaro Saito, Yuki Kudo, Tomoaki Masuzawa, Takatoshi Yamada, Masato Kudo, Yuji Takakuwa, and Ken Okano	
Diamond Based Ion-Sensitive Field Effect Transistors for Cellular Biosensing	221
Andrew Bennett, Olivier Gaudin, Oliver A. Williams, John S. Foord, and Richard B. Jackman	
DNA-ISFETs From Single Crystalline Diamond	229
Christoph E. Nebel, Dongchan Shin, Tomoko Yamamoto, and Takako Nakamura	
Irradiation-Induced Structural Modifications in Multifunctional Nanocarbons	235
Sanju Gupta	
Nanofabrication of Diamond-Like Carbon Templates for Nanoimprint Lithography	243
L. Tao, S. Ramachandran, C.T. Nelson, L.J. Overzet, M.J. Goeckner, G.S. Lee, and W. Hu	
Diamond-Like Carbon Film Deposition on an Artificial Heart Blood Pump Using a Flexible Type Electrode With r.f. Plasma CVD Processing	249
Kazuya Kanasugi, Yasuharu Ohgoe, Katsuya Tsuchimoto, Keisuke Sato, Kenji K. Hirakuri, Osamu Miyashita, Akio Funakubo, and Yasuhiro Fukui	
Comparing the Young's Modulus of Near-Frictionless Carbon Films Obtained From Different Methods	255
Bo Zhou, Barton C. Prorok, Ali Erdemir, and O. Eryilmaz	
Low Threshold Field Emission From Amorphous Carbon Films Grown by Electrochemical Deposition	261
Hideo Kiyota, Mikiteru Higashi, Tateki Kurosu, and Masamori Iida	

Cambridge University Press
978-1-107-40880-7 - Diamond Electronics—Fundamentals to Applications: Symposium held
November 27-30, 2006, Boston, Massachusetts, U.S.A.
Edited by Philippe Bergonzo, Roy Gat, Richard B. Jackman and Christoph E. Nebel
Table of Contents
[More information](#)

**Effects of High d.c. Bias Voltage on the Properties of
Diamond-Like Carbon Films267**
Boqian Yang, Hongxin Zhang, Xinpeng Wang, and
Xianping Feng

**Device Simulation and Design Optimization for Diamond
Based Insulated-Gate Bipolar Transistors275**
Haitao Ye, Niall Tumilty, David Garner, and
Richard B. Jackman
