

CONTENTS

Preface..... xi

Materials Research Society Symposium Proceedings..... xii

*ELECTRICALLY INHOMOGENEOUS  
MATERIALS*

\* **Electrical Characterization of Inhomogeneous and Heterogeneous Systems With Microstructural Periodicity.....3**  
Joachim Maier

**Effects of Grain Size Distribution on Cole-Cole Plots of Polycrystalline Spinel..... 15**  
M.P. Gutiérrez-Amador and R. Valenzuela

**Microstructural Development and Properties of (1-x) wt% Ba<sub>0.55</sub>Sr<sub>0.45</sub>TiO<sub>3</sub>-x wt% MgO Bulk Ferroelectrics ..... 21**  
Costas G. Fountzoulas

**Computer Simulation on the Relations Between the Porosity and the Microwave Properties in Dielectric Ceramics ..... 27**  
Jae-Hwan Park, Jae-Gwan Park, and Yoonho Kim

**Microstructure and Damage of the Interlaminar Interface of Carbon Fiber Polymer-Matrix Composites, Monitored by Contact Electrical Resistivity Measurement..... 33**  
Shoukai Wang, Victor H. Guerrero, Daniel P. Kowalik, and D.D.L. Chung

**Damage Detectability on Aluminum Alloy Panels Under Composite Patching by Various NDT Techniques..... 39**  
Antonia Moropoulou, Niki Kouloumbi, Zaira P. Marioli-Riga, Nicolas P. Avdelidis, and Paraskevi Pantazopoulou

\* **A Percolation Equation for Modeling Experimental Results for Continuum Percolation Systems..... 45**  
D.S. McLachlan, C. Chiteme, W.D. Heiss, and Junjie Wu

**Percolation Properties of Cellular Composite Systems ..... 57**  
C. Chiteme and D.S. McLachlan

**Electrical Conductivity of Ionic and Electronic Mixture ..... 63**  
Gyeong Man Choi, Joon Hee Kim, and Young Min Park

\*Invited Paper

Cambridge University Press  
978-1-107-41202-6 - Electrically Based Microstructural Characterization III  
Edited by Rosario A. Gerhardt, Andrew P. Washabaugh, M.A. Alim and Gyeong Man Choi

|                                                                                                                                           |            |
|-------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>AC Conductivity Based Microstructural Characterization of Yttria Stabilized Zirconia.....</b>                                          | <b>69</b>  |
| G. Sauti and D.S. McLachlan                                                                                                               |            |
| <b>Impedance Spectroscopy Study of Ionic Diffusion in Polycrystalline ZrO<sub>2</sub>:Y<sub>2</sub>O<sub>3</sub> Solid Solution .....</b> | <b>75</b>  |
| Fábio C. Fonseca, Eliana N.S. Muccillo, and R. Muccillo                                                                                   |            |
| <b>* The Influence of Filler Properties on the Strong PTC Effect of Resistivity in Polymer Based Conducting Composites .....</b>          | <b>83</b>  |
| Joachim Glatz-Reichenbach and Ralf Strümpfer                                                                                              |            |
| <br><i>ADVANCES IN EXPERIMENTAL METHODS<br/>AND INTERPRETATION</i>                                                                        |            |
| <b>Sensitivity and Resolution Limits in Scanning Capacitance Microscopy .....</b>                                                         | <b>95</b>  |
| Stefan Lanyi and Miloslav Hruskovic                                                                                                       |            |
| <b>Scanning Impedance Microscopy: From Impedance Spectra to Impedance Images .....</b>                                                    | <b>101</b> |
| Sergei V. Kalinin and Dawn A. Bonnell                                                                                                     |            |
| <b>Magnetic Force Microscopy Signatures of Defects in Current-Carrying Lines .....</b>                                                    | <b>107</b> |
| Ruchirej Yongsunthon, Ellen D. Williams, Andrei Stanishevsky, Jonathan McCoy, Robert Pego, Philip J. Rous, and Martin Peckerar            |            |
| <b>Displacement Current Staircase Due to Coulomb Blockade .....</b>                                                                       | <b>113</b> |
| Kouhei Nagano, Atsushi Okuda, and Yutaka Majima                                                                                           |            |
| <b>Electromagnetic Waves Through Disordered Systems: Comparison of Intensity, Transmission and Conductance .....</b>                      | <b>119</b> |
| Fredy R. Zypman and Gabriel Cwilich                                                                                                       |            |
| <b>* Impedance Spectroscopy in Ferromagnetic Materials .....</b>                                                                          | <b>127</b> |
| Raul Valenzuela                                                                                                                           |            |
| <b>* Incentives for Using LEIM in the Investigation of Corrosion Initiation on Organic Coated Alloys .....</b>                            | <b>137</b> |
| S.R. Taylor and A.M. Mierisch                                                                                                             |            |
| <b>* Electrochemical Porosimetry .....</b>                                                                                                | <b>151</b> |
| Hyun-Kon Song and Kun-Hong Lee                                                                                                            |            |
| <br>*Invited Paper                                                                                                                        |            |

**The Use of XANES and ELNES for the Characterization of Stabilized Zirconia.....161**  
David W. McComb, Sergei Ostanin, Dimitris Vlachos,  
Alan J. Craven, Michael W. Finnis, Anthony T. Paxton,  
and Ali Alavi

**FT-IR Spectra of Li(Al<sub>x</sub>Co<sub>1-x</sub>)O<sub>2</sub> (x=0.1–0.5) ..... 167**  
W. Hao, C. Li, X. Meng, G. Chen, and W. Xu

*MICROELECTRONIC APPLICATIONS*

**\* Investigation of Pt/Si/CeO<sub>2</sub>/Pt MOS Device Structure by Impedance Spectroscopy ..... 173**  
Jyrki Lappalainen, Darja Kek, and Harry L. Tuller

**Radio-Frequency Impedance Analysis of Anodic Tantalum Pentoxide Thin Films ..... 185**  
S. Dueñas, H. Castán, J. Barbolla, R.R. Kola, and P.A. Sullivan

**Improvement of Characteristics in Highly Reliable Thin Film Diode With Anodic Tantalum Pentoxide by Low Temperature Annealing Conditions..... 191**  
Chan-Jae Lee, Sung-Jei Hong, Sung-Kyu Park, Yong-Hoon Kim,  
Min-Gi Kwak, Won-Keun Kim, and Jeong-In Han

**Application of a Buffer Layer for the Dielectric Measurement of Thin Polymer Films..... 197**  
C.K. Chiang and Wataru Sakai

**Analysis of Ion Implantation Damage in Silicon Wafers by a Contactless Microwave Diagnostic..... 201**  
Richard K. Ahrenkiel and B. Lojek

**Depth Dependence of Dopant Induced Features on the Si(100)2x1:H Surface and Its Application for Three Dimensional Dopant Profiling..... 207**  
Lequn Liu, Jixin Yu, and Joseph W. Lyding

**Influence of Substrate Annealing Temperature Upon Deep Levels in n-Type 4H SiC ..... 213**  
Martin E. Kordesch, Florentina Perjeru, and R.L. Woodin

\*Invited Paper

|                                                                                                                                                      |            |
|------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Charge-Based Deep Level Transient Spectroscopy of Semiconducting and Insulating Materials.....</b>                                                | <b>219</b> |
| V.I. Polyakov, A.I. Rukovichnikov, N.M. Rossukanyi, and B. Druz                                                                                      |            |
| <b>Determination of Surface Space Charge Density on Semiconductor From Displacement Current-Voltage Curve Using a Scanning Vibrating Probe .....</b> | <b>225</b> |
| Yutaka Majima, Tomohiko Masuda, Setsuri Uehara, Atsushi Okuda, and Mitsumasa Iwamoto                                                                 |            |
| <b>Conductance-Transient Three-Dimensional Profiling of Disordered Induced Gap States on Metal-Insulator-Semiconductor Structures .....</b>          | <b>231</b> |
| H. Castán, S. Dueñas, J. Barbolla, I. Mártel, and G. González-Díaz                                                                                   |            |
| <b>Electrically Active Deep Levels in ScN .....</b>                                                                                                  | <b>237</b> |

| <b>* Improving GaAs Chip Yield and Enhancing Reliability of GaAs Devices.....</b>                                                                    | <b>257</b> |
| Kanti Prasad                                                                                                                                         |            |
| <b>Capacitance Spectroscopy of n-i-n and p-i-p GaAs Sandwich Structures With Nanoscale as Clusters in the i-Layers.....</b>                          | <b>269</b> |
| V.V. Chaldyshev, P.N. Brunkov, A.V. Chernigovskii, A. Moskalenko, N.A. Bert, S.G. Konnikov, V.V. Preobrazhenskii, M.A. Putyato, and B.R. Semyagin    |            |

**METALS AND ALLOYS**

|                                                                                                                                                                   |            |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Scaling Effects in Al<sub>72</sub>Mn<sub>22</sub>Si<sub>6</sub> Quasicrystals Deduced From the Pressure and Temperature Dependence of the Resistance .....</b> | <b>277</b> |
| John K. Vassiliou, Jens W. Otto, A. Pothireddy, and E.A. Simons                                                                                                   |            |

\*Invited Paper

**An Ab Initio Investigation on the Effects of Impurity in Aluminum Grain Boundary .....283**  
Guang-Hong Lu, Tomoyuki Tamura, Masao Kamiko, Masanori Kohyama, and Ryoichi Yamamoto

**Effect of Grain Boundaries and Indentation Load on the Electrical Properties of Nickel Base Super-Alloys .....289**  
Kimberly Pinkos, Celestina Laboy, and Rosario A. Gerhardt

**Phase Transformation Hysteresis in a Plutonium Alloy System: Modeling the Resistivity During the Transformation.....295**  
Jeffery J. Haslam, Mark A. Wall, David L. Johnson, David J. Mayhall, and Adam J. Schwartz

**Detection of Compositional Fluctuations in High Temperature Exposed Waspaloy .....301**  
Xiaodong Zou, Tariq Makram, and Rosario A. Gerhardt

**Refractory Thin-Film Metallizations With Controlled Stress and Electrical Resistivity .....307**  
Ilan Golecki and Margaret Eagan

**Surface Roughness and Surface-Induced Resistivity of Thin Gold Films on Mica .....313**  
Raúl C. Munoz, German Kremer, Luis Moraga, Guillermo Vidal, and Claudio Arenas

*AMORPHOUS MATERIALS*

**\* Influence of Confinement on Molecular Reorientational Dynamics of Liquid Crystals: Broadband Dielectric Spectroscopy Investigations .....321**  
Fouad M. Aliev

**The Structure and Electrical Properties of Polyaniline.....333**  
Runqing Ou, Robert J. Samuels, and Rosario A. Gerhardt

**Relation Between Heat-Treatment Temperature and Characteristics of Polyparaphenylene(PPP)-Based Carbon Materials for Lithium Ion Secondary Batteries .....339**  
Kozo Osawa, Tatsuo Nakazawa, Kyoich Oshida, Morinobu Endo, and Mildred S. Dresselhaus

\*Invited Paper

Cambridge University Press
