SUBJECT INDEX

- alumina, 125
 - /zirconia composites, 99
- aluminum alloys, 25, 49, 61, 67, 169, 207, 223, 261, 273, 283, 311, 323, 347, 353, 359, 365
- amorphous materials, 133, 303
- atomic force microscopy, 111
- bicrystals, 125
- cavitation, 31, 55, 61, 67, 73, 223, 229, 235
- cavity growth, 61, 73
 - volume, 61
- ceramics, 81, 93, 99, 105, 111, 117, 125, 133, 163, 175, 181
- composites, 111, 141, 273, 291
- computer simulation, 3
- constitutive equations, 175
- continuous recrystallization, 3, 25
- creep, 93, 111
- deformation mechanisms, 105, 291
- diffusional creep, 93, 105, 111, 181, 187
- dislocations, 93, 193
- disorientation distribution, 3
- dome forming, 253
- ductility, 353
- dynamic recrystallization, 25
- electron backscatter diffraction (EBSD), 49, 323
- equal-channel angular pressing (ECAP), 273, 311, 323, 335, 347, 353, 359, 365
- failure strains, 31
- fast forming, 207
- formability, 247
- fracture, 55
- grain
 - aspect ratio, 111
 - boundaries, 3, 81, 335
 - boundary character, 125
 - diffusion, 187
 - segregation, 31
 - sliding, 37, 125, 169, 193
- growth, 175, 181, 187
- misorientation, 49
- refinement, 311
- hardness, 353
- heterojunctions, 31
- high(-)
 - resolution electron microscopy, 125
 - strain rate superplasticity, 153, 261, 273, 283, 291, 311, 359, 365
 - velocity forming, 247
- hyperplasticity, 247
- in situ* composites, 15
- intergranular phases, 81
- internal stress superplasticity, 199
- intragranular slip, 193
- liquid phase, 133
- load relaxation, 37
- low-temperature superplasticity, 49, 153, 311
- machined sheets, 253
- magnesium alloys, 291
- mechanical milling, 229
- metal working, 347
- metallic glasses, 141, 303
- micromechanics, 199
- microstructure, 99, 111, 253, 261, 347, 365
- nanocavities, 169
- nanocrystalline materials, 153
- Nb solid solutions, 15
- Nb₃Al, 15
- near-net-shape, 261
- Newtonian viscous flow, 303
- Ni₃Al intermetallic, 335
- nickel alloys, 43, 153
- phase transformations, 15, 55
- power-law creep, 111, 199
- precursor-derived ceramics, 163
- recrystallization, 43
- rolling effects, 235
- sandwich structure, 223
- SiC, 133, 163, 175
- silicon nitride, 117, 163
- simulation, 163, 187, 223
- Sn, 31
- strain
 - hardening, 175
 - rate sensitivity, 273
- stress accommodation, 15, 199
 - exponent, 93, 105, 181, 193
 - relaxation, 117
- supercooled liquid, 303
- superplastic forming, 207, 229, 253
- joining, 99
- techno-economics, 207
- texture evolution, 49
- thermal cycling, 199
- threshold stress, 283
- Ti-6%Al-4%V, 55, 229
- titanium, 55
 - aluminide, 73
- torsion straining, 153
- transformation superplasticity, 55
