SUBJECT INDEX

- ab initio, 15
 - lattice dynamics, 233
 - simulation, 407
- acetylene, 407
- $\text{Al}_x\text{Ga}_{1-x}\text{N}$, 361
- α -boron, 453
- α -rhombohedral (α -rh) B-rich, 315
- amorphization, 225
- amorphous BN, 321
- anti-perovskite, 167
- band
 - alignment, 381
 - structure, 167
- B_4C , 315
- BN nanotubes, 321
- B_6O , 315
- boron
 - nitride, B_6N_{1-x} , 315
 - suboxide, 315, 453
- broken symmetry phase, 329
- carbide hugoniot, 99
- carbon nitride, 309
- $\text{Ca}_3(\text{VO}_4)_2$, 151
- chemical reactivity, 419
- compressive residual stresses, 73
- constant pressure ab initio molecular
 - dynamics, 329
- correlation radius, 461
- CrSb_2 , 139
- crystalline, 253
- CuAl_2 -type structure, 139
- cubic hexagonal, 321
- decomposition kinetics, 309
- deformation twins, 87
- diamond, 115
 - anvil cell(s) (DAC), 265, 283, 371
 - technique, 361
 - compacts, 115
- diffusion creep, 3
- diffusivity, 295
- dipolar impurities, 461
- dislocation(s), 87
 - creep, 3
- disorder, 461
- elastic moduli, 145
- elasticity, 15
- electronic structure, 173, 393
- emission, 195
- endothermic crystallization, 467
- energy(-)
 - dispersive
 - experiments, 289
 - x-ray diffraction, 151, 429, 435
 - spectrum, 207
- equation of state (EOS), 105, 133, 167, 429
- excess B_2O_3 , 315
- exciton, 201
- exothermic melting, 467
- ferroelectric, 151, 461
- finite temperature, 105
- fluorescence, 265
- forsterite, 15
- free energy difference, 253
- $\text{GaInP}(\text{I})$, 195
 - GaAs interface, 381
- γ -iron, 41
- GaN, 349, 361
 - crystals, 349
- gapless semiconductor, 341
- gasket, 341
- Gibb's free energy, 133
- gold, 145
- GPa with a molybdenum sample, 341
- Grüneisen parameter, 41
- H-A phase, 329
- hard spheres, 253
- hBN-cBN-liquid triple point, 321
- heterostructures, 195
- HF, 127
- high(-)
 - N_2 pressure, 349
 - pressure(s), 15, 115, 133, 161, 167, 195, 289, 295, 309, 393, 435
 - and temperatures, 315
 - anvils, 179
 - carbon, 99
 - diamond cell research, 179
 - phase transformations, 225
 - synthesis, 139
 - techniques, 381
 - resolution imaging plate diffraction, 435
 - temperature, 115, 253
 - calorimetry, 185
- homoepitaxial, 349
- hugoniot, 105
- hydrostatic pressure, 201, 213
- icosahedra, 315, 453
- indentation, 225
- infinite frequency shear modulus, 295
- $\text{In}_x\text{Ga}_{1-x}\text{N}$, 361
- insulator-
 - metal transition, 207
 - to-metal transitions, 393
- intervalley deformation potential, 201
- inverse melting, 467
- ionic solids, 233
- iron, 41
- itinerant-electron ferromagnetic, 139
