INDEX

Aberdare, 142
abdominal operation, 88
— pain, 19
acapnia, 8, 88, 89; mechanisms of, 89; theory, 91
acclimatisation, 9, 59, 111, 168, 189; capacity for, 191; essence of, 176; mechanism of, 177; O; want in medulla, 177
acclimatised person, 111
accountants, 17
acid, increment of, to blood, 97
— production due to exercise at high altitudes, 92
acidaemia, 93
acidosis, 93
acute anoxic anoxemia, 158
acute oxygen want, 155
adaptation, 193
administration of oxygen, 144
adrenalin, 84
aerial environment, 191
after effects of high altitudes, 190
Agazzotti, Prof., 23
Alagna, 23
alcohol, 159
alcoholic excess, 155
— processes, 51
alkalinity of blood, 169
alkalosis, 93
alphabet test, 161
alpine observers, 112
Alps, 6, 24
Alta Vista Hut, 8, 26, 27, 28
alterations in breathing, 179
altitude, effect of, on hemoglobin capacity, 139; p.c. saturation of blood, 59
— and fatigue, comparison of effects of, 165
— factors, 171
altitudes, Peru profile diagram of, 31
alveolar air, 8, 52; of Cholo, 169; oxygen pressure in, 59; oxygen tension of, 61
alveolus, 67
Amazon, 20
American Air Force, 105
— Army, 118
— Gas Service, 144
Andes, 9, 24, 25, 126, 296
Anglo-Saxon, 169
animals at high altitudes, 184
anoxia, 19
anoxemia, 91, 104; acute, 157; chronic, 151, 155; effect on heart, 135; mechanisms of, 92; two different kinds of, 150
anoxic anoxemia, 155
aortic re-perfusion, 101
aphasia, 143
apoplectic appearance, 51
appetite, 18; loss of, 185
arithmetic, 17
arrhythmia sinus, 19
arterial blood oxygen pressure, 59
— puncture, 84
— saturation, effect of exercise on, 137
arteries throbbing, 19
Asian plateau, 183
asphyxia, 103
asphyxiation, 108; of muscle, 87
athletes, 130
atmosphere, 187; rarity of, 75
atmospheric conditions, 187
— pressure, 28
— rarity, 108
auditory disturbance, 17
— impairment, 17
auriculo-ventricular node, 103
autoposis, 65
aviators, 189
bad dreams, 19
balloon ascent (1875), 189
— ascents, 155
Barbour and Tolstoi, 146
Barcroft, 19, 155
— Boycott, Dunn and Peters, 105
Barcroft-Haldane apparatus, 149
barometric pressure, effect on red cells, 153
Bartlett, Mr, 159
basal pulse, 111, 112
Bert, Paul, 2, 88
bicarbonate, 170
Binger, 19; dissociation curve of, 100
blisters, 190
blood, accession of corpuscles to, 145; alkalinity of, 91; buffer value of, 96, 97; hemoglobin p.c. of, 143; hemoglobin value of; 99; H-ion concentration of, 88; loss of water by, 144; low O, in, 92; minute volume of, 84; of Europeans on Andes, 171; p.c. saturation with oxygen, 99; P0 of reduced, 99; quantity of, 64; reaction of, 91; sterile, 148; total oxygen capacity of, 143; venous mixed, 63; visibility of, 151
— concentration, illusory, 145; influence of oxygen, 144; mechanism of, 144
— flow, 120; (Porton method), 64
— formation, 156
— pressures at successive altitudes, 182
— reaction, at high altitudes, 85; changes in, 96; to reduced oxygen pressure, 60

INDEX

carbonic acid, in acclimatisation, 173; in alveolar air, 8; in blood, 86; in expired air, 88; in tissues, 88; partial pressure in blood, 90

cardiac puncture, 64, 117, 118

cardiograph, 100

Carlos Fernandez, Mount, 41
carnitine method, 61, 62

Caspian, 22, 33, 36

catalyst, deficiency of, 167
cavity in bones, size of, 153

Central Asia plateau, blood count on, 183

Central Railway of Peru, 6, 33

cereals, appetite for, 183
cerebral haemorrhage, 180

Cerro de Pasco, 8, 17, 18, 27, 32, 34, 59, 66, 126; advantages of, 30; climate of, 36; Copper Corporation, 18

— Expedition, Report of, 173

— chamber glass, 4

carbohydrates, oxygen in, 123; oxygen in venous blood, 123; oxygen, utilisation of, 123

caches, 50

chests, breadth of, 49; X-ray measurements of, 44

Cheyne Stokes respiration, 180

Chief Government Inspector of Mines in Great Britain, 166

ciliary sensations, 19

Chimborazo, 10

collantites, 99; in corpuscles, 99; migration of, 99

corticosteroids, 104

Cholo children, 52

Cholos, 37, 44; bones, 153

coughs, 184

Chosica, 34, 113

chronic anoxia, 151

— oxygen want, 150, 166

circulation, acceleration of, 122; changes in, 181

— rate, 116

climate, high, 27; of Tenerife, 24

— factors, 27

climbers without oxygen, 189

clock test, 161

CO, partial pressure of, 62; effect on spleen, 147

CO2 content, 96

— dissociation curve of blood at low and high altitudes, 96

— pressure in alveolar air, 178

Coefficient, of oxidation, specific, 148; of utilisation, 192

Coefficients of mining engineers, 67

cold, 8

cold of air, 23, 24, 27; blood formation at, 150

cold extremities, 19

— feet, 19

coldness of extremities, 181

Colley, Mr. 33

Collie, Mr. 18

Colorado Springs, experiments at, 143

colour, 50, 51

— index, 142

— complexion, 51

colubration time, 104, 107

— conjunctivitis, 190

— consciousness, low degree of, 166

constant metabolic rate, 159

Conway, 10

— coronary circulation, 122

corpuscles, addition of, to blood, 157; addition of, to circulation, 171; chlorides in, 99; concentration of, 144; reaction of, 98, 99; in spleen pulp, 147; storehouse of, 147

— correlation coefficient, 195

Cortese, 34, 113

— oxygen want, 150, 166

circulation, acceleration of, 122; changes in, 181

— rate, 116

climate, high, 27; of Tenerife, 24

— factors, 27

climbers without oxygen, 189

clock test, 161

CO, partial pressure of, 62; effect on spleen, 147

CO2 content, 96

— dissociation curve of blood at low and high altitudes, 96

— pressure in alveolar air, 178

Coefficient, of oxidation, specific, 148; of utilisation, 192

Coefficients of mining engineers, 67

cold, 8

cold of air, 23, 24, 27; blood formation at, 150

cold extremities, 19

— feet, 19

coldness of extremities, 181

— Bock and Meakins, 110
reducing power of blood, 150
reflex, elaborate, 158
repetition, 157
respiration, and acclimatisation, 177; theory of, 174
— apparatus, 117
— chamber, 95
respirations, shortness in, 179
respiratory centre, irritability of, 97; irritability of, at high altitudes, 96
— crisis, 104
— distress, 179, 188
— rhythm, 97
— stimulus, 197
restless sleep, 19
restlessness, 19
reticulated red cells, 150
rhythm, involuntary, 159; of breathing, alteration in, 180
ribs, 47, 493
Richards, Mr J., 139
Rio Blanco, 110
Roberts, Dr, 177
Rockefeller Institute, 54
Rogers, 67
Rohde, 132
Rongbuk glacier, 187
Rongshar valley, 190
Ryffel’s method, 76
Salamon, Victor Oscar, 34
San Matteo, 110
— sand, climbing in, 4
Sandes, 103
Santa Cruz, 24
Sarikoli, blood count of, 183
saturation, arterial blood, 59
saxifrage, 27
Schafer, Sir Edward Sharpsey, 64
Schneider, Dr, 155; high altitude physiology, 128
— and Trusseall, 111
Schumburg, 7
sea-level, 17, 24
— records, 110
secrections, oxygen, 103
— theory, 61, 62, 63
sedentary exercise, 121
self-control, effect of want of oxygen on, 164
seroche, 13, 17, 18
Shaw, Sir Napier, 9
Shebbeare, 190
Sherpa porters, 188
Shivering, 5
shortness in respiration, 13 et seq., 179
INDEX

sighing, 19
sinus arrhythmia, 19
sinus tachycardia, 19
skin, concentration of red cells in, 145;
— congestion in, 145
— vessels, tone of, 130
sleep, 18, 186, 187
sleeplessness, 13 et seq., 19, 165, 187
— anxious, 164
smell, alterations in, 184
snow, fatigue due to, 10
— blindness, 190
— glassess, 190
— line, 27
solar radiation, 27
soldiers, testing of, 112
Somervell, Dr., 114, 128, 179; on acclimatisation, 190
Spanish Government, 24
special senses, 184
specific coefficient of oxidation, 148
— diffusing capacity, 192
— haemoglobin flow, 192
— substances, oxidation of, 166
sphygmomanometer, adopted by R.A.F., 182
spleen, 145; as store of haemoglobin, 171;
— as a mobile store of haemoglobin, 197;
— contraction of, 147; effect of O₂ want on, 147
— pulp, 147
Stadie, Dr., 54
stagnation in cutaneous areas, 130
starch grains, 65
starling, researches on heart, 133
— and Fülüber, 64
— and Markwalder, 122
sterile blood, 148
Stewart’s method, blood flow in skin, 128
strooping, 185
sundstroem, 93
surgical shock, 88
sweating, 187
sweets, appetite for, 185
sympathetic control, 110
symptoms, C.N.S., 19; cardiac, 19; gastrointestinal, 19; of anoxemia, 156; peripheral circulatory, 19; respiratory, 19; systolic output, 128, 129, 132; as p.c. of normal, 124
T-wave, 106
Takahashi, Dr., 136
tambourages, 110
taste, alterations in, 184
temperature factor, 170
Tenerife, 2, 8, 24, 25; climate of, 24; expedition to, 89; Peak of, 24
tests, division, 186; mental, 160; multiplication, 186
tetanus, 80, 81
tetanus, 80
theodolite, 163
thirst, 185
Thomas, 10
throbbling, 19
— arteries, 19
— pulses, 19
Tibet, 49
— march across, 181
Tibetan plateau, blood count on, 183
Tierno, 6, 32
— tissue, oxygen pressure in, 173
tone of skin vessels, 130
training, 191
tremors, 190
tribe, Mrs., 64
triple extrapolation, 121; blood flow, 126
Turin, 181
ulcerated throat, 180
unusually controls, 73
unreasonableness, 17
unsaturation, 61
unseasibility, 186
urine, alkali in, 93
utilisation of oxygen, 71
Uyeno, Dr., 99
vago-cardiac rhythm, 110
vagus, control, 110
— nerve, 106
— stimulation, 110
vanadium mine, 32
variables in normal goats, 195
vaso-motor control, 64
— stress on brain, 117
vegetation, 27
venous blood mixed, 63, 68
ventilation, 169; unequal in lung, 12
vertigo, 19
verzár, F., 80, 86
visibility of blood, 102
vision, impairment of, 104
visual disturbance, 19
vomiting, 13 et seq., 19, 185; occurrence of, 78
walker, Miss Mary, 64
water abstraction from plasma, 171
— regulating mechanism of the body, 144
weight, loss of, 190
wenger, Herr, 27
wilson, Lieut., 144
wind, 11
wollaston, Dr. A. F. R., 49
work done by heart, 131
x-ray apparatus, 43
young corpses in blood, 148
Zuntz, Prof., 3, 7, 9, 10, 27
zurbriggen, 10
